

Presented for discussion - Possible proposed framework for planning activities to improve community safety and well-being with regard to persons arrested for committing crimes. Each entity can only commit for their agency, but might have activities that can further community goals. Currently there is no consensus on a vision among these agencies upon which to build an action plan, but small pieces are being addressed in each component. The County is a partner in all of these components, and the County Board's Facilities Committee is currently working on the Justice System Housing line.
