

CHAMPAIGN COUNTY BOARD
ENVIRONMENT and LAND USE COMMITTEE AGENDA

County of Champaign, Urbana, Illinois
Thursday, September 7, 2023 - 6:30 p.m.

Shields-Carter Meeting Room
Brookens Administrative Center, 1776 E. Washington St., Urbana

Committee Members:

Eric Thorsland – Chair
Aaron Esry – Vice-Chair
Jim Goss
Kyle Patterson

Emily Rodriguez
Jilmala Rogers
Chris Stohr

Agenda	Page #'s
I. Call to Order	
II. Roll Call	
III. Approval of Agenda/Addendum	
IV. Approval of Minutes	
A. August 8, 2023 – Regular Meeting	1-4
V. Public Participation	
VI. Communications	
VII. New Business: Items for Information Only	
A. Ted Hartke email and slide regarding wind farms and taking of land without Compensation	5-6
B. Illinois Environmental Protection Agency Notice of Application for Renewal of Federally Enforceable State Operating Permit [73020205] for Kraft Heinz Co. located at 1701 West Bradley Avenue, Champaign.	7-8
VIII. New Business: Items to Receive and Place on File by ELUC to Allow a 30-Day Review Period	
A. Zoning Case 086-AT-23. Amend the Champaign County Zoning Ordinance as follows in order to ensure compliance with Public Act 102-1123:	9-199
1. Add and/or amend definitions to be consistent with Public Act 102-1123: as described in Parts 1 and 2 of the legal advertisement.	
2. Revise Section 6.1.4 WIND FARM SPECIAL USE PERMIT to establish an effective date for regulating previously authorized WIND FARMS, as described in Part 3 of the legal advertisement.	
3. Add new Section 6.1.5 PROPOSED WIND FARM SPECIAL USE PERMIT to establish regulations applicable after an effective date for proposed WIND FARMS consistent with Public Act 102-1123, as described in Part 4 of the legal advertisement.	
4. Renumber existing Section 6.1.5 to new Section 6.1.6 PHOTOVOLTAIC (PV) SOLAR FARM and establish an effective date for regulating previously authorized PHOTOVOLTAIC (PV) SOLAR FARMS, as described in Part 5 of the legal advertisement.	

All meetings are at Brookens Administrative Center – 1776 E Washington Street in Urbana – unless otherwise noted. To enter Brookens after 4:30 p.m., enter at the north (rear) entrance located off Lierman Avenue. Champaign County will generally, upon request, provide appropriate aids and services leading to effective communication for qualified persons with disabilities. Please contact Administrative Services, 217-384-3776, as soon as possible but no later than 48 hours before the scheduled meeting.

CHAMPAIGN COUNTY BOARD
ENVIRONMENT and LAND USE COMMITTEE (ELUC)
September 7, 2023 Agenda

5. Add new Section 6.1.7 PROPOSED PHOTOVOLTAIC (PV) SOLAR FARM to establish regulations applicable after an effective date for proposed PHOTOVOLTAIC (PV) SOLAR FARMS consistent with Public Act 102-1123, as described in Part 6 of the legal advertisement.

IX. Other Business

A. Semi-Annual Review of CLOSED Session Minutes

B. Monthly Reports

i. July 2023

200-210

X. Chair's Report

XI. Designation of Items to be Placed on the Consent Agenda

XII. Adjournment

**Champaign County Board
Environment and Land Use Committee (ELUC)
County of Champaign, Urbana, Illinois**

MINUTES – Subject to Review and Approval

DATE: Thursday, August 10, 2023
TIME: 6:30 p.m.
PLACE: Shields-Carter Meeting Room
Brookens Administrative Center
1776 E Washington, Urbana, IL 61802

Committee Members

Present	Absent
Aaron Esry (Vice-Chair)	
	Jim Goss
Kyle Patterson	
	Emily Rodriguez
	Jilmala Rogers
Chris Stohr	
Eric Thorsland (Chair)	

County Staff: John Hall (Zoning Administrator), Mary Ward (Recording Secretary), and Lis Dillingham (Administrative Services)

Others Present: None

MINUTES

- I.** Call to Order
Committee Chair Thorsland called the meeting to order at 6:32 p.m.
- II.** Roll Call
Roll call was taken and a quorum was declared present.
- III.** Approval of Agenda/Addendum
MOTION by Mr. Esry to approve the agenda and seconded by Mr. Stohr. Upon voice vote, the **MOTION CARRIED** unanimously to approve the agenda.
- IV.** Approval of Minutes
A. May 4, 2023 – Regular Meeting
MOTION by Mr. Patterson to approve the minutes of the May 4, 2023, regular meeting, seconded by Mr. Esry. Upon voice vote, the **MOTION CARRIED** unanimously to approve the minutes.

34 **V. Public Participation**

35

36 Kenwood Sullivan, Dewey, spoke briefly regarding Zoning Cases 094-AM-23 and 095-S-23 rezoning in
37 Greenwood Subdivision, Dewey. He would be available to answer any questions during the meeting.

38

39 Les Cotton, St. Joseph, spoke regarding Zoning Case 096-AM-23, the request by Evergreen Cremation Services.
40 He gave a brief overview of their business and the need for direct cremation services. He would be available
41 for questions during that part of the meeting.

42

43 Jake Parduhn, South Holland, IL, with Cremation Systems. They are the equipment supplier for Evergreen
44 Cremation Services. He gave some background information on the equipment that will be used, and he will be
45 available for questions later.

46

47 Steve Koester, property owner for proposed crematorium. Here is support of the project and to help answer
48 any questions.

49

50 Kyle Koester, agent for seller; and will be happy to provide any information and answer any questions.

51

52 **VI. Communications**

53

54 There were no communications.

55

56 **VII. New Business: Items to be Recommended to the County Board**

57

58 A. **Zoning Case 094-AM-23.** A request by Kenwood Sullivan, 3262 Greenwood Drive, Dewey IL 61840, to
59 amend the Zoning Map to allow for the development of three single family residential lots in the AG-1
60 Agriculture Zoning District by adding the Rural Residential Overlay (RRO) Zoning District in conjunction with
61 related County Board Special Use Permit Case 095-S-23 on one 5.13-acre tract and one 10.27-acre tract in
62 the Northwest Quarter of the Southeast Quarter of Section 21, Township 22 North, Range 8 East of the
63 Third Principal Meridian in East Bend Township, and commonly known as the farmland located northeast
64 of Greenwood Lake Subdivision, Dewey.

65

66 B. **Zoning Case 095-S-23.** A request by Kenwood Sullivan, 3262 Greenwood Drive, Dewey, IL 61840, to
67 authorize a County Board Special Use Permit for a Rural Residential Overlay (RRO) Zoning District for
68 three single family residential lots in conjunction with related map amendment Case 094-AM-23 that
69 is also required for an RRO, on one 5.13-acre tract and one 10.27-acre tract in the Northwest Quarter
70 of the Southeast Quarter of Section 21, Township 22 North, Range 8 East of the Third Principal Meridian
71 in East Bend Township, and commonly known as the farmland located northeast of Greenwood Lake
72 Subdivision, Dewey.

73

74 Zoning Cases 094-AM-23 and 095-S-23 were discussed together as they are related. Mr. Hall explained that
75 there was no plat of subdivision because they are 5-acre lots and only requires plats of survey. The items
76 you would normally see with splat subdivision, in an RRO case, are actually done at the ZBA. There was a a
77 lot of good evidence presented at the ZBA. There should be no concerns about septic systems. They all
78 have good drainage. They all have street access. The Zoning Board passed this unanimously, staff had no
79 concerns and there were no comments from neighbors at the public hearing.

80

81 **OMNIBUS MOTION** by Mr. Esry to approve both Zoning Case 094-AM-23 and Zoning Case 095-S-23.
82 Seconded by Mr. Patterson.

83
84 Mr. Stohr asked if the lots can be sub-divided in the future. They would need to go through the same
85 process. Mr. Stohr also asked if they were being sold for residential development. Mr. Sullivan said they
86 were planning on building a house on one 5-acre lot and continuing to cash rent the other ten for the
87 foreseeable future.

88
89 Upon voice vote, the **MOTION CARRIED** unanimously.

90
91 **C. Zoning Case 096-AM-23.** A request by Evergreen Cremation Services Inc. with the
92 following officers and shareholders: Vincent Sims, President, and Cheryl Sims, 2806 Susan Stone Dr,
93 Urbana; Les Cotton, Chairman, and Emily Cotton, 302 Harlan Wise Drive, St. Joseph; Justin Blake, Chairman,
94 and Heidi Blake, 2199 Parrish Dr, St. Joseph, to amend the Zoning Map to change the zoning district
95 designation from the I-1 Light Industry Zoning District to the AG-2 Agriculture Zoning District in order to
96 establish and operate the proposed Special Use in related Zoning Case 097-S-23 (already approved by the
97 ZBA), on Lot 3 of Stahly Subdivision in the Southeast Quarter of the Southeast Quarter of Section 8,
98 Township 19 North, Range 8 East of the Third Principal Meridian in Champaign Township with an address
99 of 314 Tiffany Court, Champaign.

100
101 Mr. Hall said that this is an unusual rezoning case going from Industrial back to AG-2. Our ordinance is out
102 of date regarding crematoriums.

103
104 **MOTION** by Mr. Esry to approve Zoning Case 096-Am-23; seconded by Mr. Stohr.

105
106 Discussion followed the motion. Mr. Esry asked if updating the ordinance is something we need to look at.
107 It is not critical but it's on the to-do list. Mr. Thorsland reminded the committee that one of the special
108 conditions is, if it happens to change in the ordinance, it would be moved back to I-2. Mr. Esry felt that
109 this project should not be an issue for the neighbors.

110
111 Mr. Stohr asked about the regulations for stack air emissions. Mr. Parduhn from Cremation Systems said
112 for the state of Illinois ROSS (Registration of Smaller Sources) for stack emissions and the limit is 5 tons of
113 particulate matter per year. If they were to run the retort 24/7, 365 days per year, it comes out to 1.7 tons
114 of particulate matter per year. That is well short of the limit. They also passed the EPA Visible Emissions
115 test perfectly.

116
117 Mr. Thorsland asked if there were any future plans to have a second retort? They do have the option in
118 the layout to add a second retort. That would be sometime way down the road.

119
120 Upon voice vote, the **MOTION CARRIED** unanimously.

121
122 **VIII. Other Business**

123 **A. Monthly Reports**

124 i. March 2023

125 ii. April 2023

126 iii. May 2023

127 iv. June 2023

129 The reports were received and placed on file.

130

131 **IX.** Chair's Report

132

133 There was no Chair's Report. Mr. Stohr reminded the committee that the wind and solar ordinances will be
134 heard by ZBA on August 17. They will probably be to ELUC at the September meeting.

135

136 **X.** Designation of Items to be Placed on the Consent Agenda

137

138 Items to be placed on the Consent Agenda include VII. A., B., and C.

139

140 **XI.** Adjournment

141

142 Chair Thorsland adjourned the meeting at 7:03 p.m.

143

144

John Hall

From: Ted Hartke <tedhartke@hartke.pro>
Sent: Wednesday, March 29, 2023 11:48 AM
To: John Hall; Susan Burgstrom; Justin Leerkamp
Subject: Hartke "Unconstitutional taking of land without compensation" exhibit regarding wind turbines.
Attachments: 20230329124057681.pdf

CAUTION: External email, be careful when opening.

Dear Susan and John,

With the Illinois statewide setbacks proposed for Champaign County, it creates "taking" of land without just compensation.

Our zoning board and our county board can clearly see how this is unconstitutional by looking at this exhibit we prepared for Ford County in 2018

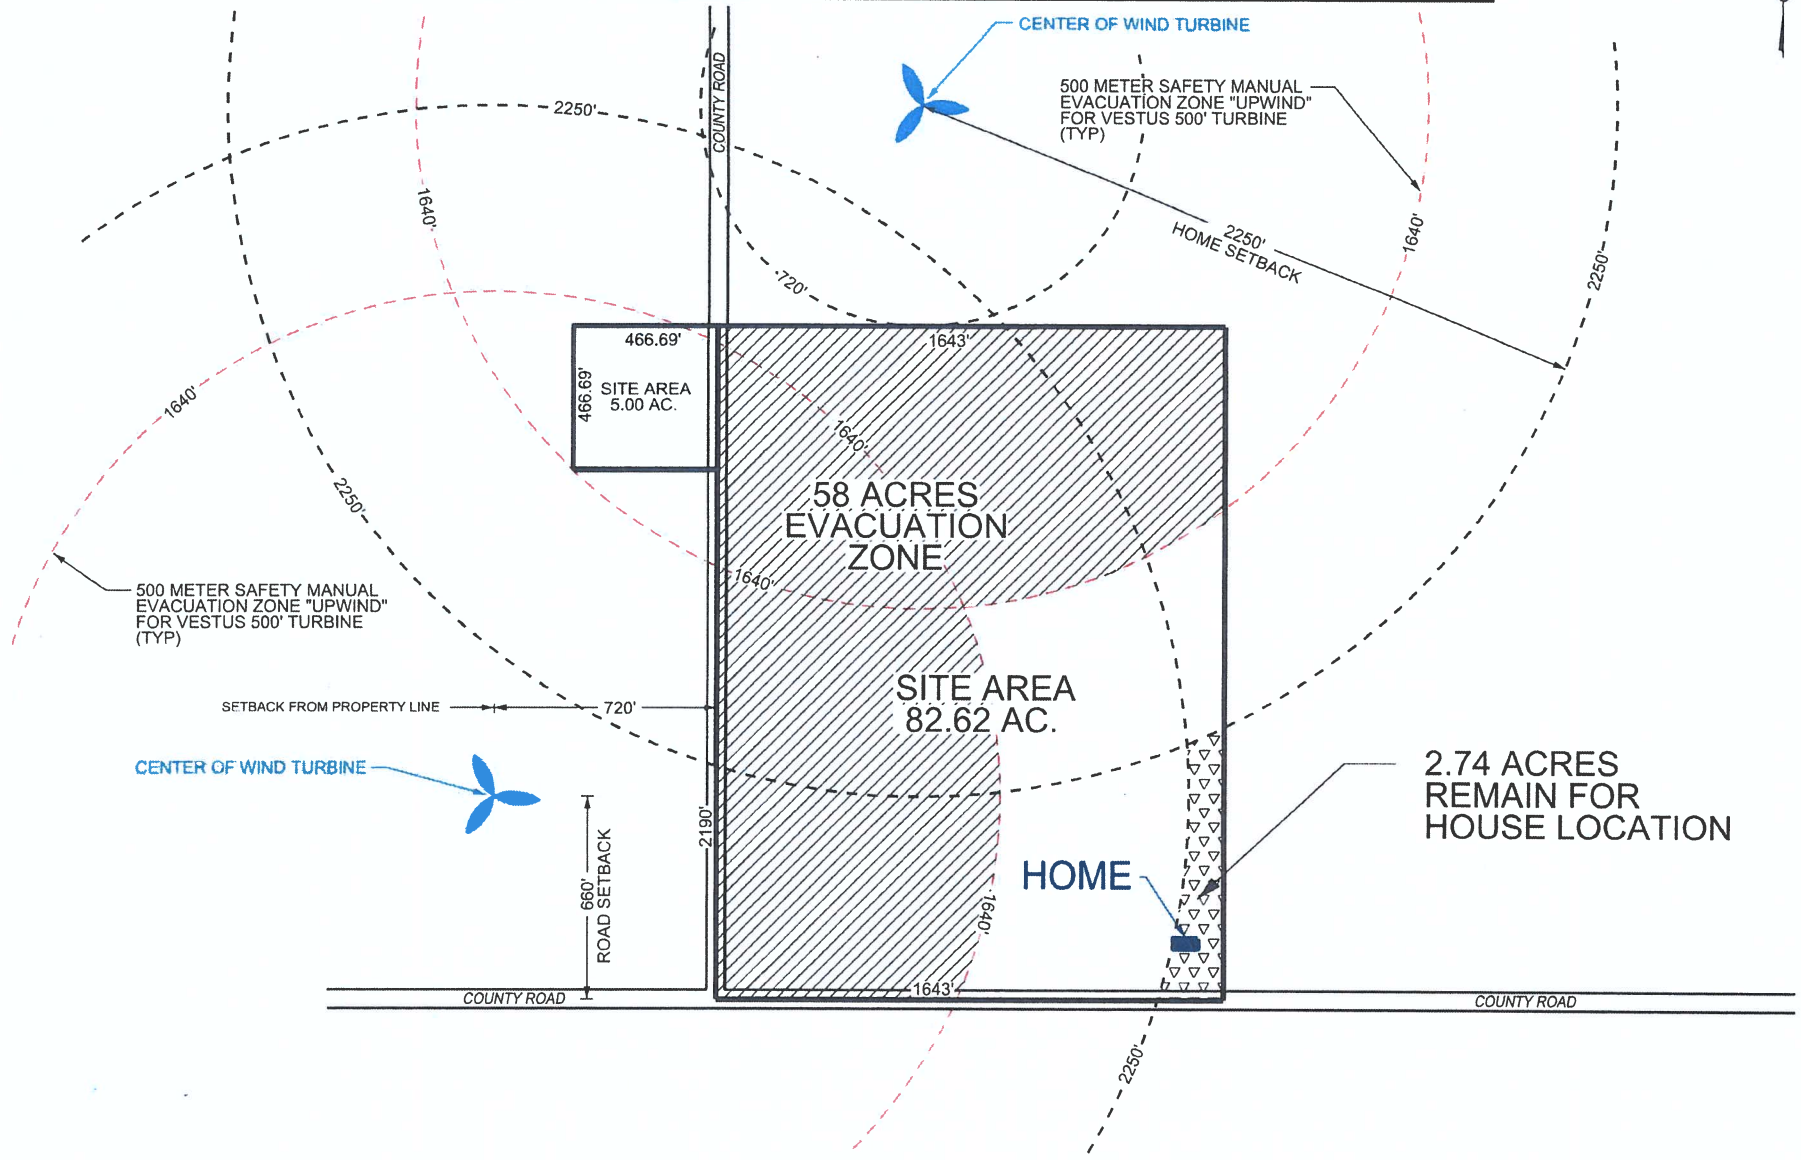

All setbacks should be based upon noise and physical safety from the property line. It is the only way to protect uncompensated people from having their building site locations ruined by their neighbor(s). None of our land should be handed over as noise/safety abatement zones.

Please distribute this email and exhibit far-and-wide to all of the ELUC Committee and the zoning committee and the county board. I will be asking for this to be on the big screen during the zoning meetings, perhaps every single night there is a meeting, so keep it handy and available.

Best regards,

Ted Hartke

Re: Kraft Heinz Co (Illinois EPA BOA ID# 019802AAF)
Federally Enforceable State Operating Permit (73020205)

To Distribution List:

In accordance with the Illinois EPA's Environmental Justice Policy, the Office of Environmental Justice wants to provide you with information about a potential action. The Illinois EPA is sending this letter to notify you of an application received by the Bureau of Air (BOA).

The Illinois EPA has received an application for a renewal of Federally Enforceable State Operating Permit [73020205] for Kraft Heinz Co located at 1701 West Bradley Avenue in Champaign. This facility manufactures food products.

The application is currently under review by the BOA. Once ready for review, the Illinois EPA will post a public notice/fact sheet and draft permit on its website (<https://epa.illinois.gov/public-notices/boa-notices.html>) and will accept comments during the public notice period.

If you would like to sign up to receive notifications by email, please visit the Illinois EPA Environmental Justice webpage: <https://epa.illinois.gov/topics/environmental-justice.html>

If you have questions about the application, please contact Chris Pressnall, Environmental Justice Coordinator at (217) 524-1284, chris.pressnall@illinois.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Chris Pressnall".

RE: **Zoning Ordinance Text Amendment Case 086-AT-23**

Request: **Amend the Champaign County Zoning Ordinance as follows in order to ensure compliance with Public Act 102-1123:**

1. **Add the following definitions to Section 3.0 Definitions:
FACILITY OWNER, NON-PARTICIPATING PROPERTY,
OCCUPIED COMMUNITY BUILDING, PARTICIPATING
PROPERTY.**
2. **Revise the following definitions in Section 3.0 Definitions:
PARTICIPATING DWELLING, NON-PARTICIPATING
DWELLING, COMMUNITY PV SOLAR FARM**
3. **Revise Section 6.1.4 WIND FARM SPECIAL USE PERMIT to establish an effective date for regulating previously authorized WIND FARMS.**
4. **Add new Section 6.1.5 PROPOSED WIND FARM SPECIAL USE PERMIT to establish regulations applicable after an effective date for proposed WIND FARMS, including but not limited to:**
 - a. **Establish a separation from each WIND FARM TOWER of 1.1 times the maximum blade tip height to the nearest PARTICIPATING DWELLING, to the center point of a public street right-of-way, to the nearest non-participating property line, and to third-party transmission lines.**
 - b. **Establish a separation from each WIND FARM TOWER of 2.1 times the maximum blade tip height to the nearest NON-PARTICIPATING DWELLING or OCCUPIED COMMUNITY BUILDING, and to the nearest point on the property line of fish and wildlife areas and Illinois Nature Preserve Commission protected lands.**
 - c. **Establish that the total WIND FARM TOWER HEIGHT (measured to the tip of the highest rotor blade) must receive a Determination of No Hazard to Air Navigation by the Federal Aviation Administration under 14 CFR Part 77.**
 - d. **Establish that the financial assurance for WIND FARMS will be based on the requirements in the Agricultural Impact Mitigation Agreement but will be required to be an Escrow Account.**
 - e. **Add other new standard conditions consistent with Public Act 102-1123.**

5. **Renumber existing Section 6.1.5 to new Section 6.1.6 PHOTOVOLTAIC (PV) SOLAR FARM and establish an effective date for regulating previously authorized PHOTOVOLTAIC (PV) SOLAR FARMS.**

6. **Add new Section 6.1.7 PROPOSED PHOTOVOLTAIC (PV) SOLAR FARM to establish regulations applicable after an effective date for proposed PHOTOVOLTAIC (PV) SOLAR FARMS, including but not limited to:**
 - a. **Establish a separation of 50 feet between the PV SOLAR FARM fencing and the street centerline.**
 - b. **Establish a separation of 50 feet between the nearest edge of any component of the PV SOLAR FARM and the nearest point on the property line of the non-participating property.**
 - c. **Establish a separation of 150 feet from the nearest edge of any component of the PV SOLAR FARM and the nearest point on the outside wall of an OCCUPIED COMMUNITY BUILDING or NON-PARTICIPATING DWELLING.**
 - d. **Establish that the financial assurance for PV SOLAR FARMS will be based on the requirements in the Agricultural Impact Mitigation Agreement.**
 - e. **Add other new standard conditions consistent with Public Act 102-1123.**

Petitioner: **Zoning Administrator**

STATUS

At the August 17, 2023 public hearing, the Zoning Board of Appeals voted 7 to 0 to RECOMMEND DENIAL of this amendment.

A significant amount of public input was received during the public meetings held on March 30, 2023, May 11, 2023, and May 25, 2023.

Attachment B is the Finding of Fact approved by the ZBA. A summary of testimony and comments received can be found under Item 16.E. Case 086-AT-23 memoranda including all comments received and minutes from the meetings can be found on the ZBA meetings website at: http://www.co.champaign.il.us/CountyBoard/meetings_ZBA.php.

The amendment recommended for denial by the ZBA differs from the draft presented to ELUC at its March 9, 2023 meeting. The amendment was greatly modified after March 27, 2023, based on information from a seminar sponsored by the Illinois Association of County Board Members (IACBM) and the Farm Bureau. Based on the discussion at that Seminar, nearly all existing requirements for wind farm and solar farm that originally had been proposed to be deleted were added back to the amendment so that the only practical difference between the proposed amendment and the existing Ordinance are the imposed standards from Public Act 102-1123. All revisions proposed since the March 9, 2023 ELUC meeting are shown in Attachment C: Proposed Amendment.

Attachment D is a clean version of the proposed amendment as recommended for denial by the ZBA.

BASIS OF RECOMMENDATION FOR DENIAL

The Board determined that the proposed text amendment would not protect the public health, safety, comfort, morals and welfare, and therefore would not help achieve the purpose of the Zoning Ordinance.

In the Board's opinion, suitable sites for wind and solar farms need to have a greater separation from the property line of the non-participating property than what is proposed in the text amendment and therefore the proposed amendment does not help achieve Land Resource Management Plan Goal 4: Agriculture. See the discussion under items 9. and 17. in the Finding of Fact.

Items 20. and 23. in the Finding of Fact also review two problems with Public Act 102-1123 related to the mandated 30-day time limit for a final decision after the close of the public hearing (Item 20.) and the inadequacy of the separation to a public street centerline of 1.1 times the wind farm tower height (Item 23.)

PUBLIC COMMENTS

Public comments received in the public hearing are summarized in items 16.E.(10)-(12) of the Finding of Fact.

Public comments received in previous Zoning Case 037-AT-22 are also summarized in items 16.E.(1)-(8) of the Finding of Fact.

Relevant Findings from Zoning Case 037-AT-22 regarding the height of wind farm towers has been included as Item 19. in the Finding of Fact.

PUBLIC ACT 102-1123 AND POSSIBILITY OF LITIGATION

Public Act 102-1123 requires that an adopted ordinance for wind and solar farms can be no stricter than the requirements in the Public Act. P&Z Staff consulted with the State's Attorney's Office regarding the possibility of litigation should the County approve a text amendment that is stricter than what Public Act 102-1123 allows.

The Champaign County State's Attorney's Office opined that including requirements that are stricter than what Public Act 102-1123 allows creates a risk of litigation to Champaign County, but the State's Attorney's Office is not opposed to the County approving the proposed amendment.

The ZBA's recommendation of denial reflects that Board's opinion that the regulations imposed by Public Act 102-1123 are not strict enough for wind and solar projects in Champaign County.

MUNICIPAL PROTEST RECEIVED

Three villages protest the approval of the text amendment. With the changes made after the March 27, 2023, IACBM Seminar, the proposed amendment has the same regulations as the existing Zoning Ordinance regarding PV solar farms within 1½ miles of a municipality with a comprehensive plan. Note that the protests were received before the changes made after the March 27, 2023, seminar sponsored by the IACBM and the Farm Bureau. The following protests have been received and are attached:

- a. The Village of Philo sent a letter of protest received March 28, 2023. The letter cites that the proposed text amendment would affect Village of Philo’s control of its extraterritorial jurisdiction; would create increased noise levels; noise intrusion; visual blight; diminished television, radio and internet reception; negative effects on birds and other wildlife; compromised public safety particularly during storm events; and nuisances.
- b. The Village of St. Joseph sent a letter of protest received March 30, 2023. The letter cites that the proposed text amendment would affect Village of St. Joseph’s control of its extraterritorial jurisdiction.
- c. The Village of Mahomet sent a letter of protest received March 30, 2023. The letter cites that the proposed text amendment problems with removing the language requiring subdivision for leasing situations. The proposed amendment would impact the Village’s ability to secure proper easements or the construction of infrastructure for utility systems. The Village strongly opposes solar and wind farms as a special use in the AG-2 Agriculture Zoning District due to the proximity of the zone to its municipal boundaries. They suggest that rezoning lands within ETJs could assure freedom for urban, contiguous, and incremental expansion for municipalities.

NEXT STEPS

Standard protocol is for the Committee to make a preliminary recommendation on a proposed text amendment at the first Committee meeting following a ZBA recommendation, and then make a final recommendation to the County Board at the next regularly scheduled Committee meeting (October 5, 2023, in this instance). The delay in a final recommendation is intended to give municipalities and townships with plan commissions one month in which to provide comments or protests.

LEGAL PUBLICATION: WEDNESDAY, MARCH 15, 2023

CASE: 086-AT-23

NOTICE OF PUBLIC HEARING IN REGARD TO AN AMENDMENT TO THE TEXT OF THE CHAMPAIGN COUNTY ZONING ORDINANCE

CASE 086-AT-23

The Champaign County Zoning Administrator, 1776 East Washington Street, Urbana, has filed a petition to amend the text of the Champaign County Zoning Ordinance. The petition is on file in the office of the Champaign County Department of Planning and Zoning, 1776 East Washington Street, Urbana, IL.

A public hearing will be held **Thursday, March 30, 2023 at 6:30 p.m.** prevailing time in the Shields-Carter Meeting Room, Brookens Administrative Center, 1776 East Washington Street, Urbana, IL, at which time and place the Champaign County Zoning Board of Appeals will consider a petition for the following:

Amend the Champaign County Zoning Ordinance as follows in order to ensure compliance with Public Act 102-1123:

1. Add the following definitions to Section 3.0 Definitions: FACILITY OWNER, NON-PARTICIPATING PROPERTY, OCCUPIED COMMUNITY BUILDING, PARTICIPATING PROPERTY.
2. Revise the following definitions in Section 3.0 Definitions: PARTICIPATING DWELLING, NON-PARTICIPATING DWELLING, COMMUNITY PV SOLAR FARM
3. Revise Section 6.1.4 WIND FARM SPECIAL USE PERMIT to establish an effective date for regulating previously authorized WIND FARMS.
4. Add new Section 6.1.5 PROPOSED WIND FARM SPECIAL USE PERMIT to establish regulations applicable after an effective date for proposed WIND FARMS, including but not limited to:
 - a. Establish a separation from each WIND FARM TOWER of 1.1 times the maximum blade tip height to the nearest PARTICIPATING DWELLING, to the center point of a public street right-of-way, to the nearest non-participating property line, and to third-party transmission lines.
 - b. Establish a separation from each WIND FARM TOWER of 2.1 times the maximum blade tip height to the nearest NON-PARTICIPATING DWELLING or OCCUPIED COMMUNITY BUILDING, and to the nearest point on the property line of fish and wildlife areas and Illinois Nature Preserve Commission protected lands.
 - c. Establish that the total WIND FARM TOWER HEIGHT (measured to the tip of the highest rotor blade) must receive a Determination of No Hazard to Air Navigation by the Federal Aviation Administration under 14 CFR Part 77.
 - d. Establish that the financial assurance for WIND FARMS will be based on the requirements in the Agricultural Impact Mitigation Agreement but will be required to be an Escrow Account.
 - e. Add other new standard conditions consistent with Public Act 102-1123.

5. Renumber existing Section 6.1.5 to new Section 6.1.6 PHOTOVOLTAIC (PV) SOLAR FARM and establish an effective date for regulating previously authorized PHOTOVOLTAIC (PV) SOLAR FARMS.
6. Add new Section 6.1.7 PROPOSED PHOTOVOLTAIC (PV) SOLAR FARM to establish regulations applicable after an effective date for proposed PHOTOVOLTAIC (PV) SOLAR FARMS, including but not limited to:
 - a. Establish a separation of 50 feet between the PV SOLAR FARM fencing and the street centerline.
 - b. Establish a separation of 50 feet between the nearest edge of any component of the PV SOLAR FARM and the nearest point on the property line of the non-participating property.
 - c. Establish a separation of 150 feet from the nearest edge of any component of the PV SOLAR FARM and the nearest point on the outside wall of an OCCUPIED COMMUNITY BUILDING or NON-PARTICIPATING DWELLING.
 - d. Establish that the financial assurance for PV SOLAR FARMS will be based on the requirements in the Agricultural Impact Mitigation Agreement.
 - e. Add other new standard conditions consistent with Public Act 102-1123.

All persons interested are invited to attend said hearing and be heard. If you would like to submit comments or questions before the meeting, please call the P&Z Department at 217-384-3708 or email zoningdept@co.champaign.il.us no later than 4:30 pm the day of the meeting. The hearing may be continued and reconvened at a later time.

AS APPROVED

086-AT-23

**FINDING OF FACT
AND FINAL DETERMINATION**

**of
Champaign County Zoning Board of Appeals**

Final Determination: **RECOMMEND DENIAL**

Date: **August 17, 2023**

Petitioner: **Zoning Administrator**

Request: **Amend the Champaign County Zoning Ordinance as follows in order to ensure compliance with Public Act 102-1123:**

- 1. Add the following definitions to Section 3.0 Definitions: FACILITY OWNER, NON-PARTICIPATING PROPERTY, OCCUPIED COMMUNITY BUILDING, PARTICIPATING PROPERTY.**
- 2. Revise the following definitions in Section 3.0 Definitions: PARTICIPATING DWELLING, NON-PARTICIPATING DWELLING, COMMUNITY PV SOLAR FARM**
- 3. Revise Section 6.1.4 WIND FARM SPECIAL USE PERMIT to establish an effective date for regulating previously authorized WIND FARMS.**
- 4. Add new Section 6.1.5 PROPOSED WIND FARM SPECIAL USE PERMIT to establish regulations applicable after an effective date for proposed WIND FARMS, including but not limited to:**
 - a. Establish a separation from each WIND FARM TOWER of 1.1 times the maximum blade tip height to the nearest PARTICIPATING DWELLING, to the center point of a public street right-of-way, to the nearest non-participating property line, and to third-party transmission lines.**
 - b. Establish a separation from each WIND FARM TOWER of 2.1 times the maximum blade tip height to the nearest NON-PARTICIPATING DWELLING or OCCUPIED COMMUNITY BUILDING, and to the nearest point on the property line of fish and wildlife areas and Illinois Nature Preserve Commission protected lands.**
 - c. Establish that the total WIND FARM TOWER HEIGHT (measured to the tip of the highest rotor blade) must receive a Determination of No Hazard to Air Navigation by the Federal Aviation Administration under 14 CFR Part 77.**

- d. **Establish that the financial assurance for WIND FARMS will be based on the requirements in the Agricultural Impact Mitigation Agreement but will be required to be an Escrow Account.**
 - e. **Add other new standard conditions consistent with Public Act 102-1123.**
- 5. Renumber existing Section 6.1.5 to new Section 6.1.6 PHOTOVOLTAIC (PV) SOLAR FARM and establish an effective date for regulating previously authorized PHOTOVOLTAIC (PV) SOLAR FARMS.**
- 6. Add new Section 6.1.7 PROPOSED PHOTOVOLTAIC (PV) SOLAR FARM to establish regulations applicable after an effective date for proposed PHOTOVOLTAIC (PV) SOLAR FARMS, including but not limited to:**
- a. **Establish a separation of 50 feet between the PV SOLAR FARM fencing and the street centerline.**
 - b. **Establish a separation of 50 feet between the nearest edge of any component of the PV SOLAR FARM and the nearest point on the property line of the non-participating property.**
 - c. **Establish a separation of 150 feet from the nearest edge of any component of the PV SOLAR FARM and the nearest point on the outside wall of an OCCUPIED COMMUNITY BUILDING or NON-PARTICIPATING DWELLING.**
 - d. **Establish that the financial assurance for PV SOLAR FARMS will be based on the requirements in the Agricultural Impact Mitigation Agreement.**
 - e. **Add other new standard conditions consistent with Public Act 102-1123.**

Finding of Fact 2 - 37

Summary Finding of Fact 38

Documents of Record..... 39 - 40

Final Determination..... 41

Proposed Amendment 41

FINDING OF FACT

From the documents of record and the testimony and exhibits received at the public hearing conducted on **March 30, 2023, May 11, 2023, May 25, 2023 and August 17, 2023**, the Zoning Board of Appeals of Champaign County finds that:

1. The petitioner is the Zoning Administrator.
2. The proposed amendment is intended to revise requirements for WIND FARMS and PV SOLAR FARMS in the Zoning Ordinance to comply with Public Act 102-1123.
3. Municipalities with zoning and townships with planning commissions have protest rights on all text amendments and they are notified of such cases.

SUMMARY OF THE PROPOSED AMENDMENT

4. The proposed amendment is attached to this Finding of Fact as it will appear in the Zoning Ordinance.

GENERALLY REGARDING THE LRMP GOALS, OBJECTIVES, AND POLICIES

5. The *Champaign County Land Resource Management Plan* (LRMP) was adopted by the County Board on April 22, 2010. The LRMP Goals, Objectives, and Policies were drafted through an inclusive and public process that produced a set of ten goals, 42 objectives, and 100 policies, which are currently the only guidance for amendments to the *Champaign County Zoning Ordinance*, as follows:
 - A. The Purpose Statement of the LRMP Goals, Objectives, and Policies is as follows:

“It is the purpose of this plan to encourage municipalities and the County to protect the land, air, water, natural resources and environment of the County and to encourage the use of such resources in a manner which is socially and economically desirable. The Goals, Objectives and Policies necessary to achieve this purpose are as follows:...”
 - B. The LRMP defines Goals, Objectives, and Policies as follows:
 - (1) Goal: an ideal future condition to which the community aspires
 - (2) Objective: a tangible, measurable outcome leading to the achievement of a goal
 - (3) Policy: a statement of actions or requirements judged to be necessary to achieve goals and objectives
 - C. The Background given with the LRMP Goals, Objectives, and Policies further states, “Three documents, the *County Land Use Goals and Policies* adopted in 1977, and two sets of *Land Use Regulatory Policies*, dated 2001 and 2005, were built upon, updated, and consolidated into the LRMP Goals, Objectives and Policies.

REGARDING LRMP GOALS

6. LRMP Goal 1 is entitled “Planning and Public Involvement” and states that as follows:

Champaign County will attain a system of land resource management planning built on broad public involvement that supports effective decision making by the County.

Goal 1 has 4 objectives and 4 policies. The proposed amendment **WILL NOT IMPEDE** the achievement of Goal 1.

7. LRMP Goal 2 is entitled “Governmental Coordination” and states as follows:

Champaign County will collaboratively formulate land resource and development policy with other units of government in areas of overlapping land use planning jurisdiction.

Goal 2 has two objectives and three policies. The proposed amendment **WILL NOT IMPEDE** the achievement of Goal 2.

8. LRMP Goal 3 is entitled “Prosperity” and states as follows:

Champaign County will encourage economic growth and development to ensure prosperity for its residents and the region.

Goal 3 has three objectives and no policies. Objective 3.1 is most relevant to the proposed text amendment. The proposed amendment will **HELP ACHIEVE** Goal 3 as follows:

- A. Objective 3.1 states, “Champaign County will seek to ensure that it maintains comparable tax rates and fees, and a favorable business climate relative to similar counties.”

The proposed amendment will **HELP ACHIEVE** Objective 3.1 as follows:

- (1) The proposed text amendment will allow further development of PV SOLAR FARMS, WIND FARMS and WIND TOWERS, which will allow newer technologies to improve Champaign County’s business climate.

9. LRMP Goal 4 is entitled “Agriculture” and states as follows:

Champaign County will protect the long-term viability of agriculture in Champaign County and its land resource base.

Goal 4 has 9 objectives and 22 policies. Objectives 4.4, 4.5, 4.7, 4.8 and their policies do not appear to be relevant to the proposed text amendment. The proposed amendment will **NOT HELP ACHIEVE** Goal 4 for the following reasons:

- A. Objective 4.1 states as follows: **“Champaign County will strive to minimize the fragmentation of the County’s agricultural land base and conserve farmland, generally applying more stringent development standards on *best prime farmland*.”**

The proposed amendment will **NOT HELP ACHIEVE** Objective 4.1 for the following reasons:

- (1) The proposed amendment **WILL NOT IMPEDE** the achievement of Policies 4.1.2, 4.1.3, 4.1.4, 4.1.5, 4.1.7, 4.1.8, and 4.1.9.
- (2) Policy 4.1.1 states: **“Commercial agriculture is the highest and best use of land in the areas of Champaign County that are by virtue of topography, soil and drainage, suited to its pursuit. The County will not accommodate other land uses except under very restricted conditions or in areas of less productive soils.”**

AS APPROVED

The proposed amendment will **NOT HELP ACHIEVE** Policy 4.1.1 for the following reasons:

- a. The standard conditions for WIND FARM TOWERS and PV SOLAR FARMS will ensure the following:
 - (a) The proposed amendment requires inadequate minimum separations between any WIND FARM TOWERS, PV SOLAR FARMS and existing adjacent use to minimize issues of land use compatibility.
 - (b) No WIND FARM TOWER or PV SOLAR FARM shall interfere with agricultural operations (see Objective 4.2).
 - (c) A WIND FARM TOWER or PV SOLAR FARM can be located at a location that is not well-suited for that WIND FARM TOWER or PV SOLAR FARM (see Objective 4.3).
 - (d) The proposed amendment establishes standard conditions to ensure that the allowable noise level created by a WIND FARM TOWER or PV SOLAR FARM is consistent with the Illinois Pollution Control Board regulations that are the same for all rural land uses.
 - (e) The proposed amendment requires WIND FARMS and PV SOLAR FARMS to have an approved Decommissioning and Site Reclamation Plan to ensure that funds will be available to remove a WIND FARM or PV SOLAR FARM if the WIND FARM or PV SOLAR FARM ever becomes non-functional.

- (3) Policy 4.1.6 states: **“Provided that the use, design, site and location are consistent with County policies regarding:**
 - i. Suitability of the site for the proposed use;**
 - ii. Adequacy of infrastructure and public services for the proposed use;**
 - iii. Minimizing conflict with agriculture;**
 - iv. Minimizing the conversion of farmland; and**
 - v. Minimizing the disturbance of natural areas; then**
 - a) **On best prime farmland, the County may authorize discretionary residential development subject to a limit on total acres converted which is generally proportionate to tract size and is based on the January 1, 1998 configuration of tracts, with the total amount of acreage converted to residential use (inclusive of by-right development) not to exceed three acres plus three acres per each 40 acres (including any existing right-of-way), but not to exceed 12 acres in total; or**
 - b) **On best prime farmland, the County may authorize non-residential discretionary development; or**
 - c) **The County may authorize discretionary review development on tracts consisting of other than best prime farmland.”**

The proposed amendment will **NOT HELP ACHIEVE** Policy 4.1.6 for the following reasons:

-
- a. The ZBA has recommended that the proposed amendment will **NOT HELP ACHIEVE** Objective 4.3 regarding location at a suitable site and adequacy of infrastructure and public services.
 - b. The ZBA has recommended that the proposed amendment will **HELP ACHIEVE** Objective 4.2 regarding no interference with agricultural operations.
 - c. The proposed amendment will **HELP ACHIEVE** the County’s policies regarding minimizing the conversion of best prime farmland as follows:
 - (a) The only policy regarding conversion of best prime farmland by non-residential discretionary development is Policy 4.1.6b., which states, “On best prime farmland the County may authorize non-residential development.” Policy 4.1.6.b. has no limit on the conversion of best prime farmland for non-residential discretionary development and is merely a statement of fact and therefore, the proposed amendment does help achieve Policy 4.1.6b.
- B. Objective 4.2 is entitled “Development Conflicts with Agricultural Operations” and states, “Champaign County will require that each *discretionary review* development will not interfere with agricultural operations.”

The proposed amendment will **HELP ACHIEVE** Objective 4.2 because of the following:

- (1) **Policy 4.2.1 states, “The County may authorize a proposed business or other non-residential *discretionary review* development in a rural area if the proposed development supports agriculture or involves a product or service that is better provided in a *rural* area than in an urban area.”**

The proposed amendment will **HELP ACHIEVE** Policy 4.2.1 for the following reasons:

- a. The Land Resource Management Plan (LRMP) provides no guidance regarding what products or services are better provided in a rural area and therefore that determination must be made in each zoning case.
- b. WIND FARM TOWERS and PV SOLAR FARM **ARE** services better provided in a rural area as evidenced by the following:
 - (a) WIND FARM TOWERS and PV SOLAR FARMS do not require access to most utilities.
 - (b) WIND FARM TOWERS and PV SOLAR FARMS are not compatible with principal structures within the minimum separation distance established by the Zoning Ordinance.
- c. Even though WIND FARM TOWERS and PV SOLAR FARMS do not serve the surrounding agricultural uses directly, the landowner receives payment from the WIND FARM TOWER and PV SOLAR FARM operator in excess of the value of a crop from that land.

AS APPROVED

- (2) **Policy 4.2.2 states, “The County may authorize *discretionary review* development in a rural area if the proposed development:**
- a) **is a type that does not negatively affect agricultural activities; or**
 - b) **is located and designed to minimize exposure to any negative affect caused by agricultural activities; and**
 - c) **will not interfere with agricultural activities or damage or negatively affect the operation of agricultural drainage systems, *rural roads*, or other agriculture-related infrastructure.”**

The proposed amendment will **HELP ACHIEVE** Policy 4.2.2 for the following reasons:

- a. The proposed amendment requires that an applicant shall enter into an Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture, including the following:
 - (a) The Applicant shall bear full responsibility for coordinating any special conditions required in the SPECIAL USE Permit in order to ensure compliance with the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
 - (b) All requirements of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture shall become requirements of the County Board SPECIAL USE Permit.
 - (c) Champaign County shall have the right to enforce all requirements of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
- (3) **Policy 4.2.3 states, “The County will require that each proposed discretionary development explicitly recognize and provide for the right of agricultural activities to continue on adjacent land.”**

The proposed amendment will **HELP ACHIEVE** Policy 4.2.3 for the following reason:

- a. WIND FARMS and PV SOLAR FARMS both require Agricultural Impact Mitigation Agreements with the Illinois Department of Agriculture.
- (4) **Policy 4.2.4 states, “To reduce the occurrence of agricultural land use and non-agricultural land use nuisance conflicts, the County will require that all discretionary review consider whether a buffer between existing agricultural operations and the proposed development is necessary.”**

The proposed amendment will **HELP ACHIEVE** Policy 4.2.4 for the following reason:

- a. The proposed amendment requires minimum separations from adjacent uses and structures as a standard condition.
- C. Objective 4.3 is entitled “Site Suitability for Discretionary Review Development” and states: “Champaign County will require that each discretionary review development is located on a suitable site.”

The proposed amendment will **NOT HELP ACHIEVE** Objective 4.3 because of the following:

- (1) **Policy 4.3.1 states “On other than best prime farmland, the County may authorize a discretionary review development provided that the site with proposed improvements is suited overall for the proposed land use.”**

The proposed amendment will **HELP ACHIEVE** Policy 4.3.1 for the following reason:

- a. In the opinion of the Zoning Board of Appeals, suitable sites have a greater separation from the property line of the non-participating property than what is proposed in the text amendment.

- (2) **Policy 4.3.2 states, “On best prime farmland, the County may authorize a discretionary review development provided the site with proposed improvements is well-suited overall for the proposed land use.**

The proposed amendment will **NOT HELP ACHIEVE** Policy 4.3.2 for the following reasons:

- a. Because so much of Champaign County consists of best prime farmland soils, any development of a WIND FARM or PV SOLAR FARM is likely to be on best prime farmland.
- b. Standard conditions for WIND FARMS and PV SOLAR FARMS will ensure that they shall not be approved on any location that is not well-suited as follows:
- (a) The proposed amendment identifies areas where WIND FARMS and PV SOLAR FARMS should not be located.
- (b) The proposed amendment requires an Endangered Species Consultation with the IDNR and IDNR recommendations will be included in the Agency Action Report submitted with the Special Use Permit Application.
- (c) The proposed amendment requires consultation with the State Historic Preservation Officer of IDNR and IDNR recommendations will be included in the Agency Action Report submitted with the Special Use Permit Application.
- (d) The proposed amendment requires consultation with the United States Fish and Wildlife Service for fish and wildlife impacts.
- c. In the opinion of the Zoning Board of Appeals, suitable sites have a greater separation from the property line of the non-participating property than what is proposed in the text amendment.

- (3) **Policy 4.3.3 states, “The County may authorize a discretionary review development provided that existing public services are adequate to support to the proposed development effectively and safely without undue public expense.”**

The proposed amendment will **NOT IMPEDE** Policy 4.3.3.

AS APPROVED

- (4) **Policy 4.3.4 states, “The County may authorize a discretionary review development provided that existing public infrastructure, together with proposed improvements, is adequate to support the proposed development effectively and safely without undue public expense.”**

The proposed amendment will **HELP ACHIEVE** Policy 4.3.4 for the following reasons:

- a. The proposed amendment requires a Roadway Upgrade and Maintenance Agreement with the relevant highway authority.

- (5) **Policy 4.3.5 states, “On best prime farmland, the County will authorize a business or other non-residential use only if:**
- a. **It also serves surrounding agricultural uses or an important public need; and cannot be located in an urban area or on a less productive site; or**
- b. **the use is otherwise appropriate in a rural area and the site is very well suited to it.”**

The proposed amendment will **NOT HELP ACHIEVE** Policy 4.3.5 for the following reasons:

- a. As reviewed for Policy 4.2.1 in this Finding of Fact:
- (a) **WIND FARMS and PV SOLAR FARMS ARE** services better provided and therefore **ARE** appropriate in a rural area.
- b. Regarding location of a WIND FARM or PV SOLAR FARM on a less productive site, the following is reviewed under Policy 4.3.2 in this Finding of Fact:
- (a) It is unlikely that a WIND FARM or PV SOLAR FARM in Champaign County will be located on less than best prime farmland.
- c. In the opinion of the Zoning Board of Appeals, suitable sites have a greater separation from the property line of the non-participating property than what is proposed in the text amendment.

10. LRMP Goal 5 is entitled “Urban Land Use” and states as follows:

Champaign County will encourage urban development that is compact and contiguous to existing cities, villages, and existing unincorporated settlements.

Goal 5 has 3 objectives and 15 policies. The proposed amendment is **NOT RELEVANT** to Goal 5 in general.

11. LRMP Goal 6 is entitled “Public Health and Safety” and states as follows:

Champaign County will ensure protection of the public health and public safety in land resource management decisions.

Goal 6 has 4 objectives and 7 policies. Objectives 6.2, 6.3, and 6.4 are not relevant to the proposed amendment. The proposed amendment will **HELP ACHIEVE** Goal 6 for the following reasons:

- A. Objective 6.1 states, “**Champaign County will seek to ensure that development in unincorporated areas of the County does not endanger public health or safety.**” Objective 6.1 has four subsidiary policies; policy 6.1.3 is the only relevant policy, and it states the following:
- (1) Policy 6.1.3 states, “**The County will seek to prevent nuisances created by light and glare and will endeavor to limit excessive night lighting, and to preserve clear views of the night sky throughout as much of the County as possible.**”

The proposed amendment will **HELP ACHIEVE** Objective 6.1.3 as follows:

- a. Section 6.1.2 A. of the Zoning Ordinance requires that any SPECIAL USE Permit with exterior lighting shall be required to minimize glare onto adjacent properties by the use of full-cutoff type lighting fixtures with maximum lamp wattages.
- b. The proposed amendment requires that landscaping, awnings, or fencing shall be provided for any part of a WIND FARM where shadow flicker exceeds the standards established in the Zoning Ordinance.

12. LRMP Goal 7 is entitled “Transportation” and states as follows:

Champaign County will coordinate land use decisions in the unincorporated area with the existing and planned transportation infrastructure and services.

Goal 7 has 2 objectives and 7 policies. The proposed amendment is **NOT RELEVANT** to Goal 7 in general.

13. LRMP Goal 8 is entitled “Natural Resources” and states as follows:

Champaign County will strive to conserve and enhance the County’s landscape and natural resources and ensure their sustainable use.

Goal 8 has 9 objectives and 36 policies. The proposed amendment is **NOT RELEVANT** to Goal 8 in general.

14. LRMP Goal 9 is entitled “Energy Conservation” and states as follows:

Champaign County will encourage energy conservation, efficiency, and the use of renewable energy sources.

Goal 9 has 5 objectives and 5 policies. The proposed amendment will **NOT IMPEDE** the achievement of Goal 9.

15. LRMP Goal 10 is entitled “Cultural Amenities” and states as follows:

Champaign County will promote the development and preservation of cultural amenities that contribute to a high quality of life for its citizens.

Goal 10 has 1 objective and 1 policy. The proposed amendment is **NOT RELEVANT** to Goal 10 in general.

REGARDING THE PURPOSE OF THE ZONING ORDINANCE

16. The proposed amendment will **NOT HELP ACHIEVE** the purpose of the Zoning Ordinance as established in Section 2 of the Ordinance for the following reasons:

- A. Paragraph 2.0 (a) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to secure adequate light, pure air, and safety from fire and other dangers.

The proposed amendment is consistent with this purpose.

- B. Paragraph 2.0 (b) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to conserve the value of land, BUILDINGS, and STRUCTURES throughout the COUNTY.

The proposed amendment is consistent with this purpose.

- C. Paragraph 2.0 (c) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to lessen and avoid congestion in the public STREETS.

The proposed amendment is not directly related to this purpose.

- D. Paragraph 2.0 (d) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to lessen and avoid hazards to persons and damage to property resulting from the accumulation of runoff of storm or flood waters.

The proposed amendment is not directly related to this purpose.

- E. Paragraph 2.0 (e) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to promote the public health, safety, comfort, morals, and general welfare.

- (1) The following is a summary of communications received prior to the March 17, 2022 ZBA public hearing for Case 037-AT-22 regarding wind farm regulations which included a proposed WIND FARM TOWER height the same as proposed in this amendment:

- a. In an email received March 16, 2022, Shannon Reel asked for clarification on several questions related to the proposed wind farm ordinance revisions. She expressed concerns about ensuring her entire property, not just her residence, would not be infringed upon by insufficient setback from turbines. She also mentioned noise, lights, vibrations, and ice shed. She would like a setback that is 6 times the total height for non-participatory property lines. She would like a moratorium of 18 months on special use wind farm applications in Champaign County.

- b. In an email received March 16, 2022, Jennifer Eisenmenger said that she is opposed to industrial wind farms. She said wind Farms are invasive to wild places, damaging to animals and humans, and require so much fossil fuel in the manufacturing, transportation, maintenance, and disposal that they actually do little to offset it's usage. She is against unlimited heights on wind turbines, and in favor of significantly increased setbacks from

households. She asked that consideration be given to what happens (as illustrated in Douglas County) when wind farms go out of business, leaving counties and land owners with the health and safety issues that come with deteriorating turbines.

- c. In an email received March 17, 2022, Benjamin Rice said he is opposed to having no height restrictions and also to the setback being measured from his home and not his property line. He said his yard would be unenjoyable due to noise and it could be dangerous for his family.
- d. In an email received March 17, 2022, Heidi Leerkamp said she is opposed to all changes which increase the height allowed for wind turbines or lessen setbacks from non-participating property or dwellings. She said a wind farm project might be considered a win for economic development but would be a long term drain on the health and welfare of our county. She said these projects greatly impact their daily quality of life and enjoyment of their home property. They negatively affect their ability to operate their family farm as well as the values of their home and farm properties. She mentioned negative impacts on area infrastructure and little benefit for local jobs related to the wind farms. She said that both physical and mental health are negatively impacted by living under and around moving structures of an unprecedented size. She expressed concern about decommissioning of the wind turbines. She asked that no more wind projects be approved in our area and no increases be made to the current wind turbine height limits, and no decreases to the turbine setback limits be made.
- e. In an email received March 17, 2022, Justin Leerkamp said that he is against any increase above the current height restriction on wind turbines. He said that further and larger setbacks from property lines, not just occupied dwellings would be welcome, but increases in height will only add to further problems for rural residences, and property values for rural homes. He expressed concern about the decommissioning of wind turbines. He said his biggest objections to increasing height is both noise and shadows from the blades, both during the day and from the lighting systems at night bouncing off the blades. He said he supports the use of new lighting systems that are activated when aircraft are near, but questions how effective this will be when areas southeast of Willard airport are in the ILS path of its runways.
- f. In an email received March 17, 2022, David Happ said he supports adding the ADLS lighting requirements to the ordinance. He said he does not support increases to maximum height of the turbines. He said that Champaign County should change their ordinance to specify a separation distance of 3,250 feet from any residence, and one-half mile from any property line, and he does not think a property owner should be allowed to waive these requirements. He said that increasing the maximum tower height and supporting lower separation distances, is exactly the opposite of what people who have lived near windfarms in the past have asked for.

AS APPROVED

- g. In an email received March 17, 2022, Todd Horton said that there is insufficient concern to remedy shadow flicker in the Zoning Ordinance.
- h. In an email received March 17, 2022, Darrel and Regina Rice said it makes no sense to them to take ground in this part of the country out of production for a wind farm. They don't want to see it, hear it, farm around it, and they don't want it near their homes or on their land. They asked for reasonable height limits on the turbines, and to increase the setbacks beyond what is currently being considered.
- i. In an email received March 17, 2022, Donald Carter expressed concern about health impacts due to insufficient setbacks and noise from the turbines. He is concerned about decreased property values due to wind farms, infrastructure damage and harm to productivity of farm ground where turbines are located, and with ongoing maintenance of turbines as deterioration had been experienced in other nearby windfarms.
- j. In an email received March 17, 2022, Cary and Pam Leerkamp said they have concerns about decreasing property values and asked that the ZBA consider the welfare of county residents.
- k. In an email received March 17, 2022, Traci Bosch had concerns about Carle hospital helicopter safety as they maneuver around turbines. She is concerned about her water supply, noise, rural infrastructure during and after construction of the turbines, and permanent scarring of the soil and roads due to turbine construction. She asked for consideration of rural taxpayers and decreasing property values.
- l. In an email received March 17, 2022, Brandon and Sarah Hastings said they are opposed to having no height restriction on wind turbines. They expressed concern about debris being thrown from turbines, health issues caused by turbines, potential impacts on internet service, reduced property values, damage to fields and drainage tile, and how fee revenues from turbine projects would be used by the County.
- m. In an email received March 17, 2022, Michelle and Scott Wiesbrook said they had concerns about traffic during wind farm construction, having an unlimited height for wind turbines, noise, flicker, vibration, constructing wind farms on productive farmland, and decommissioning the turbines.
- n. In an email received March 17, 2022, Lynn Rice said the proposed unlimited height and short setback restrictions being proposed at tonight's meeting should be denied. She mentioned adverse health and sleep effects due to proximity to wind turbines, and said they should have a maximum height of 500 feet and minimum setback of 1.25 miles from homes.
- o. In an email received March 17, 2022, Josh Kamerer asked what would be done to alleviate any broadband/internet service interruptions as many have school age children who depend on internet access.

-
- p. In an email received March 17, 2022, Steven Herriott said that wind turbines are a blight on our beautiful countryside. He said turbine companies should be held to standards of fixing the roads they destroy.
- q. In an email received March 17, 2022, Tiffany Byrne said she had concerns about health impacts due to proximity to wind turbines. She also mentioned impacts on wildlife and livestock. She asked that the height limit not exceed the current 500 feet and that homes should be at least 1.25 miles away from wind turbines.
- r. In an email received March 17, 2022, Adam Watson said that he is in complete opposition of changing the wind tower height limit to unlimited and changing the setbacks.
- s. In an email received March 17, 2022, Natalie Thomas said she had concerns about noise from the turbines, having sufficient setbacks from the turbines, impacts on area communities, sleep deprivation and other health issues, travel safety and making sure roads are in good repair, decommissioning of wind turbines, impacts on wildlife, and public welfare.
- t. In an email received March 17, 2022, Jan Niccum said that he had concerns about decommissioning, road conditions, financial benefits to local communities from the wind farms, and reducing flicker and hum from the turbines.
- u. In an email received March 17, 2022, Aaron Fenter said he had concerns about unlimited height and insufficient setbacks from wind turbines. He said the zoning department has a responsibility to the many rural residents to not allow anything that would detract from their quality of life, their comfort in their homes or the value of their properties.
- v. In an email received March 17, 2022, Kate Boyer said she opposes wind farms, especially due to concerns with her health and that of her children. She said noise and flickering are major triggers for her seizures and for her children's autistic episodes, and living in the peaceful country has improved their health.
- w. In an email received March 17, 2022, Stephen Smith said he opposes putting a wind farm in the area. He expressed concerns about road conditions, damaged field tiles, the hazard of wind turbines to agricultural air applications of seeds and chemicals, noise, strobe effect/lighting, blade breakage, and traffic increases from turbine construction.
- x. In an email received March 17, 2022, Jennifer Miller, DVM, said she had concerns about the impacts of wind farms on livestock. She said that chronic stress may impact egg laying, rate of gain, milk production, fertility and stereotypies (cribbing and weaving). She said this can impact families raising the livestock. She asked for consideration of setback to property lines and not just to homes, and for noise levels below 39 decibels. She would like the height capped at 500 feet.

AS APPROVED

- (2) The following is a summary of testimony received at the March 17, 2022 ZBA public hearing for Case 037-AT-22 regarding wind farm regulations:
- a. Stephen Smith stated that he is against putting wind farms in and has several concerns: roads being destroyed during wind farm construction and not being repaired after, broken drainage tiles that are not always repaired, the hazard of wind turbines to agricultural air applications of seeds and chemicals, noise, turbine blade breakage, shadow flicker, and ice/snow shed. He said the turbines should be set back farther and setback should be measured from the property line.
 - b. William Boyer spoke on behalf of his mother, Kate Boyer. He said they have health concerns related to the wind turbines. She suffers from temporal lobe epilepsy, and several of her children are on the autism spectrum. One of the main reasons they purchased an isolated country house was to bring relief to their health. Noise and flickering lights are major triggers for both her epileptic seizures and her children's autistic episodes. She said moving to the peaceful country was such an amazing transformation of mental and physical health. She asked that the County not allow wind turbines in the area.
 - c. Dirk Rice said that the setback for non-participating residences should be at least twice that of participating residences. He spoke in favor of the Aircraft Detection Lighting System. He recommended against the proposed setbacks and said the turbines need to be much farther away from residences.
 - d. Sarah Hastings said she opposed the unlimited height restriction. She provided articles, one of which said that a 300-foot wind turbine could throw debris 1,200 feet. She said that another article stated that wind turbines can cause health issues and interfere with radio, TV, satellite and radar signals. She also expressed concern about decreased property values.
 - e. Kirk Allen said he was with Edgar County Watchdogs, expressed concern about property rights, and how the Zoning Act in the Illinois County Code stipulates the “authority to regulate and restrict location and use of structures for the purpose of promoting the public health, safety, morals, comfort, general welfare, conserving the value of property throughout the County.” He suggested that the Board review Zoning Ordinances from Christian County and Edgar County.
 - f. Brian Armstrong, Attorney with the firm of Luetkehans, Brady, Garner & Armstrong, said he was speaking on behalf of numerous people in the audience and some who could not attend the meeting. He expressed concerns about noise, the insufficient setbacks proposed, and how turbine height should have a limit. He provided eight exhibits for the Board. He provided data from noise analyses done by Dr. Paul Schomer, acoustician. He encouraged the Board to adopt a setback of no less than 3,250 feet from a wind turbine. The following is a synopsis of those exhibits:
 - (a) Exhibit 1 was a publication by Health Canada (the department of the Government of Canada responsible for health policy) titled *Wind*

Turbine Noise and Health Study: Summary of Results published 11/6/2014. The study was undertaken in two Canadian provinces, Ontario and Prince Edward Island, and included responses from 1,283 households in the vicinity of 18 wind turbine developments with a total of 399 wind turbines. The study consisted of three primary components which were as follows and with the following results:

- i. An in-person questionnaire to randomly selected participants living at varying distances from wind turbine installations regarding self-reported sleep; self-reported illnesses and chronic diseases; self-reported stress; quality of life indicators; and annoyance. Wind turbine noise exposure was not found to be associated with self-reported sleep quality or with self-reported illnesses or self-reported stress or with any significant change in quality of life. Annoyance towards several wind turbine features (i.e. noise, shadow flicker, blinking lights, vibrations, and visual impacts) were statistically associated with increasing levels of wind turbine noise.
 - ii. Collection of objectively measured outcomes that assessed hair cortisol, blood pressure, and sleep quality. Exposure to wind turbine noise was not observed to be related to hair cortisol concentrations, blood pressure, resting heart rate, or measured sleep.
 - iii. More than 4,000 hours of wind turbine noise measurement that supported the calculation of wind turbine noise at the residences in the study. The 1,283 residences were grouped into different categories of calculated outdoor A-weighted wind turbine noise levels of less than 25 dBA; 25 to <30dBA; 30 to <35dBA; 35 to < 40 dBA; and greater than 40dBA (but an inadequate sample size above 46dBA).
- (b) Exhibit 2 was a January 2017 paper in the journal *Sound & Vibration* titled *Health Effects from Wind Turbine Low Frequency Noise & Infrasound* by authors George Hessler (George Hessler Associates, Inc., Haymarket VA), Geoff Leventhall (consultant, Ashtead, Surrey, UK), Paul Schomer (Schomer and Associates, Inc., Champaign IL), and Bruce Walker (Channel Islands Acoustics, Camarillo, CA). This study by four experts concluded that infrasound (0 to 20 Hz) can almost be ruled as a potential mechanism for stimulating motion sickness symptoms but some additional research was recommended. Pending those results, the four authors recommended that an acceptable A-weighted noise level is all that should be required. In the paper the four authors also share their recommended noise limits for wind farms which are 35 to 39 dBA (Schomer) and 40 dBA (Leventhall and Hessler with Hessler having a 45 dBA maximum) and 45dBA (Walker).

AS APPROVED

- (c) Exhibit 3 was a paper titled *The Results of an Acoustic Testing Program, Cape Bridgewater Wind Farm Prepared for Energy Pacific by Steve Cooper, The Acoustic Group, A Review of this Study and Where it is Leading* by Paul D. Schomer, PhD., P.E.; Schomer and Associates, Inc.; Standards Director, Acoustical Society of America, and George Hessler, Hessler Associates, Inc. The paper is dated 10 February 2015. This paper reviewed a very limited study regarding the perceived effects of noise on three couples who lived between 650 meters and 1600 meters from the Cape Bridgewater wind farm in Australia. The Cape Bridgewater study found that the three couples could sense the operation of wind turbines in the wind farm even when there was no acoustical or visual stimulus from wind turbine operation and their reactions were correlated with the power output of the wind turbines. One of the couples was so affected by the wind farm emissions that they abandoned their home. The Cape Bridgewater study was too limited for the results to be generalized to the population, but the study did demonstrate a cause and effect relation at these locations.
- (d) Exhibit 4 was an excerpt of McLean County Zoning Board of Appeals minutes from 1/24/2018. The excerpt is the questioning of Dr. Schomer by Attorney Luetkehans and members of the Zoning Board of Appeals. The questioning focused on the various wind farm noise limits and the Cape Bridgewater study. Dr. Schomer stated his recommended noise limit for wind farm noise to be 38 to 40 dB.
- (e) Exhibit 5 is a report titled *A Cooperative Measurement Survey and Analysis of Low Frequency and Infrasonic at the Shirley Wind Farm in Brown County, Wisconsin* that was partially funded by the Wisconsin Public Service Commission and by Clean Wisconsin, a nonprofit environmental advocacy organization. Although the study was about the Shirley Wind Farm the results of the study were to be used in a pending wind farm proposed for St. Croix County, WI. The report was issued on 12/24/2012. Four acoustical consulting firms jointly conducted the study. The firms were Channel Islands Acoustics (principal Dr. Bruce Walker); Hessler Associates, Inc. (principals George and David Hessler); Rand Acoustics (principal Robert Rand); and Schomer and Associates, Inc. (principal Dr. Paul Schomer). Each consultant presented their individual findings in a separate Appendix but all agreed that in regards to the Shirley Wind Farm there was "...enough evidence and hypotheses given to classify low frequency noise and infrasound as a serious issue...it should be addressed beyond the present practice of showing that wind turbine levels are magnitudes below the threshold of hearing at low frequencies." Hessler Associates, Inc. recommended a noise limit of 39.5 dBA or less for the proposed St. Croix wind farm. Schomer and Associates recommended additional testing and if that was not possible they recommended a noise limit of 33.5 dBA or

- less for the proposed St. Croix wind farm, based on a 6 dB decrease in noise that the Navy used when dealing with severe noise induced nausea. Neither Channel Islands Acoustic nor Rand Acoustics made recommendations for the proposed St. Croix wind farm.
- (f) Exhibit 6 is an undated report titled *Proposed minimum siting distances for Livingston County Wind Farms* prepared by Schomer and Associates, Inc. The paper is an analysis of separation distances and calculated noise levels from existing wind turbines for the 1,283 dwellings in the Health Canada publication titled *Wind Turbine Noise and Health Study: Summary of Results* published 11/6/2014. The report divides the separations for 745 dwellings in the Health Canada study into nine separation categories from 1,500 feet to 3,750 feet. 493 dwellings in the Health Canada study were located further than 3,750 feet from a turbine and those dwellings are not included in this analysis. The 745 dwellings in this analysis were divided into 6 noise levels from 35 dB(A) to 40 dB(A). The report also included the results of a study by Minnesota Department of Commerce regarding international wind turbine noise limits for residences and the requirements of the American National Standards Institute (ANSI). The report concludes with a recommendation for a noise limit of 38dB(A) and a minimum separation of 3,250 feet.
- (g) Exhibit 7 is a report titled *Alta Farm Wind Project II, LLC, DeWitt County, Illinois, Property Value Impact Analysis: Residential improved and vacant agricultural land properties* by Kurt C. Kielisch of Forensic Appraisal Group of Neenah, Wisconsin, dated February 18, 2019. The report is a summary of a study contracted by DeWitt County Residents Against Wind Turbines group, represented by Atty. Phillip A. Luetkehans, Schirott, Luetkehans & Garner, LLC, Itasca, Illinois, to study the impacts that the proposed Alta Farms Wind Project II, LLC, would have on improved residential and vacant agricultural land values. The report has four parts: a literature study regarding wind farms and land use; a summary of wind farm value impact studies; an analysis of how residential property values are being impacted by a wind farm using paired sales analysis in the Twin Groves II wind farm in McLean, Illinois; and a multiple regression analysis on the impact of agricultural land values being impacted by the Twin Groves II wind farm. The impact studies found little to no evidence of an impact in wind industry and government supported studies, but found a “significant impact” from independent studies using a variety of valuation methods from paired sales analysis to multi-regression analysis. Losses amongst the nine independent studies that were completed between 2007 and 2015 ranged from 7.7% to 50% in value, with distances ranging from adjacent to a wind farm to within 3 miles of a wind farm. The report also indicated that “Agricultural land also is impacted by the presence of a wind farm losing -6.3% to -8.5% of its overall value if located within a wind farm.” For the

AS APPROVED

proposed wind farm, the report concluded that “the presence of wind turbines in close proximity to residential properties and agricultural land will have a negative impact on property value and this impact is permanent. The magnitude of that impact will be dependent on the proximity of the wind turbines to the property, the disruption of the viewshed and disruption of the land use.”

- (h) Exhibit 8 is a PowerPoint presentation authored by Jerry Punch, Ph.D., titled “Wind Turbine Noise: Effects on Human Health” that was given to the Christian County, Illinois Zoning Board of Appeals on June 23, 2020. The presentation covered the following topics:

- Physical nature of wind turbine noise
- Common health effects of wind turbine noise exposure
- Research evidence that wind turbine noise causes adverse health effects
- Methods of limiting wind turbine noise
- Standards and guidelines relevant to wind turbine noise

Recommendations included maximizing setback distance and minimizing noise levels. Dr. Punch provided numerous citations for recommended setback and noise levels, but did not make recommendations himself.

- g. Ted Hartke communicated his personal experience with how turbine noise caused him and his family to move from a perfectly good home in Vermilion County. He recommended that Champaign County adopt a setback of no less than 3,250 feet from a wind turbine based on Dr. Schomer’s noise analyses. He said he supports a 500 foot limit on the turbine height.
- h. Darrell Rice said that it makes no sense to them to take ground in this part of the country out of production for a wind farm; they don't want to see it, hear it, farm around it, have it near their homes or on their land. He asked the Board to place reasonable height limits on turbines and increase the setbacks beyond what is being considered.
- i. Benjamin Rice said that he wants his family to be able to enjoy their entire seven acres of land. He expressed concerns about noise, safety from turbines breaking apart and throwing ice, and the height of the turbines. He asked for consideration of their rights and getting to enjoy peace and quiet in the country.
- j. Brad Shotton asked the Board to give them a voice in order to preserve the properties they have. He would like increased setbacks, a limit on the wind turbine height, and asked the Board not to accept the proposal before them. He expressed concern about noise, vibrations, and shadow flicker.

-
- k. Ed Decker said it would be totally irresponsible to give the wind turbine an unlimited height, and he would like the Board to keep it at the 500 feet height limit. He said he thinks the 3,250 feet has come up several times tonight for the setback, and he thinks that would be a reasonable setback, and he thinks that needs to be from each property line as well as each dwelling. He expressed concern about noise and property values.
- l. Kelly Vetter said that she thinks there is a conflict of interest that the wind company's engineer oversees the decommissioning estimates for the existing wind farm. She asked that Champaign County do what other counties have done, which is to make ordinances that prevent a wind farm from even coming in.
- m. Todd Horton said that he is really concerned that an incompatible land use would be something, that creates flickering lights coming through the windows of their homes. He said when it comes to shadow flicker, there is no standard for what an acceptable reduction of shadow flicker is, but they don't have anything in the current Zoning Ordinance that says anything is enforceable, other than the wind farm project developer provides a shadow flicker study, but it doesn't say the wind farm project developer has to follow the study. He said that he hopes the wind turbines are not allowed to be taller.
- n. Don Carter said that there is a company, NextEra Energy, that is planning a wind farm on 50,000 acres south of Philo, Sidney and Homer. He said the Board members are the residents' champions; the Board is the one that stands between the residents and people that many of the residents feel would ill-use that land out there. He asked the Board to take up their case, take up their cause by passing responsible aspects of this ordinance that is before them.
- o. Charlie Mitsdarfer said he is really worried about the height, and even more concerned about the setbacks. He said these are an eyesore, and he is worried about property values and mitigating existing land problems caused by wind farm construction. He said roads are in poor shape and there are broken field tiles, and the land will never be what it was before that construction. He said he has heard of issues with well water. He questioned the unlimited height proposed, and asked for a one-mile setback from turbines.
- p. Justin Leerkamp said he farms in the Douglas County area adjacent to many of these windmills, and he feels that the setback multiplier is not large enough having worked under these 600 foot towers. He said if we do use a multiplier, to increase the height, it should not be linear, it should be exponential as the height increases. He said the purpose of that would be to reduce the shadow flicker. He said he really doesn't feel that the height increase is warranted at this time; he feels that the 500 foot limit has worked for this county. He said he is in favor of lighting mitigation.

AS APPROVED

- q. William Mitsdarfer said he hears people complain about the railroad a lot, or living next to a grain elevator. He said he understands that it's probably noisy and dirty or whatever, but that elevator or railroad were there before the house was or the town, so people knew that when they moved there. He said their homes are there now and there's no windmills. He saw no good in having windmills.
 - r. Traci Bosch said she is just 3-3/4 miles from the Douglas County windmills. She said they sound like a constant blowtorch, and urged the Board to drive out to a windmill and listen before making any decisions. She said that the Board should talk to residents of northern Champaign County about what it is like when a turbine blows apart. She expressed concerns about road conditions, property values, and impacts on school and fire station revenues.
 - s. Daniel Herriott asked the Board to consider Dekalb County's wind farm ordinance, which has a setback that is six times the turbine height and allows zero flicker on non-participating neighbors. He said the height limit should be kept at 500 feet.
- (3) The following is a summary of communications received between March 18 and April 1, 2022 for Case 037-AT-22 regarding wind farm regulations:
- a. In an email received March 18, 2022, Mick & Mary Schumacher said they had concerns about the height of the towers, designed setbacks, and setbacks from neighboring property owners.
 - b. In an email received March 29, 2022, Ted Hartke provided citations supporting a 39 dBA maximum noise limit because 40 dBA begins adverse health impacts.
 - c. In an email received March 29, 2022, Don Carter stated he is opposed to the proposed changes in turbine heights and setbacks. He would like to maintain the current 500 foot height limitation in the ordinance, and increase the setback to the property line of non-participating land owners to 3,250 feet. He agrees with the adoption of county-level AIMA standards and adding aircraft detection lighting systems for wind turbines. He agrees with the proposed increase in turbine fees, and thinks the fee should be even higher.
 - d. In an email received March 29, 2022, Michael Mooney is opposed to having more wind farms in the county. He expressed concerns about damage to field tiles and ruined roads due to wind farm construction.
 - e. In an email received March 29, 2022, Gary Place expressed concerns about wind farms effects on safety and quality of life. He would like to keep the current 500 foot height limit, would like to have a 3,250 foot setback to non-participating landowners' property lines, and have a noise limit of 38 dBA.

-
- f. In an email received March 30, 2022, Shannon Reel expressed concerns about noise, sleep deprivation, loss of home value, and flicker from the wind turbines. She is against removing the 500 foot height restriction and in favor of setback to a non-participating property line of 6 times the height of a turbine.
- g. In a second email received March 30, 2022, Shannon Reel expressed concerns about roads not getting repaired and the County not having enough money to repair the roads once wind farm construction has occurred. She urged the County to deny the proposed changes.
- h. In an email received March 30, 2022, Drs. Andrew & Jennifer Miller stated they are opposed to changing the setbacks and the height of wind turbines. They feel the setback from property lines should be 3,250 feet and the height of turbines limited to 500 feet.
- i. In an email received March 30, 2022, Darrel Rice expressed concern about water quality related to bedrock damage caused by wind turbine installation and underground vibrations from turbines. He also mentioned concerns about shadow flicker, effects on bats and honeybees, adverse health impacts of wind turbines. He asked that the 500 foot height limit be maintained and that the setback requirements be extended to the property lines and be extended in distance.
- j. In an email received March 31, 2022, Justin Leerkamp said he does not support an unlimited height for turbines. He thinks setbacks should increase in distance and also be measured from property lines, not residences. He supports the adoption of the Agricultural Impact Mitigation Agreement and suggested that the proposed fee increases be increased even more. He said he supports the adoption of the ADLS lighting system.
- k. In an email received March 31, 2022, Todd and Sharon Herbert said they would like the 500 foot wind turbine height maintained, and the setback to be increased to 3,250 feet from the neighboring property lines. They are also in favor of the aircraft detection system. They expressed concerns about broken drainage tiles and roads caused by wind farm construction.
- l. In an email received March 31, 2022, Michelle and Scott Wiesbrook asked to maintain the current wind turbine height limit at 500 feet. She supports the adoption of the county-level Agricultural Impact Mitigation Agreement and aircraft lighting detection systems. She thinks the fees should be increased even higher than what is currently proposed. She expressed concern about groundwater quality.
- m. In an email received March 31, 2022, David Happ said he supports the Right to Farm Resolution. He does not support changing the maximum allowable wind turbine height of 500 feet. He does not think that the minimum required separation should be a factor of tower height; it should be 3,250 feet. He said he supports aircraft lighting detection systems and

AS APPROVED

Agricultural Impact Mitigation Agreements. He supports the proposed fee increase.

- n. In an email received March 31, 2022, Tiffany Byrne said that she supports a setback of 6,600 feet from non-participating dwellings. She said that the height limit should remain unchanged.
 - o. In an email received March 31, 2022, Brandon and Sarah Hastings asked that the height limit for wind turbines be kept at 500 feet. They expressed concern about groundwater quality, ice throw, noise, and flicker. They support aircraft lighting detection systems and Agricultural Impact Mitigation Agreements. They support the proposed increase in fees and think they could be even higher.
 - p. In an email received March 31, 2022, Traci Bosch expressed concern about safety of pilots who spray crops and fly emergency helicopters in wind turbine areas.
 - q. In an email received March 31, 2022, Stephen Smith asked that height of turbines be limited to 200 feet. He supports an increase in the setback to the non-participating landowners' property lines. He expressed concern about shadow flicker.
 - r. In an email received March 31, 2022, Doug Downs said he opposes changing the height limitation. He would like to see the setback increased to 3,250 feet.
 - s. In an email received March 31, 2022, Kris Petersen described flying conditions and the dangers wind turbines impose on their aerial application service. He said allowing the turbines to be taller will make their jobs more dangerous and less efficient. He said he had concerns about the aircraft lighting detection systems and how they might impact pilot safety.
 - t. In an email received March 31, 2022, Mike Lockwood expressed concern about possibly being surrounded by wind turbines, light pollution, and impacts on his quality of life. He favors longer setbacks than those proposed, and favors keeping the current 500 foot height limitation.
 - u. In an email received April 1, 2022, Heidi Leerkamp asked that the ZBA abandon the proposed changes to special use permits for industrial wind energy complexes. She asked that wildlife and best prime farmland be more thoroughly studied before allowing any more wind turbines in the County.
- (4) The following is a summary of testimony received at the March 31, 2022 ZBA public hearing for Case 037-AT-22 regarding wind farm regulations:
- a. Jed Gerdes stated he is opposed to having wind farms in Champaign County, and that our area's prime farmland should be protected from that kind of development. He said he supports a 1.25 to 1.5 mile setback. He

-
- expressed concern about broken drainage tiles, noise, and decreased property values.
- b. Michael Mooney said that he does not think it prudent to put wind farms on prime farmland. He expressed concern about broken drainage tiles and bad roads caused by wind farm construction.
 - c. Kelly Vetter offered to put together a citizen's taskforce to assist the County Board with their decision making regarding wind turbines.
 - d. Dennis Riggs said that the 500 foot height limit should be maintained, and a setback of at least 3,250 feet from property lines should be established to protect against the problem of unsightliness, noise, air pressure fluctuations, and light flicker. He expressed concerns for broken drainage tiles and bad roads, and supports strong Agricultural Impact Mitigation Agreements and decommissioning agreements.
 - e. David Reel asked for a moratorium on any new wind turbines for at least 18 months in order to ensure that any revisions to the wind ordinance are not hastily done without due diligence as to what is in the best interest of the county. He said he does not feel the current setback requirements are sufficient.
 - f. Kris Petersen said he is a pilot and expressed concerns for pilot safety in wind farms and more so if taller turbines are allowed.
 - g. Roger Negangard expressed concerns about decommissioning and letting the wind companies keep anything in the ground below 46 inches; he thinks they should remove all they put into the ground. He said there needs to be a longer setback and that the height of the turbines needs to be limited.
 - h. Jennifer Eisenmenger said she is very concerned about the environment. She asked what would happen to mitigation plans when wind farms go out of business.
 - i. Heidi Leerkamp asked that the ZBA abandon the proposed changes to special use permits for industrial wind energy complexes. She asked that wildlife and best prime farmland be more thoroughly studied before allowing any more wind turbines in the County.
 - j. Brian Schluter said he is the Compromise Township Road Commissioner. He expressed concern about sufficient setbacks and height, and he does not favor a blanket ordinance.
 - k. Aaron Fenter said that height limitations should be reviewed periodically rather than allowing an unlimited height. He believes that property values will decrease for residences in a wind farm area. He believes that Champaign County should look at Livingston County's ordinance as an example if they are going to change the current requirements.

AS APPROVED

- l. Adam Watson said he believes changing to an unlimited height would be irresponsible. He said that he feels their county should be the most concerned about the health and safety of its residents. He said he is in agreement with needing to use aircraft detection lighting systems.
 - m. Stephen Smith said he would like to recommend would be keeping these windmills under 200 feet if they do put them in the area, which would reduce harmful, environmental, and aesthetic impact, and it would also keep from the shadow flicker occurring.
 - n. Dirk Rice said that as he looks at the proposal for these changes in the regulation and there is no science behind it. He expressed concern for property values, setback and height requirements.
 - o. Charlie Mitsdarfer said that he has a couple concerns with the Agriculture Impact Mitigation Agreement, and he agrees that it is important, but he has a lot of reservations about how it is going to get enforced. He expressed concerns about returning the soil to its prior condition once wind turbines are removed. He also was concerned about drainage and about crop productivity if the wind turbines affect his ability to spray, and about declining property values due to wind turbines.
 - p. Justin Leerkamp said he generally supports the Agricultural Impact Mitigation Agreement, but was concerned about its ability to be enforced. He suggested increasing the fees even more and to use part of those fees to enforce the AIMA. He expressed concern for having enough money in the escrow for decommissioning wind turbines. He said that he doesn't support an increase in height, and he doesn't feel their current setbacks are large enough. He said he would like to see more studies on property values.
 - q. Darrell Rice asked the Board to give them the best possible restrictions to ensure their lives are the most pleasant they could have living within a wind farm footprint, including lower height limits and larger setbacks. He expressed concern for shadow flicker, road conditions and drainage related to construction of wind turbines.
 - r. Ted Hartke began a presentation, but due to time limits, he agreed to do his presentation at the next meeting on April 14th.
- (5) The following is a summary of communications received between April 2, 2022 and April 14, 2022 for Case 037-AT-22 regarding wind farm regulations:
- a. In an email received April 12, 2022, Kim Decker provided a list of some locations, sources, or reports that have or are recommending more than one mile setbacks from wind turbines.
 - b. In an email received April 14, 2022, Matthew Herriott said he was opposed to wind turbine height limits above 500 feet. He said the proposed setback is insufficient to protect the safety and wellbeing of residents. He suggested using Livingston County's ordinance as an example. He said he supported

the aircraft lighting detection system, but wondered how well it would work due to the airport. He suggested that the proposed fee increase could be higher and could be used to ensure complaints are addressed. He said he supports the Agricultural Impact Mitigation Agreement if the guidelines are enforced.

- (6) The following is a summary of testimony received at the April 14, 2022 ZBA public hearing for Case 037-AT-22 regarding wind farm regulations:
- a. Ted Hartke said the ICPB noise limits don't address health issues, only annoyance. He said Dr. Schomer, who helped make these standards, said the ICPB noise levels do not protect health and he said the maximum noise limit from wind turbines should be 39 dB or less. Mr. Hartke gave a presentation citing various sources and testified about his family's negative experience with noise from wind turbines that forced them out of their home. He said that if the Board put the setback at 3,250 feet away and the wind company would want to make the setback at 2,500 or 3,000 feet away, this would put the citizens who live in the wind farm in control, and they would get to decide if they would want to sign off on noise, shadow flicker, and property value loss – the citizens could negotiate that themselves.

Regarding turbine height limits, Mr. Hartke said the taller wind turbines have a longer blade and the blade would flex more causing the low frequency increase along with the thumping and pulsation noise, which is going to be more disturbing.

- b. Margie Kolter recommended that people go out to a wind farm area and listen to the noise and feel the vibration that turbines cause. She expressed concern about decommissioning costs and the possibility that the wind companies will go bankrupt and leave the equipment behind. She said that the wind farms are taking prime farm ground and putting concrete in, affecting the drainage, and then they are affecting these peoples' lives.
- c. Phil Luetkehans stressed the importance of having sufficient setbacks to protect the health, safety, and welfare of residents and their property values. He said that he thinks anywhere in that setback range of 3,000 feet to 3,250 feet they would probably give a significant protection to residents. He spoke of the probable decrease in property values attributable to proximity to wind turbines. He made a few recommendations for changing the County wind farm ordinance to better protect the County and its residents.
- d. Steve Littlefield, a real estate agent, provided five examples of property values for lots that had sold between 2012 and the present in the California Ridge wind farm area. His overall takeaway was that property values are negatively impacted by proximity to wind turbines.
- e. Kim Decker said that she would like to have a longer setback, and that the setback should be measured between the turbine and the property line, not to the residence. She provided a list of several dozen setbacks that have been adopted in the US and abroad. She said she is asking the Board to do

AS APPROVED

the responsible thing and in her opinion that is to vote down the proposition they have before them and hopefully revamp this whole process of setbacks and wind height.

- f. Matthew Herriott said he is opposed to a tower height taller than 500 feet and suggested that Champaign County take a closer look at Livingston County's ordinance for height and setback. He expressed support for the ALDS lighting, but questioned how often the lights would actually be off given airport traffic. He suggested that the fee increase should be even higher, and that the higher amount be used in part to have an enforcement officer dealing with complaints about wind and solar farms. He said he supports the Agricultural Impact Mitigation Agreement if it is correctly enforced. He recommended that the Champaign County Zoning Board deny the current proposed changes to the ordinance regarding turbine height and setback distance.
 - g. Brandon Hastings said the height restriction should stay at 500 feet, setbacks should be 3,250 feet or six times the height, whichever is greater to match Livingston County regulations, but it should measure setback from the property line rather than from the residence. He said he thinks the zoning should eliminate the chance of shadow flicker for non-participating parcels. He expressed concern about how big an issue drainage is, and that the Agricultural Impact Mitigation Agreement should include that. He said that fees should be huge, and escrow accounts should be established not only for decommissioning, but for drainage issues and road repair.
 - h. Kelly Vetter urged the Board to consider the possibilities of the unintended consequence as related to protecting water resources from wind farm development.
 - i. Steven Herriott said he thinks the height needs to be maintained at 500 feet. He said he feels that sometimes we are doing things to encourage or bend over backwards to help these wind companies, and he doesn't think it is our responsibility to encourage them to come but to let them conform to what we need out there in the country. He said if by chance the turbines get higher, we need to go with six times the height in setback, and measure from the property line and not the residence.
- (7) The following is a summary of communications received between April 15, 2022 and May 26, 2022 for Case 037-AT-22 regarding wind farm regulations:
- a. In an email received May 2, 2022, Ted Hartke provided four documents that he asked to be distributed to the ZBA and ELUC members. The documents were distributed and added to the Documents of Record.
 - b. At the May 5, 2022 ELUC meeting, Mary King distributed three handouts, which have been distributed to the ZBA and added to the Documents of Record.

-
- c. In an email received May 26, 2022, Mike Lockwood said he favored significantly increased setback distances. He said he was opposed to increasing the allowed height of wind turbines. He asked for more power for homeowners in the approval process and less power for those landowners who do not live in the area.
- (8) The following is a summary of testimony received at the May 26, 2022 ZBA public hearing for Case 037-AT-22 regarding wind farm regulations:
- a. Stephen R. Smith read a statement on behalf of his neighbor, Kelly Vetter, who said it is time to slow down the current monstrosities of wind turbines trying to come into their backyard and think this through. She supported taking a legacy view that fits the landscape, their values, and generations to come. Mr. Smith said he supports a minimum separation of 3,250 feet from the property line and keeping the 500 foot maximum height for wind turbines.
- b. Randy Wells shared his experience with the Douglas County windmills that are as close as .75 mile from his home. He talked about construction issues and bad road conditions due to the wind turbine development. He is concerned that money will not be there for decommissioning when the time comes. While he has not experienced adverse health impacts, he has experienced the noise and flashing lights from the turbines.
- c. Lisa Ellis said she is an Edgar County Board member, and offered advice about revising the wind ordinance. She said that Edgar County adopted a 3,250 foot setback to the structure, but the wind company can negotiate with individual landowners to have a reduced separation that cannot be less than 1,000 feet. She said the ordinance should consider local roads, drainage tile, and emergency services. She said Edgar County does not have a height restriction on wind turbines. She said she lives about 25 miles from the nearest turbine, and can hear it and see it from her home.
- d. Ted Hartke reviewed the four documents he submitted that were distributed as part of Supplemental Memo #2 dated May 17, 2022. He referred to testimony by Dr. Schomer that a limit of 39 dba is needed to mitigate adverse health effects. He said that Dr. Schomer testified that taller turbines will cause more infrasound, and that turbines are louder at night than during the day, with a difference of 3 to 6 dba. He testified about his own story of having to leave his home due to the wind turbines built near his home. He summarized by saying he supports a noise level of less than 39 dba, supports setbacks at 3,250 feet or 6.5 times the blade tip height, supports waivers for setbacks for individual landowners, and wants more consideration for infrasound.
- e. Roger Henning Jr said that he supports a setback of 3,250 feet. He has bought property for future development by family members, and wants them to be able to build on any part of the property, so he supports the setback being to the property line and not the structure.

AS APPROVED

- f. Todd Herbert supports maintaining a less than 500 foot height maximum, and supports a setback of 3250 feet or 6 times the height measured from the property line. He thinks it is a bad decision to allow individual waivers to allow a setback of 1,000 feet. He agrees that a setback of 1.25 miles would be best. He supports the aircraft lighting detection system. He expressed concern about drainage tile and supports a setback from the very fragile Drainage District tiles. He said there would be no farming if there was no tile.
- (9) Text Amendment Case 075-AT-22 had been authorized by ELUC on October 6, 2022 but the text amendment was withdrawn upon the passage of Public Act 102-1123. Case 075-AT-22 was proposed to do the following:
- A. Revise Section 6.1.4 C.2. to increase the minimum required separation to a participating principal structure to 1,600 feet and 2,000 feet for a non-participating principal structure.
- B. Revise Section 6.1.4 D.5. to increase the maximum allowed wind turbine tower height to 600 feet.
- C. Revise Section 6.1.4 I. to lower the Allowable Noise Level to 45 dB(A) and to require a wind farm owner to pay for an independent post-construction noise study to demonstrate compliance with the allowable noise level.
- D. Revise Section 9.3.3 B.(6) to add a fee to pay for the post-construction noise study.
- (10) The following is a summary of testimony received at the March 30, 2023 ZBA public hearing for Case 086-AT-23 regarding changes to the Zoning Ordinance prompted by Public Act 102-1123:
- a. Darrel Rice expressed his appreciation to the Board for listening to the people of the county over the last year or so. He asked if it is true still if a wind farm comes to Champaign County, they still have to get a Special Use Permit and there is still an opportunity for public testimony on each project. He asked if this Board had any power over the Agricultural Impact Mitigation Agreement on what the Board's requirements would be for drainage and if the Board could still require an open trench for the wiring, so that it can be inspected for drainage tile breakage before it is covered up with dirt. He said it makes a huge difference, because it allows them to see the problems before the drainage tiles are covered up with dirt and they can address them as construction is going on. He said some of these problems can show up years later and they wouldn't know the problem is there until everybody is done and gone.
- b. Ted Hartke said he doesn't think there was a single thing listed in the solar portion where it talks about solar panel distances to homes. He thinks the County probably wouldn't get much push back or lawsuits like they are afraid of, if the Board simply said that all the noise making inverters have a setback of 800 feet away, the solar farms could put the solar panels as close as they want, but the inverters that make noise have a setback of 800 feet away. He said if something is unconstitutional, whether it be another law,

dumb rule, or unfunded mandate, if they thought it was the job of a board to refuse to go along with something that is unconstitutional and, in this case, it is unconstitutional for taking of land without compensation. He said what is happening is, they are getting an unpaid for free easement given to a private wind company to make money on land that they don't own, rent, or compensate; it is a giveaway. He said the State of Illinois has stepped in and become the middleman to take that away from a person who just wants to live and be left alone on their own land. Regarding the Illinois Pollution Control Board noise level standards, that is why the State of Illinois is pushing that level upon us. He said that the only living person alive today that helped establish those octave band limits is Dr. Paul Schomer, he said that those noise levels are not suitable for wind turbines. He said if those levels are not suitable for wind turbines, he believes that is an excellent defense when a wind developer, the State of Illinois, or whoever it is that is going to come and file a lawsuit against them. He said when they show up and file the lawsuit, exhibit one should be Dr. Schomer's presentation to Boone County, Illinois from 2012 or 2013, he doesn't remember when, and in that testimony, it says that the Illinois Pollution Control Board noise level limits are not intended for wind turbines; therefore, that is a great defense and they could show to the judge in court that those are not appropriate noise level limits. Mr. Hartke said the next thing about the Illinois Pollution Control Board noise level limit rules is that those noise levels are supposed to be at the property line.

- c. Roger Henning Jr., stated that he had heard the comment earlier at tonight's meeting about notifying people within a 250 feet range for upcoming cases. He asked if people wanted to get that distance enlarged, then who would they need to go to, because he has a piece of property within 600 feet from where they threw a solar farm on it and was never told about the solar farm. He said the person next to his piece of property didn't know about it, because there is another piece of property in between that. He asked how somebody who lives within the setbacks of that same section could get notified.
- d. Justin Leerkamp said it is taking away rights of the County, the individual, and it's not right. He feels like they were on the right track in this county three or four months ago, they had made progress and had a bunch of public hearing meetings. He said this move by the State has taken the wind out of those sails, but he doesn't think they need to forget the points that were made and the direction they were going, because things may change at the State, then if they adopted this law as their standards, then the State changes politically or gets enough feedback from constituents to where they make some changes. He said depending on what the State does with any amendments to this, then are they were stuck with the less stringent standards at that point. He would hate to rush in adopt this very lenient minimum separation requirement and have that become the new Champaign County Zoning Ordinance, then the State does something else six months to a year down the road, then they are stuck with something that nobody in the room really wanted.

AS APPROVED

- e. Jan Carter-Niccum, Village Board of Savoy, stated that the first response to the question about the 250 feet range is the 250 feet range for notifying adjacent residents of a proposed Special Use Permit is less than half the height of one wind turbine, so that gives them an idea about how far they are talking about. He asked what kind of restrictions this new law will have on the University of Illinois or will there be no restrictions for them.
- (11) The following is a summary of testimony received at the May 11, 2023 ZBA public hearing for Case 086-AT-23 regarding changes to the Zoning Ordinance prompted by Public Act 102-1123:
- a. Justin Leerkamp suggested that the testimony from Case 037-AT-22 regarding wind farm ordinance requirements should be included in the Finding of Fact for Case 086-AT-23.
- b. Roger Henning asked if it is up to the County to police the State's requirements. He asked who would pay for the noise study.
- c. Darrel Rice is a Drainage District commissioner and said that drainage is so important. He would like the Agriculture Impact Mitigation Agreement to require an open trench inspection of drainage tile during construction of a solar or wind farm. He said that damaged tile can affect crops.
- d. Ted Hartke spoke about the detrimental impacts of wind turbines being too close to his home, which forced his family to vacate the home. Repeated complaints about sleep disturbance were to no avail. He referred to noise levels that were below Illinois Pollution Control Board requirements yet were detrimental to his family. He questioned noise impact studies that were done around his home and had supporting evidence to show that the noise study was not done correctly, to his family's disadvantage.
- e. Todd Herbert said the Illinois Drainage District Association would be a good contact to get language to use in the ordinance.
- f. Josh Kamerer asked how the County would recoup its expenses for noise studies it might have to undertake.
- (12) The following is a summary of testimony received at the May 25, 2023 ZBA public hearing for Case 086-AT-23 regarding changes to the Zoning Ordinance prompted by Public Act 102-1123:
- a. Darrel Rice supported the proposed revision regarding open trench inspections for drainage district tile. He advocated for requiring open trenching to install wind farm cables rather than plowing or knifing them in.
- F. Paragraph 2.0 (f) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to regulate and limit the height and bulk of BUILDINGS and STRUCTURES hereafter to be erected.

The proposed amendment is consistent with this purpose.

- G. Paragraph 2.0 (g) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to establish, regulate, and limit the building or setback lines on or along any street, trafficway, drive or parkway.

The proposed amendment is not directly related to this purpose.

- H. Paragraph 2.0 (h) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to regulate and limit the intensity of the use of LOT areas, and regulating and determining the area of open spaces within and surrounding BUILDINGS and STRUCTURES.

The proposed amendment is not directly related to this purpose.

- I. Paragraph 2.0 (i) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to classify, regulate, and restrict the location of trades and industries and the location of BUILDINGS, STRUCTURES, and land designed for specified industrial, residential, and other land USES.

The proposed amendment is consistent with this purpose.

- J. Paragraph 2.0 (j) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to divide the entire County into DISTRICTS of such number, shape, area, and such different classes according to the USE of land, BUILDINGS, and STRUCTURES, intensity of the USE of LOT area, area of open spaces, and other classification as may be deemed best suited to carry out the purpose of the ordinance.

The proposed amendment is not directly related to this purpose.

- K. Paragraph 2.0 (k) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to fix regulations and standards to which BUILDINGS, STRUCTURES, or USES therein shall conform.

The proposed amendment is consistent with this purpose.

- L. Paragraph 2.0 (l) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to prohibit USES, BUILDINGS, or STRUCTURES incompatible with the character of such DISTRICTS.

The proposed amendment is consistent with this purpose.

- M. Paragraph 2.0 (m) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to prevent additions to and alteration or remodeling of existing BUILDINGS, STRUCTURES, or USES in such a way as to avoid the restrictions and limitations lawfully imposed under this ordinance.

The proposed amendment is not directly related to this purpose.

AS APPROVED

- N. Paragraph 2.0 (n) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to protect the most productive agricultural lands from haphazard and unplanned intrusions of urban USES.

The proposed amendment is consistent with this purpose.

- O. Paragraph 2.0 (o) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to protect natural features such as forested areas and watercourses.

The proposed amendment is not directly related to this purpose.

- P. Paragraph 2.0 (p) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to encourage the compact development of urban areas to minimize the cost of development of public utilities and public transportation facilities.

The proposed amendment is not directly related to this purpose.

- Q. Paragraph 2.0 (q) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to encourage the preservation of agricultural belts surrounding urban areas, to retain the agricultural nature of the County, and the individual character of existing communities.

The proposed amendment is consistent with this purpose.

- R. Paragraph 2.0 (r) of the Ordinance states that one purpose of the zoning regulations and standards that have been adopted and established is to provide for the safe and efficient development of renewable energy sources in those parts of the COUNTY that are most suited to their development.

The proposed amendment is consistent with this purpose.

17. The proposed text amendment **WILL NOT** improve the text of the Zoning Ordinance because it **WILL NOT** provide:

- A. A classification which allows PV SOLAR FARMS and WIND FARMS to be developed while protecting the public health, safety, comfort and general welfare.

18. For Case 037-AT-22 regarding wind farm ordinance changes, the Zoning Board of Appeals added findings to the Findings of Fact that are relevant to Case 086-AT-23:

- A. The ZBA is convinced that the existing minimum required separation to a principal structure is inadequate and should be increased to at least 3,250 feet from property lines.
- B. The ZBA is convinced that the existing Illinois Pollution Control Board noise limit is inadequate and a noise limit of 39 dBA (audible) at the property line would better protect Champaign County residents.

19. For Case 037-AT-22 regarding the proposed change to maximum WIND FARM TOWER HEIGHT the Zoning Board of Appeals added findings to the Findings of Fact that are relevant to Case 086-AT-23:
- A. Regarding the existing Zoning Ordinance maximum WIND FARM TOWER HEIGHT:
- (1) Existing Zoning Ordinance Section 6.1.4D.5. limits maximum WIND FARM TOWER HEIGHT to less than 500 feet and was adopted in Ordinance No. 848 (Zoning Case 634-AT-08 Part A) on May 21, 2009.
 - (2) Existing Zoning Ordinance Section 6.1.4D.1.b. requires each Zoning Use Permit Application for a WIND FARM TOWER to include a certification by an Illinois Professional Engineer or Illinois Licensed Structural Engineer that the foundation and tower design of the WIND FARM TOWER is within accepted professional standards given local soil and climate conditions.
- B. The California Ridge Wind Farm was approved by the Champaign County Board on 11/17/2011 with a hub height of 100 meters (328 feet) and a rotor diameter of 100 feet meters (328 feet) for an overall WIND FARM TOWER HEIGHT of 492 feet.
- C. The Sapphire Sky Wind Farm was approved by the McLean County Board on July 14, 2021 with a with a hub height of 105 meters (344.4 feet) and a rotor diameter of 150 meters (492 feet) for an overall WIND FARM TOWER HEIGHT of 591 feet. The Harvest Ridge Wind Farm recently approved in Douglas County has a similar height.
- D. The National Renewable Energy Laboratory (NREL) Technical Report NREL/TP-5000-73629 titled Increasing Wind Turbine Tower Heights: Opportunities and Challenges dated May 2019 reviewed opportunities, challenges, and potential associated with increasing wind turbine tower heights focused on land-based wind energy and concluded the following:
- (1) Wind resource quality (wind speed) improves significantly with height above ground. Over large portions of the country, annual average wind speed doubles and sometimes triples when moving from 80-meter hub heights to 160-meter hub heights. Hub height is the mid-point of the rotor (blades).
 - (2) Wind speed differences translate to sizable capacity factor (actual power output divided by optimal power output) improvements.
 - (3) Higher hub heights (110 meter to 140 meter) are often preferred in more moderate wind speed regions. Champaign County is generally considered a moderate wind speed region.
 - (4) The highest nameplate capacity turbine considered in the study (4.5 megawatts) has a greater preference for 140-meter hub heights than similar 3-megawatt class turbines.
 - (5) The “business-as-usual” (BAU) turbine considered in the study is expected to be the average turbine installed around the United States by 2030. The BAU turbine has a nameplate capacity of 3.3 megawatts and a rotor diameter of 156 meters and was considered at the hub heights of 110 meters with an overall WIND FARM TOWER HEIGHT of 617 feet; a hub height of 140 meters with an overall WIND

AS APPROVED

FARM TOWER HEIGHT of 715 feet; and a hub height of 160 meters with an overall WIND FARM TOWER HEIGHT of 781 feet.

- (6) The analysis found diminishing returns from hub height increases to 140 meter and subsequently to 160 meters.
 - (7) The report notes that the analysis was limited to hub heights of 80 meters, 110 meters, 140 meters, and 160 meters but in many cases the real-world preferred tower heights will likely fall between those points.
 - (8) To realize taller wind turbine towers, an array of potential concepts remains in play relying on various materials spanning from rolled tubular steel, concrete, lattice steel, and hybrid designs.
- E. Based on current practice in nearby counties and on the National Renewable Energy Laboratory (NREL) Technical Report NREL/TP-5000-73629 titled Increasing Wind Turbine Tower Heights: Opportunities and Challenges, the following seems clear:
- (1) Any new wind farm proposed in Champaign County in the next decade will likely have an overall WIND FARM TOWER HEIGHT between 591 feet (the same as the Sapphire Sky and Harvest Ridge wind farms) and 715 feet (assuming a rotor diameter of 156 meters and a hub height of not more than 140 meters).
 - (2) A height of 715 feet is achievable based on the typical limit of 4.3 meters width for tower base diameter (based on transportation requirements) and using conventional tubular steel tower technology.
 - (3) Adopting a maximum WIND FARM TOWER HEIGHT of less than 715 feet at this time would result in an artificial limit on WIND FARM development in Champaign County.
- F. If the proposed no maximum WIND FARM TOWER HEIGHT is adopted, Champaign County would not be the only Illinois county to not have a maximum WIND FARM TOWER HEIGHT. At least six other Illinois counties (Boone, Fulton, LaSalle, Peoria, Woodford, and Vermilion) have no specific height limit for wind farm towers and Logan County limits wind farm tower height to 750 feet.
- G. Adopting a no maximum WIND FARM TOWER HEIGHT is the same as the current Zoning Ordinance approach to tower height in general, in which there is no maximum tower height but any tower height over 100 feet must be approved by the Zoning Board of Appeals in a special use permit, the same kind of approval required for a WIND FARM.
- H. Existing Zoning Ordinance Section 6.1.4D.1.b. requires each Zoning Use Permit Application for a WIND FARM TOWER to include a certification by an Illinois Professional Engineer or Illinois Licensed Structural Engineer that the foundation and tower design of the WIND FARM TOWER is within accepted professional standards given local soil and climate conditions. Safety of wind farm towers will always be an issue and will always be certified regardless of WIND FARM TOWER HEIGHT.

-
- I. WIND FARM TOWER HEIGHT is not related directly to noise and Zoning Ordinance Section 6.1.4I. has limits for the allowable noise level from a WIND FARM. Adopting a no maximum WIND FARM TOWER HEIGHT will have no impact on the allowable WIND FARM noise level.
- J. WIND FARM TOWER HEIGHT is directly related to shadow flicker and Zoning Ordinance Section 6.1.4M. has limits for the allowable shadow flicker. Adopting a no maximum WIND FARM TOWER HEIGHT will result in shadow flicker being controlled the same as it is today.
- K. Existing Zoning Ordinance Section 6.1.4H includes standard conditions to mitigate electromagnetic interference, including consultation with applicable microwave transmission providers and local emergency service providers.
- L. Existing Zoning Ordinance Sections 6.1.4J. and L. includes standard conditions for endangered species consultation and acceptable wildlife impacts, including consultation with the Illinois Department of Natural Resources and other qualified professionals such as ornithologists and wildlife biologists.
- M. Regarding radar detection of severe weather events including tornadoes, Champaign County is far enough from the NWS doppler radar at Lincoln, Illinois that there will be no interference from wind turbines. The Lincoln weather station is approximately 50 miles (80 km) from the western Champaign County line.
- (1) The NOAA National Weather Service Radar Operations Center (ROC) has acknowledged that radar interference has occurred due to wind turbines and has created an online resource titled “How the ROC Analyses Wind Turbine Siting Proposals” that outlines how ROC does a case-by-case analysis of proposed wind farm developments. “The ROC has developed a four zone scheme that takes terrain, distance, and the number of elevation angles impacted into account: no build, mitigation, consultation, and notification.”
- a. The No Build Zone is a four kilometer radius around the radar station in order to avoid “the potential for serious impacts, including turbine nacelles blocking the radar beam and potential receiver damage if sited in the radar’s near field.”
- b. The Mitigation Zone “is the area between 4 km and 36 km where a 160-meter turbine would penetrate more than one elevation angle.” There is the “potential for moderate to high impacts” and the ROC “will work with the developer to get detailed project information, do a thorough impact analysis, and discuss potential mitigation solutions.”
- c. The Consultation Zone “is the area between 4 km and 36 km where a 160-meter turbine only penetrates the first elevation angle or when a 160-meter tall turbine will penetrate more than one elevation angle between 36 km and 60 km. Due to the increased potential for impact to operations the ROC is requesting consultation with the developer to track the project and acquire additional information for a thorough impact analysis.”

AS APPROVED

- d. The Notification Zone “is the area between 36 km and 60 km where a 160-meter tall turbine will only penetrate one elevation angle, or any area beyond 60 km that a 160-meter tall turbine is in the radar line of site (RLOS). Since impacts are typically minimal beyond 60 km and workarounds are available for penetration of only one elevation angle, the ROC is making consultation optional; however, NOAA would still like to know about the project.”
20. Public Act 102-1123 requires that a final determination be made regarding a wind farm or solar farm project within 30 days of the close of the public hearing. In Champaign County, wind farms and solar farms require a County Board decision after the ZBA hearing and one ELUC meeting. Due to standard meeting schedules for ZBA, ELUC, and County Board, there are three months of the year when Champaign County would not be able to meet the 30-day statutory deadline: February, June, and September.
21. The Champaign County State’s Attorney’s Office opined that including requirements that are stricter than what Public Act 102-1123 allows creates a risk of litigation to Champaign County, but the State’s Attorney’s Office is not opposed to the County approving the proposed amendment.
22. Three villages protest the approval of the text amendment prompted by Public Act 102-1123:
- A. The Village of Philo sent a letter of protest received March 28, 2023. The letter cites that the proposed text amendment would affect Village of Philo’s control of its extraterritorial jurisdiction; would create increased noise levels; noise intrusion; visual blight; diminished television, radio and internet reception; negative effects on birds and other wildlife; compromised public safety particularly during storm events; and nuisances.
- B. The Village of St. Joseph sent a letter of protest received March 30, 2023. The letter cites that the proposed text amendment would affect Village of St. Joseph’s control of its extraterritorial jurisdiction.
- C. The Village of Mahomet sent a letter of protest received March 30, 2023. The letter cites that the proposed text amendment removes the language requiring subdivision for leasing situations. The proposed amendment would impact the Village’s ability to secure proper easements or the construction of infrastructure for utility systems. The Village strongly opposes solar and wind farms as a special use in the AG-2 Agriculture Zoning District due to the proximity of the zone to its municipal boundaries. They suggest that rezoning lands within ETJs could assure freedom for urban, contiguous, and incremental expansion for municipalities.
23. The mandated separation of 1.1 times the WIND FARM tower height to public streets and non-participating property lines does not adequately mitigate the risk of ice throw from WIND FARM tower blades. A safe distance of 1.5 times WIND FARM tower height is typically considered a safe distance to mitigate the risk of ice throw.

SUMMARY FINDING OF FACT

From the documents of record and the testimony and exhibits received at the public hearing conducted on **March 30, 2023, May 11, 2023, May 25, 2023 and August 17, 2023**, the Zoning Board of Appeals of Champaign County finds that:

1. The proposed Zoning Ordinance text amendment will **NOT HELP ACHIEVE** the Land Resource Management Plan because:
 - A. The proposed Zoning Ordinance text amendment will **NOT HELP ACHIEVE** LRMP Goal 4.
 - B. The proposed Zoning Ordinance text amendment will **HELP ACHIEVE** LRMP Goals 3 and 6.
 - C. The proposed Zoning Ordinance text amendment **WILL NOT IMPEDE** the achievement of LRMP Goals 1, 2 and 9.
 - D. The proposed Zoning Ordinance text amendment is **NOT RELEVANT** to LRMP Goals 5, 7, 8 and 10.
2. The proposed text amendment **WILL NOT** improve the Zoning Ordinance because it will **NOT**:
 - A. **HELP ACHIEVE** the purpose of the Zoning Ordinance (see Item 16).
 - B. **IMPROVE** the text of the Zoning Ordinance (see Item 17).
 - C. Promote the public health, safety, comfort, and welfare of the community.

Case 086-AT-23
Page 41 of 41

AS APPROVED

FINAL DETERMINATION

Pursuant to the authority granted by Section 9.2 of the Champaign County Zoning Ordinance, the Zoning Board of Appeals of Champaign County recommends that:

The Zoning Ordinance Amendment requested in **Case 086-AT-23** should **NOT BE ENACTED** by the County Board in the form attached hereto.

The foregoing is an accurate and complete record of the Findings and Determination of the Zoning Board of Appeals of Champaign County.

SIGNED:

ATTEST:

Ryan Elwell, Chair
Champaign County Zoning Board of Appeals

Secretary to the Zoning Board of Appeals

Date

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

New since 3/9/23 ELUC meeting through 3/26/23

Text to reintroduce based on 3/27/23 IACBM Seminar

New since 3/30/23 ZBA meeting

New since 5/25/23 ZBA meeting

1. Add definitions in Section 3. Definitions:

FACILITY OWNER: (i) a person with a direct ownership interest in a WIND FARM or a PV SOLAR FARM, or both, regardless of whether the person is involved in acquiring the necessary rights, permits, and approvals or otherwise planning for the construction and operation of the facility, and (ii) at the time the facility is being developed, a person who is acting as a developer of the facility by acquiring the necessary rights, permits, and approvals or by planning for the construction and operation of the facility, regardless of whether the person will own or operate the facility.

NON-PARTICIPATING PROPERTY: real property that is not a PARTICIPATING PROPERTY.

OCCUPIED COMMUNITY BUILDING: any one or more of the following buildings that is existing and occupied on the date that the application for a permit to develop the commercial wind energy facility or the commercial solar energy facility is filed with the county: a school, place of worship, day care facility, public library, or community center.

PARTICIPATING PROPERTY: real property that is the subject of a written agreement between a facility owner and the owner of the real property that provides the facility owner an easement, option, lease, or license to use the real property for the purpose of constructing a commercial wind energy facility, a commercial solar energy facility, or supporting facilities. "Participating property" also includes real property that is owned by a facility owner for the purpose of constructing a commercial wind energy facility, a commercial solar energy facility, or supporting facilities.

2. Revise definitions in Section 3. Definitions:

~~DWELLING~~-~~or PRINCIPAL BUILDING~~, PARTICIPATING: A DWELLING on land that is leased to a WIND FARM or PV SOLAR FARM.

~~DWELLING~~-~~or PRINCIPAL BUILDING~~, NON-PARTICIPATING: A DWELLING on land that is not leased to a WIND FARM or PV SOLAR FARM.

PV SOLAR FARM, COMMUNITY: A PV SOLAR FARM of not more than ~~2,000~~5,000 kilowatt nameplate capacity that meets the requirements of 20 ILCS 3855/1-10 for a “community renewable generation project” and provided that two COMMUNITY PV SOLAR FARMS may be co-located on the same or contiguous parcels totaling 5 MW. as either: a) two 2-MW projects on one parcel, or b) one 2-MW project on each of two contiguous parcels, as authorized by the Illinois Commerce Commission in Final Order 17-0838 on April 3, 2018.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION**3. Add new Section 5.3 Footnote 16 for all Zoning Districts:**

16. The Zoning Administrator shall notify applicants for Zoning Use Permits proposing development within a distance from a WIND FARM TOWER equal to 1.5 times the height of the WIND FARM TOWER that there is a risk of ice throw and other incompatibilities with the WIND FARM TOWER and that the WIND FARM developer is required to mitigate the risks of ice throw for that structure and the immediately surrounding area within 100 feet of the structure. The Department of Planning & Zoning shall also notify applicants for Zoning Use Permits proposing development within a distance from a WIND FARM TOWER of between 1.5 and 2.1 times the height of the WIND FARM TOWER that there is a risk of incompatibilities with the WIND TURBINE.

4. Revise Section 6.1.1 A.5.a. and b. as follows:

5. No Zoning Use permit for such SPECIAL USE will be issued until the applicant provides the COUNTY with an irrevocable letter of credit to be drawn upon a federally insured financial institution within 200 miles of Urbana, Illinois, or reasonable anticipated travel costs shall be added to the amount of the letter of credit.
- a. Unless specified elsewhere in this Ordinance, the irrevocable letter of credit shall be in the amount of one hundred fifty percent (150%) of an independent engineer's cost estimate to complete the work described in Section 6.1.1A.4.a., Section 6.1.1A.4.b., and Section 6.1.1A.4.c. **This requirement shall not apply to any WIND FARM or SOLAR FARM approved after {effective date}.**
- b. The provisions of this subparagraph notwithstanding, a different amount may be required as a special condition. **This requirement shall not apply to any WIND FARM or SOLAR FARM approved after {effective date}.**

5. Add new Section 6.1.1 A.7.f. as follows:

- f. For any WIND FARM or SOLAR FARM approved after {effective date}, abandonment shall be limited to only when the decommissioning and site reclamation plan has not been completed with 12 months after a SOLAR FARM reaches the end of its useful life or when the decommissioning and site reclamation plan has not been completed within 18 months after a WIND FARM reaches the end of its useful life. A WIND FARM or SOLAR FARM shall be presumed to have reached the end of its useful life if the owner of the WIND FARM or SOLAR FARM fails for a period of six consecutive months to pay the landowner amounts owed in accordance with the underlying agreement and additionally, a WIND FARM shall be presumed to have reached the end of its useful life if no electricity shall have been generated for a continuous period of 12 months.**

6. Add new Section 6.1.1 A.9.h. as follows:

- h. For any WIND FARM or SOLAR FARM approved after {effective date}, the Zoning Administrator may only draw on the funds only when the decommissioning and site**

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

reclamation plan has not been completed with 12 months after a SOLAR FARM reaches the end of its useful life or when the decommissioning and site reclamation plan has not been completed with 18 months after a WIND FARM reaches the end of its useful life. A WIND FARM or SOLAR FARM shall be presumed to have reached the end of its useful life if the if the owner of the WIND FARM or SOLAR FARM fails for a period of six consecutive months to pay the landowner amounts owed in accordance with the underlying agreement and additionally, a WIND FARM shall be presumed to have reached the end of its useful life if no electricity shall have been generated for a continuous period of 12 months.

7. Revise Section 6.1.1 A.11.b. as follows:

- 11. The proceeds of the letter of credit may only be used by the COUNTY to:
 - a. remove the NON-ADAPTABLE STRUCTURE and return the site to its condition prior to placement of the NON-ADAPTABLE STRUCTURE, in accordance with the most recent decommissioning and site reclamation plan submitted and accepted in relation to the NON-ADAPTABLE STRUCTURE;
 - b. for other than any WIND FARM or SOLAR FARM approved after {effective date}, pay all administrative and ancillary costs associated with drawing upon the financial assurance and performing the reclamation work, which shall include, but not be limited to, attorney’s fees; construction management and other professional service fees; and the costs of preparing request for proposal and bidding documents required to comply with State law or Champaign County purchasing policies; and
 - c. remove any covenants placed on the title in conjunction with Section 6.1.1A.2.

The balance of any proceeds remaining after the site has been reclaimed shall be returned to the issuer of the letter of credit.

8. Revise the statement at the beginning of Section 6.1.4 as follows:

Prior to <effective date>, a WIND FARM County BOARD SPECIAL USE Permit may only be authorized in the AG-1, Agriculture Zoning DISTRICT subject to the following conditions:

9. Add new Section 6.1.5 PROPOSED WIND FARM SPECIAL USE PERMIT as follows:

As of <effective date>, a WIND FARM SPECIAL USE Permit may only be authorized in the AG-1, AG-2, I-1, and I-2 Zoning DISTRICTS subject to the following conditions:

- A. General Standard Conditions
 - 1. The area of the WIND FARM County Board SPECIAL USE Permit must include the following minimum areas:

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- a. All land that is a distance equal to 1.10 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) from the base of that WIND FARM TOWER.
 - b. All necessary access lanes or driveways and any required new PRIVATE ACCESSWAYS. For purposes of determining the minimum area of the SPECIAL USE Permit, access lanes or driveways shall be provided a minimum 40 feet wide area.
 - c. All necessary WIND FARM ACCESSORY STRUCTURES including electrical distribution lines, transformers, common switching stations, and substations not under the ownership of a PUBLICLY REGULATED UTILITY. For purposes of determining the minimum area of the SPECIAL USE Permit, underground cable installations shall be provided a minimum 40 feet wide area.
 - d. All land that is within 1.50 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) from the base of each WIND FARM TOWER except any such land that is more than 1,320 feet from any existing public STREET right of way.
 - e. All land area within 1,320 feet of a public STREET RIGHT OF WAY that is also within 1,000 feet from the base of each WIND FARM TOWER except that in the case of WIND FARM TOWERS in compliance with the minimum STREET separation required by paragraph 6.1.5 C.4. in which case land on the other side of the public STREET right of way does not have to be included in the SPECIAL USE Permit.
2. The WIND FARM County Board SPECIAL USE Permit shall not be located in the following areas:
 - a. Less than one-and-one-half miles from an incorporated municipality that has a zoning ordinance.
 - b. Less than one mile from the CR, Conservation-Recreation Zoning DISTRICT.
 - c. In any area leased for underground gas storage or under easement for same, unless the lease or easement requires that gas injection wells and other above-ground appurtenances be located in conformance with paragraph 6.1.5 C.9.
 3. All aboveground STRUCTURES and facilities shall be of a type and shall be located in a manner that is consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

4. The owners of the subject property and the Applicant, its successors in interest, and all parties to the decommissioning plan and site reclamation plan hereby recognize and provide for the right of agricultural activities to continue on adjacent land consistent with the Right to Farm Resolution 3425.

B. Minimum Lot Standards

1. There are no minimum LOT AREA, AVERAGE LOT WIDTH, SETBACK, YARD, or maximum LOT COVERAGE requirements for a WIND FARM or for LOTS for WIND FARM TOWERS, substations, and WIND FARM maintenance and management facilities.

C. Minimum Standard Conditions for Separations for WIND FARM TOWERS from adjacent USES and STRUCTURES.

The location of each WIND FARM TOWER shall provide the following required separations:

1. At least 1.1 times the maximum blade tip height of the wind tower from the center of the base of a WIND FARM TOWER to the nearest point on the outside wall of any PARTICIPATING DWELLING provided that the noise level caused by the WIND FARM at the particular building complies with the applicable Illinois Pollution Control Board regulations. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased except as may be required to comply with the applicable noise regulations of the Illinois Pollution Control Board.
2. At least 2.1 times the maximum blade tip height of the wind tower from the center of the base of a WIND FARM TOWER to the nearest point on the outside wall of any existing NON-PARTICIPATING DWELLING or OCCUPIED COMMUNITY BUILDING provided that the noise level caused by the WIND FARM at the particular building complies with the applicable Illinois Pollution Control Board regulations. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased except as may be required to comply with the applicable noise regulations of the Illinois Pollution Control Board.
3. The above separations may be reduced to a distance no less than 1.10 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) upon submission of a PRIVATE WAIVER signed by the owner of said NON-PARTICIPATING DWELLING or OCCUPIED COMMUNITY BUILDING or adjacent property. The PRIVATE WAIVER must specify the agreed minimum separation and specifically acknowledge that the grantor accepts the resulting noise level caused by the WIND FARM.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

4. A separation distance equal to 1.1 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) from the center of the base of a WIND FARM TOWER to the center point of the public STREET RIGHT OF WAY. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.
5. A separation distance equal to 1.1 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) from the center of the base of a WIND FARM TOWER to the nearest non-participating property line. This separation may be reduced upon submission of a PRIVATE WAIVER signed by the owner of said non-participating property. The PRIVATE WAIVER must specify the agreed minimum separation. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.
6. A separation distance equal to 1.1 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) from the center of the base of a WIND FARM TOWER to the nearest easement for a third-party electrical transmission lines. This separation may be reduced upon submission of a PRIVATE WAIVER signed by the owner of said electrical transmission line. The PRIVATE WAIVER must specify the agreed minimum separation. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.
7. Any PRIVATE WAIVER establishing an agreement for a lesser minimum separation as authorized above shall be submitted prior to the final determination by the Board and must be recorded as part of the chain of title in the deed to any relevant tract of land prior to authorization of any relevant ZONING USE PERMIT. No waiver of a standard condition shall be required in the event of a duly agreed and signed PRIVATE WAIVER.
8. At least 2.1 times the maximum blade tip height of the WIND TOWER to the nearest point on the property line of fish and wildlife areas and Illinois Nature Preserve Commission protected lands. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.
9. At least 1,200 feet separation from the ~~exterior above-ground center of the~~ base of a WIND FARM TOWER to any wellhead or other above ground fixture that is accessory to a GAS PIPELINE or to any valve or other above ground fixture for any HAZARDOUS LIQUID PIPELINE, provided however, that if the relevant PIPELINE IMPACT RADIUS required by paragraph 4.3.4H. is greater than 1,200 feet then that PIPELINE IMPACT RADIUS shall be the minimum separation of any of the above. This separation may be reduced upon submission of a PRIVATE WAIVER signed by the owner of said pipeline. The PRIVATE WAIVER must specify the agreed minimum separation.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

10. At least 1,600 feet separation from the ~~exterior above ground~~ center of the base of a WIND FARM TOWER to any Liquefied Natural Gas Storage; or Liquefied Petroleum Gas Storage; or Gasoline and Volatile Oils Storage exceeding 10,000 gallons capacity in the aggregate.
11. For any legal RESTRICTED LANDING AREA that existed on or for which there had been a complete SPECIAL USE Permit application received by April 22, 2010, there shall be a separation from the runway to the nearest tip of a blade of the nearest WIND FARM TOWER as follows:
- a. The separation from the sides and ends of the runway shall be seven horizontal feet for each one foot of overall WIND FARM TOWER HEIGHT.
 - b. An additional separation from the end of the runway shall be 15 feet for each one foot of overall WIND FARM TOWER HEIGHT in a trapezoidal shape that is the width of the runway approach zone based on the requirements of 92 Ill. Admin Code 14.520, except as follows:
 - (1) that part of the separation that is more than 3,000 feet from the end of the runway may be a consistent width based on the widest point of the runway approach zone.
12. For any legal RESIDENTIAL AIRPORT that existed on or for which there had been a complete SPECIAL USE Permit application received by April 22, 2010 there shall be a separation from the runway to the nearest tip of a blade of the nearest WIND FARM TOWER as follows:
- a. The separation from the sides and ends of the runway shall be seven horizontal feet for each one foot of overall WIND FARM TOWER HEIGHT.
 - b. An additional separation from the end of the runway and for a distance of 50 feet on either side of an end of the runway, shall be 20 feet for each one foot of overall WIND FARM TOWER HEIGHT in a trapezoidal shape that is the width of the runway approach zone based on the requirements of 92 Ill. Admin Code 14.520, except as follows:
 - (1) that part of the required separation that is more than 3,000 feet from the end of the runway may be consistent width based on the widest part of the runway approach zone.
- D. Standard Conditions for Design and Installation of WIND FARM TOWERS.
1. Design Safety Certification
 - a. WIND FARM TOWERS, turbines, and all related construction shall conform to applicable industry standards, including those of the American National Standards Institute (“ANSI”). Applicants shall submit certificates of design compliance that equipment manufacturers have obtained from Underwriters Laboratories

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

(“UL”), Det Norske Veritas (“DNV”), Germanischer Lloyd Wind Energy (“GL”), or equivalent third party. Documentation of compliance must be submitted prior to receiving a Zoning Compliance Certificate for either the WIND FARM or for any single WIND FARM TOWER.

- b. Each Zoning Use Permit Application for a WIND FARM TOWER shall include a certification by an Illinois Professional Engineer of Illinois Licensed Structural Engineer that the foundation and tower design of the WIND FARM TOWER is within accepted professional standards, given local soil and climate conditions.
2. Controls and Brakes
 - a. All WIND FARM TOWER turbines shall be equipped with a redundant braking system. This includes both aerodynamic over speed controls (including variable pitch, tip, and other similar systems) and mechanical brakes.
 - b. Mechanical brakes shall be operated in fail-safe mode.
 - c. Stall regulation shall not be considered a sufficient braking system for over speed protection.
3. Electrical Components. All electrical components of the WIND FARM shall conform to applicable state and national codes including, any relevant national and international standards (e.g. ANSI and International Electrical Commission).
4. The WIND FARM TOWER must be a monopole construction.
5. The total WIND FARM TOWER height (measured to the tip of the highest rotor blade) must receive a Determination of No Hazard to Air Navigation by the Federal Aviation Administration under 14 CFR Part 77.
6. WIND FARM TOWERS, turbine nacelles, and blades shall be painted white or gray or another non-reflective, unobtrusive color as specified in the application and authorized by the Board.
7. WIND FARMS shall utilize minimal lighting that is compliant with the applicable FAA regulations, as amended by the FAA. To the extent that such tower lighting is available, and is approved by the FAA for a WIND FARM project, the facility owner shall install Aircraft Detection Lighting Systems (ADLS) or other similar technology to reduce light pollution and visual impacts caused by the WIND FARMS.
8. Warnings

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- a. A reasonably visible warning sign concerning voltage must be placed at the base of all pad-mounted transformers and Substations.
 - b. Visible, reflective, colored objects, such as flags, reflectors, or tape shall be placed on the anchor points of guy wires and along the guy wires up to a height of 15 feet from the ground.
9. All WIND FARM TOWERS must be protected from unauthorized climbing by devices such as fences at least six feet high with locking portals or anti-climbing devices 12 feet vertically from the base of the WIND FARM TOWER.
- E. Standard Conditions to Mitigate Damage to Farmland
1. All underground wiring or cabling for the WIND FARM shall be at a minimum depth as established by the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.
 2. Protection of agricultural drainage tile
 - a. Protection of agricultural drainage tile shall comply with the Agriculture Impact Mitigation Agreement with the Illinois Department of Agriculture as required by Section 6.1.5 S.
 - b. The applicant shall endeavor to locate all existing agricultural drainage tile prior to establishing any construction staging areas, construction of any necessary WIND FARM TOWER access lanes or driveways, construction of any WIND FARM TOWERS, any common switching stations, substations, and installation of underground wiring or cabling. The applicant shall contact affected landowners and tenants for their knowledge of the tile line locations prior to the proposed construction. A drainage district shall be notified at least two weeks prior to [any likely](#) disruption of [a drainage district](#) tile.
 - c. All identified drainage district tile lines shall be staked or flagged prior to construction to alert construction crews of the possible need for tile line repairs unless this requirement is waived in writing by the drainage district.
 - d. [Overland crane crossings shall avoid crossing over drainage district tile as much as possible.](#)
 - e. Any agricultural drainage tile located underneath construction stage areas, access lanes, [overland crane crossings](#), driveways, any common switching stations, and substations shall be replaced as

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

required in paragraph 7-2 6.3 of the Champaign County Stormwater Management Policy and Erosion Control Ordinance.

- f. Any agricultural drainage tile that must be relocated shall be relocated as required in the Champaign County Stormwater Management Policy and Erosion Control Ordinance and consistent with the Agriculture Impact Mitigation Agreement with the Illinois Department of Agriculture.
- g. Any underground WIND FARM wiring to be installed in the vicinity of likely drainage district tiles shall be installed in an open trench rather than installed via plowing or knifed into the ground.
- h. The applicant shall coordinate with the drainage district and provide a drainage district 48 hours to inspect all trenches and/or excavations in the vicinity of suspected drainage district tile locations in order to verify any damage or disturbance to drainage district tile.
- i. All tile lines that are damaged, cut, or removed shall be staked or flagged in such manner that they will remain visible until the permanent repairs are completed. In addition, the location of damaged drain tile lines shall be recorded using Global Positioning Systems (GPS) technology.
- j. Conformance of any relocation and/ or repair of drainage district tile with the Champaign County Stormwater Management Policy and Erosion Control Ordinance shall be certified by an Illinois Professional Engineer. Written approval by the drainage district shall be received prior to any backfilling of the relocated and/ or repaired drain tile and a copy of the approval shall be submitted to the Zoning Administrator. As-built drawings of any relocated and/ or repaired district tile shall be provided to both the relevant drainage district and the Zoning Administrator of any relocated district tile.
- k. All exposed tile lines shall be screened or otherwise protected to prevent the entry into the tile of foreign materials, loose soil, small mammals, etc.
- l. Permanent tile repairs shall be made within 14 days of the tile damage provided that weather and soil conditions are suitable or a temporary tile repair shall be made. Immediate temporary repair shall also be required if water is flowing through any damaged tile line. Temporary repairs are not needed if the tile lines are dry and water is not flowing in the tile provided the permanent repairs can be made within 14 days of the damage. All permanent and temporary tile repairs shall be made as detailed in the Agricultural

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S. and shall not be waived or modified except as authorized in the SPECIAL USE Permit.

- m. All damaged tile shall be repaired so as to operate as well after construction as before the construction began.
 - n. Following completion of the WIND FARM construction the applicant shall be responsible for correcting all tile line repairs that fail, provided that the failed repair was made by the applicant.
3. All soil conservation practices (such as terraces, grassed waterways, etc.) that are damaged by WIND FARM construction and/or decommissioning shall be restored by the applicant to the pre-WIND FARM construction condition in a manner consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.
4. Topsoil replacement
- a. All topsoil shall be placed in a manner consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.
5. Mitigation of soil compaction and rutting
- a. All mitigation of soil compaction and rutting shall be consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.
6. Land leveling
- a. The applicant shall not be responsible for leveling of disturbed land if exempted by the WIND FARM lease.
 - b. All land leveling shall be consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.
7. Permanent Erosion and Sedimentation Control Plan
- a. Prior to the approval of any Zoning Use Permit, the Applicant shall provide a permanent soil erosion and sedimentation plan for all WIND FARM TOWER sites and access roads that conforms to the relevant Natural Resources Conservation Service guidelines and that is prepared by an Illinois Licensed Professional Engineer.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- b. As-built documentation of all permanent soil erosion and sedimentation improvements for all WIND FARM TOWER sites and access roads prepared by an Illinois Licensed Professional Engineer shall be submitted and accepted by the Zoning Administrator prior to approval of any Zoning Compliance Certificate.

F. Standard Conditions for Use of Public STREETS

Any WIND FARM applicant proposing to use any County Highway or township or municipal STREET for the purpose of transporting WIND FARM TOWERS or Substation parts and/or equipment for construction, operation, or maintenance of the WIND FARM TOWERS or Substation(s), shall identify all such public STREETS and pay the costs of any necessary permits and costs to repair any damage to the STREETS specifically and uniquely attributable to the WIND FARM construction, as follows:

1. The Applicant shall enter into a Roadway Upgrade and Maintenance agreement approved by the County Engineer; or Township Highway Commissioner; or municipality where relevant. Agreements with the County Engineer shall not be forwarded to the County Board before the WIND FARM SPECIAL USE permit is forwarded. All other agreements shall be executed prior to the close of the public hearing before the BOARD. The signed and executed Roadway Upgrade and Maintenance agreements must provide for the following minimum conditions:
 - a. The applicant shall agree to conduct a pre-WIND FARM construction baseline survey to determine existing STREET conditions for assessing potential future damage including the following:
 - (1) A videotape of the affected length of each subject STREET supplemented by photographs if necessary.
 - (2) Pay for costs of the County to hire a consultant to make a study of any structure on the proposed route that the County Engineer feels may not carry the loads likely during the WIND FARM construction.
 - (3) Pay for any strengthening of STREET structures that may be necessary to accommodate the proposed traffic loads caused by the WIND FARM construction.
 - b. The applicant shall agree to pay for costs of the County Engineer to hire a consultant to make a study of any structure on the proposed route that the County Engineer feels may not carry the loads likely during the WIND FARM construction and pay for any

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

strengthening of structures that may be necessary to accommodate the proposed traffic loads caused by the WIND FARM construction.

- c. The applicant shall agree upon an estimate of costs for any other necessary roadway improvements prior to construction.
- d. The applicant shall obtain any necessary approvals for the STREET improvements from the relevant STREET maintenance authority.
- e. The applicant shall obtain any necessary Access Permits including any required plans.
- f. The applicant shall erect permanent markers indicating the presence of underground cables.
- g. The applicant shall install marker tape in any cable trench.
- h. The applicant shall become a member of the Illinois statewide One-Call Notice System (otherwise known as the Joint Utility Locating Information for Excavators or “JULIE”) and provide JULIE with all of the information necessary to update its record with respect to the WIND FARM.
- i. The applicant shall use directional boring equipment to make all crossings of County Highways for the cable collection systems.
- j. The applicant shall provide plans for the widening of any corner radius that is necessary to facilitate the turning movements of the transport trucks used by the applicant.
- k. The applicant shall pay for the necessary temporary STREET improvements for the widened corner radii and pay for the cost to return the widened radii to their original lines and grades when no longer needed for the WIND FARM construction unless the STREET maintenance authority requests that the widened radii remain as improved.
- l. The applicant shall notify the STREET maintenance authority in advance of all oversize moves and crane crossings.
- m. The applicant shall provide the County Engineer with a copy of each overweight and oversize permit issued by the Illinois Department of Transportation for WIND FARM construction.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- n. The applicant shall transport the WIND FARM TOWER segments and other oversize loads so as to minimize adverse impact on the local traffic including farm traffic.
- o. The applicant shall schedule WIND FARM construction traffic in a way to minimize adverse impacts on emergency response vehicles, rural mail delivery, school bus traffic, and local agricultural traffic.
- p. The applicant shall provide as much advance notice as is commercially reasonable to obtain approval of the STREET maintenance authority when it is necessary for a STREET to be closed due to a crane crossing or for any other reason. Notwithstanding the generality of the aforementioned, the applicant will provide 48 hours notice to the extent reasonably practicable.
- q. The applicant shall provide signs indicating all highway and STREET closures and work zones in accordance with the Illinois Department of Transportation Manual on Uniform Traffic Control Devices.
- r. The applicant shall establish a single escrow account and a single Irrevocable Letter of Credit for the cost of all STREET upgrades and repairs pursuant to the WIND FARM construction.
- s. The applicant shall notify all relevant parties of any temporary STREET closures.
- t. The applicant shall obtain easements and other land rights needed to fulfill the applicant's obligations under this agreement.
- u. The applicant shall provide written Notice to Proceed to the relevant STREET maintenance authority by December 31 of each year that identifies the STREETS to be upgraded during the following year.
- v. The applicant shall provide dust control and grading work to the reasonable satisfaction of the County Engineer on STREETS that become aggregate surface STREETS.
- w. The applicant shall conduct a post-WIND FARM construction baseline survey similar to the pre-WIND FARM construction baseline survey to identify the extent of repairs necessary to return the STREET to the pre-WIND FARM construction condition.
- x. The applicant shall pay for the cost of all repairs to all STREETS that are damaged by the applicant during the construction of the

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- WIND FARM and restore such STREETS to the condition they were in at the time of the pre-WIND FARM construction inventory.
- y. All WIND FARM construction traffic shall exclusively use routes designated in the approved Transportation Impact Analysis.
 - z. The applicant shall provide liability insurance in an acceptable amount to cover the required STREET construction activities.
 - aa. The applicant shall pay for the present worth costs of life consumed by the construction traffic as determined by the pavement management surveys and reports on the roads which do not show significant enough deterioration to warrant immediate restoration.
 - bb. Provisions for expiration date on the agreement.
 - cc. Other conditions that may be required.
2. A condition of the County Board SPECIAL USE Permit approval shall be that the Zoning Administrator shall not authorize a Zoning Use Permit for the WIND FARM until the County Engineer and State’s Attorney; or Township Highway Commissioner; or municipality where relevant, has approved a Transportation Impact Analysis provided by the applicant and prepared by an independent engineer that is mutually acceptable to the applicant and the County Engineer and State’s Attorney; or Township Highway Commissioner; or municipality where relevant, that includes the following:
- a. Identify all such public STREETS or portions thereof that are intended to be used by the applicant during construction of the WIND FARM as well as the number of loads, per axle weight of each load; and type of equipment that will be used to transport each load.
 - b. A schedule of the access road culverts and bridges affected by the project and the recommendations as to actions, if any, required with respect to such culverts and bridges and estimates of the cost to replace such culverts and bridges.
 - c. A schedule of the anticipated STREET repair costs to be made in advance of the WIND FARM construction and following construction of the WIND FARM.
 - d. The applicant shall reimburse the County Engineer; or Township Highway Commissioner; or municipality where relevant, for all reasonable engineering fees including the costs of a third party

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

consultant, incurred in connection with the review and approval of the Transportation Impact Analysis.

3. At such time as decommissioning takes place the Applicant or its successors in interest shall enter into a Roadway Use and Repair Agreement with the appropriate highway authority.

G. Standard Conditions for Coordination with Local Fire Protection District

1. The applicant shall submit to the local fire protection district a copy of the site plan.
2. Upon request by the local fire protection district, the Owner or Operator shall cooperate with the local fire protection district to develop the fire protection district's emergency response plan.
3. Nothing in this section shall alleviate the need to comply with all other applicable fire laws and regulations.

H. Standard Conditions to Mitigate Electromagnetic Interference

1. The applicant shall provide the applicable microwave transmission providers and local emergency service provider(s) (911 operators) copies of the project summary and site plan.
2. To the extent that any relevant microwave transmission provider and local emergency service provider demonstrates a likelihood of interference with its communications resulting from the WIND FARM, the applicant shall take reasonable measures to mitigate such anticipated interference.
3. If, after construction of the WIND FARM, the Owner or Operator receives a written complaint related to the above-mentioned interference, the Owner or Operator shall take reasonable steps to respond to the complaint.
4. If, after construction of the WIND FARM, the Owner or Operator receives a written complaint related to interference with local broadcast residential television, the Owner or Operator shall take reasonable steps to respond to the complaint.

I. Standard Conditions for Allowable Noise Level

1. Noise levels from each WIND FARM TOWER or WIND FARM shall be in compliance with the applicable Illinois Pollution Control Board (IPCB) regulations (35 *Illinois Administrative Code* Subtitle H: Noise Parts 900, 901, 910). This is a statutory requirement by 55 ILCS 5/5-12020 shall not be changed.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

2. The applicant shall submit manufacturer's wind turbine sound power level characteristics and other relevant data regarding wind turbine noise characteristics necessary for a competent noise analysis.
3. The applicant, through the use of a qualified professional, as part of the siting approval application process, shall appropriately demonstrate compliance with the above noise requirements.
4. The applicant shall submit a map of the relevant noise contours for the proposed WIND FARM and indicate the proposed WIND FARM TOWERS and all existing PRINCIPAL BUILDINGS within at least 1,500 feet of any WIND FARM TOWER or within the coverage of the relevant noise contours.
5. If a computer model is used to generate the required noise contours the applicant shall clearly state the assumptions of the model's construction and algorithms so that a competent and objective third party can as simply as possible verify the noise contours and noise data.
6. After construction of the WIND FARM the Zoning Administrator shall take appropriate enforcement action as necessary to investigate noise complaints in order to determine the validity of the complaints and take any additional enforcement action as proves warranted to stop any violation that is occurring, including but not limited to the following:
 - a. The Zoning Administrator may seek authorization from the County Board to hire a noise consultant to determine the noise produced by the WIND FARM in a manner consistent with the Illinois Pollution Control Board (IPCB) regulations (*35 Illinois Administrative Code* Subtitle H: Noise Parts 900, 901, 910).
 - b. The Zoning Administrator may require the WIND FARM owner to cooperate fully with the noise consultant in the enforcement action including shutting down all wind turbines to allow documentation of ambient noise levels.
 - c. In the event that a violation of the IPCB noise regulations is identified the Zoning Administrator may require the WIND FARM owner to take whatever actions are necessary to stop the violation and comply with the noise regulations. The Zoning Administrator may seek direction from the Environment and Land Use Committee regarding the actions necessary to stop the violation.
 - d. Further, in the event that a violation of IPCB noise regulations is identified the WIND FARM owner shall reimburse to the County the cost of the noise consultant.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

J. Standard Conditions for Endangered Species Consultation

The applicant shall apply for consultation with the Endangered Species Program of the Illinois Department of Natural Resources. The Application shall include a copy of the Agency Action Report or, if applicable, a copy of the Detailed Action Report submitted to the Endangered Species Program of the Illinois Department of Natural Resources and a copy of the response from the Illinois Department of Natural Resources.

K. Standard Conditions for Historic and Archaeological Resources Review

The applicant shall apply for consultation with the State Historic Preservation Officer of the Illinois Department of Natural Resources. The application shall include a copy of the Agency Action Report from the State Historic Preservation Officer of the Illinois Department of Natural Resources.

L. Standard Conditions for Fish and Wildlife Impacts

The applicant shall apply for consultation with the United States Fish and Wildlife Service's Information for Planning and Consulting environmental review or a comparable successor tool that is consistent with the "U.S. Fish and Wildlife Service's Land-Based Wind Energy Guidelines." The application shall include a copy of the consultation review from the U.S. Fish and Wildlife Service.

M. Standard Conditions for Shadow Flicker

1. The applicant shall submit the results of a study on potential shadow flicker. The shadow flicker study shall identify the locations of both summer and winter shadow flicker that may be caused by the project ~~with an expected duration of 30 hours or more per year.~~
2. ~~Shadow flicker that exceeds the above standards shall be mitigated by any means such as landscaping, awnings, or fencing. No OCCUPIED COMMUNITY BUILDING or NON-PARTICIPATING DWELLING shall experience more than 30 hours per year of shadow flicker under planned operating conditions. This duration is a statutory requirement by 55 ILCS 5/5-12020 and shall not be decreased.~~

N. Ice Throw

1. As part of the Special Use Permit Application, the Applicant shall provide a current risk level assessment of ice fall and ice throw for the current turbine model to be used and includes public roads and parts of non-participating properties used for residential purposes and for other structures. The methodology shall be equivalent to that in the International Energy Agency (IEA) Wind Technology Collaboration Programme (TCP) Task 19 Technical Report *International Recommendations for Ice Fall and Ice Throw Risk Assessments* dated April 2022.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

2. If the risk of ice fall and ice throw is above 10^{-5} (1/100,000) it shall be considered unacceptable and extensive risk reduction measures (e.g., relocation or change of turbine specifications or temporarily shutting down the turbine) shall be taken by the WIND FARM developer. The property owner can waive this requirement. Signed written waivers must be presented with the application for a Zoning Use Permit.
3. If a non-participating structure is built within a distance from a WIND FARM TOWER of 1.5 times the height of the WIND FARM TOWER after the Special Use PERMIT approval, the WIND FARM developer shall mitigate ice fall and/or ice throw that could potentially impact the structure and the immediate surrounding area within 100 feet of the structure.

O. Standard Condition for Liability Insurance

1. The Owner or Operator of the WIND FARM shall maintain a current general liability policy covering bodily injury and property damage with minimum limits of at least \$5 million per occurrence and \$520 million in the aggregate. The amount of the limit shall be increased annually to account for the effects of inflation.
2. The general liability policy shall identify landowners in the SPECIAL USE Permit as additional insured.

P. Operational Standard Conditions

1. Maintenance
 - a. The Owner or Operator of the WIND FARM must submit, on an annual basis, a summary of the operation and maintenance reports to the Environment and Land Use Committee and any other operation and maintenance reports as the Environment and Land Use Committee reasonably requests.
 - b. Any physical modification to the WIND FARM that alters the mechanical load, mechanical load path, or major electrical components shall require a new County Board SPECIAL USE Permit. Like-kind replacements shall not require re-certification nor will replacement of transformers, cabling, etc. provided replacement is done in a fashion similar to the original installation. Prior to making any physical modification (other than a like-kind replacement), the Owner or Operator shall confer with a relevant third-party certifying entity identified in subparagraph 6.1.5 D.1.(a) to determine whether the physical modification requires re-certification.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

2. Materials Handling, Storage and Disposal
 - a. All solid wastes related to the construction, operation and maintenance of the WIND FARM shall be removed from the site promptly and disposed of in accordance with all federal, state and local laws.
 - b. All hazardous materials related to the construction, operation and maintenance of the WIND FARM shall be handled, stored, transported and disposed of in accordance with all applicable local, state and federal laws.
- Q. Standard Condition for Decommissioning Plan and Site Reclamation Plan
1. The applicant shall submit a signed site reclamation plan conforming to the requirements of paragraph 6.1.1 A. and matching the overall deconstruction and land restoration requirements of the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture. The decommissioning and deconstruction requirements of the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture are a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.
 2. In addition to the purposes listed in subparagraph 6.1.1 A.4. the reclamation agreement shall also include provisions for anticipated repairs for any public STREET used for the purpose of reclamation of the WIND FARM and all costs related to removal of access driveways.
 3. The Site Reclamation Plan required in paragraph 6.1.1 A. shall also include the following:
 - a. A stipulation that the applicant shall notify the GOVERNING BODY by certified mail of the commencement of a voluntary or involuntary bankruptcy proceeding, naming the applicant as debtor, within ten days of commencement of the proceeding.
 - b. A stipulation that the applicant shall agree that the sale, assignment in fact or at law, or such other transfer of applicant's financial interest in the WIND FARM shall in no way affect or change applicant's obligation to continue to comply with the terms of this agreement. Any successor or assignee shall assume the terms, covenants and obligations of this Agreement and agrees to assume all reclamation liability and responsibility for the WIND FARM.
 - c. Authorization for the GOVERNING BODY and its authorized representatives for right of entry onto the WIND FARM premises for the purpose of inspecting the methods of reclamation or for performing actual reclamation if necessary.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- d. A stipulation that at such time as decommissioning takes place, the Applicant or it's successors in interest are required to enter into a Roadway Use and Repair Agreement with the relevant highway authority.
- e. A stipulation that the Applicant shall provide evidence of any new, additional, or substitute financing or security agreement to the Zoning Administrator throughout the operating lifetime of the project.
- f. A stipulation that the Applicant shall be obliged to perform the work in the site reclamation plan before abandoning the WIND FARM or prior to ceasing production of electricity from the WIND FARM, after it has begun, other than in the ordinary course of business. This obligation shall be independent of the obligation to pay financial assurance, and shall not be limited by the amount of financial assurance. The obligation to perform the reclamation work shall constitute a covenant running with the land.
- g. The site reclamation plan shall provide for payment of any associated costs that Champaign County may incur in the event that decommissioning is actually required. Associated costs include all administrative and ancillary costs associated with drawing upon the financial assurance and performing the reclamation work and shall include but not be limited to attorney's fees; construction management and other professional service fees; and the costs of preparing request for proposals and bidding documents required to comply with State law or Champaign County purchasing policies.
- h. The depth of removal of foundation concrete below ground shall be a minimum of 54 inches as required in the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture. The depth of removal of foundation concrete shall be certified in writing by an Illinois Licensed Professional Engineer and the certification shall be submitted to the Zoning Administrator.
- i. The hole resulting from the removal of foundation concrete during decommissioning shall be backfilled as follows: as required in the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
 - (1) The excavation resulting from the removal of foundation concrete shall only be backfilled with subsoil and topsoil in similar depths and similar types as existed at the time of the original WIND FARM construction except that a lesser quality topsoil or a combination of a lesser quality topsoil and a subsoil that is similar to the native subsoil may be

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

~~used at depths corresponding to the native subsoil but not less than 12 inches below grade.~~

~~(2) — The native soils excavated at the time of the original WIND FARM construction may be used to backfill the concrete foundation excavations at the time of decommissioning provided that the soils are adequately stored throughout the operating lifetime of the WIND FARM. The methods for storing the excavated native soils during the operating lifetime of the WIND FARM shall be included in the site reclamation plan.~~

~~(3) — If the excavated native soils are not stored for use for backfilling the concrete foundation excavations, a qualified soil scientist or Illinois Licensed Professional Engineer shall certify that the actual soils used to backfill the concrete foundation excavations are of equal or greater quality than the native soils or that, in the case of subsoil, the backfill soil meets the requirements of this paragraph. The certification shall be submitted to the Zoning Administrator.~~

~~(4) — An Illinois Licensed Professional Engineer shall certify in writing that the concrete foundation excavations have been backfilled with soil to such a depth and with a minimum of compaction that is consistent with the restoration of productive agricultural use such that the depth of soil is expected to be no less than 54 inches within one year after backfilling.~~

- j. A stipulation that should the site reclamation plan be deemed invalid by a court of competent jurisdiction the WIND FARM SPECIAL USE Permit shall be deemed void.
- k. A stipulation that the Applicant’s obligation to complete the site reclamation plan and to pay all associated costs shall be independent of the Applicant’s obligation to provide financial assurance.
- l. A stipulation that the liability of the Applicant’s failure to complete the site reclamation plan or any breach of the site reclamation plan requirement shall not be capped by the amount of the financial assurance.
- m. If the Applicant desires to remove equipment or property credited to the estimated salvage value without the concurrent replacement of the property with property of equal or greater salvage value or if the Applicant installs equipment or property increasing the cost of

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

decommissioning after the WIND FARM begins to produce electricity, at any point, the Applicant shall first obtain the consent of the Zoning Administrator. If the Applicant's lien holders remove equipment or property credited to the salvage value the Applicant shall promptly notify the Zoning Administrator. In either of these events the total financial assurance shall be adjusted to reflect any change in total salvage value and total decommissioning costs resulting from any such removal or installation.

4. To comply with paragraph 6.1.1A.5., the Applicant shall provide financial assurance in the form of ~~an irrevocable letter of credit and~~ an escrow account as follows:

- a. ~~At the time of SPECIAL USE Permit approval the amount of financial assurance to be provided for the site reclamation plan shall be 210% of the decommissioning costs as determined in the independent engineer's cost estimate to complete the decommissioning work described in Section 6.1.1A.4.a. and 6.1.1A.4.b and 6.1.1A.4.c. No Zoning Use Permit to authorize construction of the WIND FARM shall be authorized by the Zoning Administrator until the WIND FARM owner shall provide the COUNTY with financial assurance to cover ~~12.5%~~ 10% of the decommissioning and site reclamation cost as determined in the independent engineer's cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5.~~
- b. ~~On or before the sixth anniversary of the Commercial Operation Date, the WIND FARM Owner shall provide the COUNTY with Financial Assurance to cover ~~62.5%~~ 50% of the decommissioning cost and site reclamation cost as determined in the independent engineer's cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5.~~
- c. ~~On or before the eleventh anniversary of the Commercial Operation Date, the WIND FARM Owner shall provide the COUNTY with Financial Assurance to cover ~~125%~~ 100% of the decommissioning and site reclamation cost as determined in the independent engineer's cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5. and as determined in the updated decommissioning and site reclamation plan filed with the County on or before the end of the tenth year of commercial operation.~~

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

b.d. Net salvage value may be deducted from decommissioning costs as follows:

- (1) One of the following standards shall be met:
 - i. The Applicant shall maintain the WIND FARM TOWERS free and clear of liens and encumbrances, including financing liens and shall provide proof of the same prior to issuance of the SPECIAL USE Permit; or
 - ii. The Applicant shall deduct from the salvage value credit the amount of any lien or encumbrance on each WIND FARM TOWER; or
 - iii. Any and all financing and/or financial security agreements entered into by the Applicant shall expressly provide that the agreements are subject to the covenant required by Section 6.1.1 A.2 that the reclamation work be done.
- (2) The applicant shall provide proof of compliance with paragraph 6.1.5 P.4.d.(1) prior to issuance of any Zoning Use Permit and upon every renewal of the financial assurance and at any other time upon the request of the Zoning Administrator.
- (3) The Applicant shall provide in the site reclamation plan for legal transfer of the STRUCTURE to the demolisher to pay the costs of reclamation work, should the reclamation work be performed.
- (4) The net estimated salvage value that is deducted from the estimated decommissioning costs shall be the salvage value that results after all related costs for demolition and any required preparation for transportation for reuse or recycling or for simple disposal and other similar costs including but not limited to the decommissioning of the tower, the hub assembly, the bed plate, the nacelle, the turbine, the blades, the tower cabling and internal wiring, the transformers, the foundation, the access roads.
- (5) Estimated salvage value shall be based on the average salvage price of the past five years as published in a reputable source for salvage values and shall reflect sound engineering judgment as to anticipated changes in salvage prices prior to the next update of estimated net salvage value.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

~~(6) The deduction from the estimated decommissioning costs for net estimated salvage value shall be capped at 70% of the total net estimated salvage value even though the total actual salvage value shall be available in the event that decommissioning is actually required.~~

~~(7) The credit for net estimated salvage value attributable to any WIND FARM TOWER may not exceed the estimated cost of removal of the above ground portion of that WIND FARM TOWER on the subject site.~~

~~ee.~~ The GOVERNING BODY has the right to require multiple ~~letters of credit~~ escrow accounts based on the regulations governing federal insurance for deposits.

~~df.~~ The Applicant and its successors in interest shall adjust the amount of the financial assurance to ensure that it reflects current and accurate information as follows:

~~(1) At least once every three years for the first 12 years of the financial assurance and at least once every year thereafter the Applicant shall use an independent Illinois Licensed Professional Engineer to provide updated estimates of decommissioning costs and salvage value, by including any changes due to inflation and/or change in salvage price. The Applicant shall, upon receipt, provide a copy of the adjusted Professional Engineer's report to the Zoning Administrator. The Applicant or its successors in interest shall file an updated decommissioning and site reclamation plan with the County on or before the end of the tenth year of commercial operation.~~

~~(2) The County shall reevaluate the estimated costs of decommissioning and site reclamation every five years after the tenth anniversary of the commercial operation date. The solar farm owner shall provide an updated estimated cost of decommissioning and site reclamation that is provided by an independent Illinois licensed professional engineer.~~

~~(3) At all times after the tenth anniversary of the commercial operation date, the total combined value of the irrevocable letter of credit and the escrow account shall equal or exceed the amount of the independent engineer's cost estimate as increased by known and documented rates of inflation since the WIND FARM was approved; and an amount for any future years left in the anticipated 25 year life span of the~~

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

~~WIND FARM at an assumed minimum rate of inflation of 3% per year.~~

~~eg. The applicant or WIND FARM owner shall gradually pay down the value of the irrevocable letter of credit by placing cash deposits in an escrow account over the first 13 years of the WIND FARM operation provide an escrow account as follows:~~

- (1) The applicant or WIND FARM owner and the GOVERNING BODY shall agree on a mutually acceptable financial institution at which an escrow account shall be established.
- (2) The GOVERNING BODY shall be the beneficiary of the escrow account for the purpose of the reclamation of the WIND FARM in the event that the WIND FARM owner is incapable of decommissioning the WIND FARM.
- (3) The applicant or WIND FARM owner shall grant perfected security in the escrow account by use of a control agreement establishing the County as an owner of record, pursuant to the Secured Transit Article of the Uniform Commercial Code, 810 *ILCS* 9/101 *et seq.*

~~(4) The applicant or WIND FARM owner shall make annual deposits to the escrow account over a 12 year period and shall simultaneously provide a replacement irrevocable letter of credit that is reduced accordingly.~~

~~(5) At all times the total combined value of the irrevocable letter of credit and the escrow account shall be increased annually as necessary to reflect actual rates of inflation over the life span of the WIND FARM and the amount shall be equal to or exceed the following:~~

- ~~i. the amount of the independent engineer’s cost estimate as increased by known and documented rates of inflation since the WIND FARM was approved; plus~~
- ~~ii. an amount for any future years left in the anticipated life span of the WIND FARM at an assumed minimum rate of inflation of 3% per year.~~

(4) Any interest accrued on the escrow account that is over and above the total value required by subparagraph **6.1.5 P.4** shall go to the WIND FARM owner.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

(5) In order to provide funding for decommissioning at the time of decommissioning, the WIND FARM applicant or WIND FARM owner may exchange a new irrevocable letter of credit in an amount equal to the amount in the escrow account in exchange for the GOVERNING BODY agreeing to a release of the full amount of the escrow account.

fh. Should the salvage value of components be adjusted downward or the decommissioning costs adjusted upward pursuant to paragraph 6.1.5 P.4. f, the amount to be placed in the escrow account pursuant to this paragraph 6.1.5 P.4. shall be increased to reflect the adjustment, as if the adjusted estimate were the initial estimate.

gi. Any financial assurance required per the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S. shall count towards the total financial assurance required for compliance with paragraph 6.1.1A.5.

5. In addition to the conditions listed in subparagraph 6.1.1A.9, the Zoning Administrator may also draw on the funds for the following reasons:

a. In the event that any WIND FARM TOWER or component thereof ceases to be functional for more than six consecutive months after it starts producing electricity and the Owner is not diligently repairing such WIND FARM TOWER or component.

b. In the event that the Owner declares any wind turbine or other component to be functionally obsolete for tax purposes.

c. There is a delay in the construction of any WIND FARM TOWER of more than 6 months after construction on that WIND FARM TOWER begins.

d. Any WIND FARM TURBINE appears in a state of disrepair or imminent collapse and/or creates an imminent threat to the health or safety of the public or any person.

e. Any WIND FARM TURBINE is otherwise derelict for a period of 6 months.

f. The WIND FARM is in violation of the terms of the WIND FARM SPECIAL USE permit for a period exceeding ninety (90) days.

g. The Applicant has failed to maintain financial assurance in the form and amount required by the SPECIAL USE Permit or compromised the COUNTY's interest in the site reclamation plan.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

~~h. The COUNTY discovers any material misstatement of fact or misleading omission of fact made by the Applicant in the course of the SPECIAL USE Permit zoning case.~~

~~i. The Applicant has either failed to receive a copy of the certification of design compliance required by paragraph 6.1.4D.1.(a) or failed to submit it to the COUNTY within 12 consecutive months of receiving a Zoning Use Permit regardless of the efforts of the Applicant to obtain such certification.~~

65. The Zoning Administrator may, but is not required to, deem the WIND FARM abandoned, ~~or the standards set forth in Section 6.1.5 L.5. met,~~ with respect to some, but not all, of the WIND FARM TURBINES in the WIND FARM. In that event the Zoning Administrator may draw upon the financial assurance to perform the reclamation work as to those WIND FARM TURBINES only. Upon completion of that reclamation work, the salvage value and reclamation costs shall be recalculated as to the remaining WIND FARM TURBINES in the WIND FARM.

76. The Site Reclamation Plan shall be included as a condition of approval by the BOARD and the signed and executed irrevocable letter of credit and evidence of the escrow account must be submitted to the Zoning Administrator prior to any Zoning Use Permit approval.

R. Complaint Hotline

1. Prior to the commencement of construction on the WIND FARM and during the entire term of the County Board SPECIAL USE permit and any extension, the applicant and Owner shall establish a telephone number hotline for the general public to call with any complaints or questions.
2. The telephone number hotline shall be publicized and posted at the operations and maintenance center and the construction marshalling yard.
3. The telephone number hotline shall be manned during usual business hours and shall be an answering recording service during other hours.
4. Each complaint call to the telephone number hotline shall be logged and identify the name and address of the caller and the reason for the call.
5. All calls shall be recorded and the recording shall be saved for transcription for a minimum of two years.

S. Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture

1. The Applicant shall enter into an Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

2. The Applicant shall bear full responsibility for coordinating any special conditions required in the SPECIAL USE Permit in order to ensure compliance with the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
3. All requirements of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture shall become requirements of the COUNTY Board SPECIAL USE Permit.
4. Champaign County shall have the right to enforce all requirements of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.

T. Standard Condition for Expiration of WIND FARM County Board SPECIAL USE Permit

A WIND FARM County Board SPECIAL USE Permit designation shall expire pursuant to any time limit included in the Roadway Upgrade and Maintenance agreement required by paragraph 6.1.5 F. or in 10 years if no Zoning Use Permit is granted.

U. Application Requirements

1. In addition to all other information required on the SPECIAL USE Permit application and required by Section 9.1.1 A.2. the application shall contain or be accompanied by the following information:
 - a. A WIND FARM Project Summary, including, to the extent available:
 - (1) A general description of the project, including its approximate name plate generating capacity; the potential equipment manufacturer(s), type(s) of wind turbines, number of wind turbines, and name plate generating capacity of each wind turbine; the maximum height of the WIND FARM TOWER(S); and the maximum diameter of the WIND FARM TOWER rotor(s).
 - (2) The specific proposed location of the WIND FARM including all tax parcels on which the WIND FARM will be constructed.
 - (3) The specific proposed location of all tax parcels required to be included in the WIND FARM County Board SPECIAL USE Permit.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- (4) A description of the applicant; Owner and Operator, including their respective business structures.

- b. The name(s), address(es), and phone number(s) of the applicant(s), Owner and Operator, and all property owner(s) for the WIND FARM County Board SPECIAL USE Permit.

- c. A site plan for the installation of all WIND FARM TOWERS indicating the following:
 - (1) The approximate planned location of each WIND FARM TOWER, other PRINCIPAL STRUCTURES, property lines (including identification of adjoining properties), required separations, public access roads and turnout locations, substation(s), electrical cabling from the WIND FARM TOWER to the Substation(s), ancillary equipment, third party transmission lines, maintenance and management facilities, and layout of all structures within the geographical boundaries of any applicable setback.

 - (2) The site plan shall clearly indicate the area of the proposed WIND FARM County Board SPECIAL USE Permit as required by subparagraph 6.1.5 A.1.

 - (3) The separation of all WIND FARM structures from adjacent NON-PARTICIPATING DWELLINGS OR COMMUNITY BUILDINGS or uses shall be shown or dimensioned on the approved site plan for the SPECIAL USE Permit unless the Board authorizes a lesser separation in a special condition of approval or any required and duly authorized waivers of paragraph 6.1.5 C. Authorization of a separation of less than 90% of that indicated on the approved site plan for the SPECIAL USE Permit shall require an updated noise study meeting the requirements of paragraph 6.1.5 G. to be submitted with the Zoning Use Permit application. WIND FARM structures include WIND FARM TOWERS, substations, third party transmission lines, maintenance and management facilities, or other significant structures.

- d. The Applicant shall include a copy of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture with the Special Use Permit Application to authorize construction.

- e. All other required studies, reports, certifications, and approvals demonstrating compliance with the provisions of this Ordinance.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

2. The applicant shall notify the COUNTY of any changes to the information provided above that occurs while the SPECIAL USE Permit application is pending.

V. The approval of a WIND FARM shall not be conditioned on a property value guarantee and shall not require a facility owner to pay into a neighboring property devaluation escrow account. This is a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.

W. Deadlines for Start of Public Hearing and Governing Body Determination

1. A public hearing for a WIND FARM shall begin within 45 days of filing a complete SPECIAL USE Permit application. This requirement is imposed by Public Act 102-1123 and the number of days shall not be increased or eliminated unless waived by the developer.

2. A decision on the SPECIAL USE Permit shall be made within 30 days after the conclusion of the public hearing. This requirement is imposed by Public Act 102-1123 and the number of days shall not be increased or eliminated unless waived by the developer.

X. Should the Illinois Supreme Court find P.A. 102-1123 invalid or should an Illinois Appellate Court find P.A. 102-1123 invalid, and that declaration is not appealed to the Illinois Supreme Court or the Illinois Supreme Court declines to hear an appeal of the Appellate Court’s finding and no public hearing for a proposed WIND FARM has begun, the text of this amendment shall be stricken and the text adopted by the Champaign County Board on August 18, 2022 shall be reinstated and shall govern WIND FARMS in Champaign County.

10. Renumber all references to Section **6.1.5 PHOTOVOLTAIC (PV) SOLAR FARM County BOARD SPECIAL USE Permit** to new **Section 6.1.6** and add the following statement to the beginning of new Section 6.1.6:

Prior to <effective date>, a PHOTOVOLTAIC (PV) SOLAR FARM County BOARD SPECIAL USE Permit may only be authorized in the AG-1, Agriculture, Zoning DISTRICT or the AG-2, Agriculture, Zoning DISTRICT subject to the following standard conditions:

11. Add new **Section 6.1.7 PROPOSED PHOTOVOLTAIC (PV) SOLAR FARM SPECIAL USE Permit as follows:**

As of <effective date>, a PHOTOVOLTAIC (PV) SOLAR FARM SPECIAL USE Permit may only be authorized in the AG-1, AG-2, I-1, and I-2 Zoning DISTRICTS subject to the following conditions:

A. In what follows, PV SOLAR FARM should be understood to include COMMUNITY PV SOLAR FARM unless specified otherwise in the relevant section or paragraph.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

B. General Standard Conditions

- (1) The area of the PV SOLAR FARM County BOARD SPECIAL USE Permit must include the following minimum areas:
 - a. All land that will be exposed to a noise level greater than that authorized to Class A land as established by *35 Ill. Admin. Code Parts 900, 901 and 910* under paragraph 6.1.5I.
 - b. All necessary access lanes or driveways and any required new PRIVATE ACCESSWAYS. For purposes of determining the minimum area of the SPECIAL USE Permit, access lanes or driveways shall be provided a minimum 40 feet wide area.
 - c. All necessary PV SOLAR FARM STRUCTURES and ACCESSORY STRUCTURES including electrical distribution lines, inverters, transformers, common switching stations, and substations not under the ownership of a PUBLICLY REGULATED UTILITY and all waterwells that will provide water for the PV SOLAR FARM. For purposes of determining the minimum area of the SPECIAL USE Permit, underground cable installations shall be provided a minimum 40 feet wide area.
 - d. All aboveground STRUCTURES and facilities shall be of a type and shall be located in a manner that is consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.

- (2) The PV SOLAR FARM County BOARD SPECIAL USE Permit shall not be located in the following areas:
 - a. Less than one and one-half miles from an incorporated municipality that has a zoning ordinance except for any power lines of 34.5 kVA or less and any related proposed connection to an existing substation. Any request for a waiver of this minimum separation shall include the following:
 - (a) No part of a PV SOLAR FARM shall be located within a contiguous growth area (CUGA) as indicated in the most recent update of the CUGA in the Champaign County Land Resource Management Plan, and there shall be a separation of one-half mile from a proposed PV SOLAR FARM to a municipal boundary at the time of application for the SPECIAL USE Permit.
 - (b) The ZONING ADMINISTRATOR shall notify in writing any municipality that is located within one and one-half miles from any proposed PV SOLAR FARM upon the

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

receipt of any substantial PV SOLAR FARM SPECIAL USE permit application in addition to any notice otherwise required.

- (c) The PV SOLAR FARM SPECIAL USE Permit application shall include documentation that the applicant has provided a complete copy of the SPECIAL USE Permit application to any municipality within one and one-half miles of the proposed PV SOLAR FARM.
- (d) Municipal subdivision approval for any PV SOLAR FARM land lease exceeding five years may be required by any relevant municipal authority that has an adopted comprehensive plan and when required said subdivision approval shall be necessary for compliance with Section 13.2.1.
- (e) The public hearing for any proposed PV SOLAR FARM that is located within one and one-half miles of a municipality that has a zoning ordinance shall occur at a minimum of two Board meetings that are not less than 28 days apart to provide time for municipal comments during the public hearing, unless the 28 day comment period is waived in writing by any relevant municipality.
- (f) For any proposed PV SOLAR FARM that is located within one and one-half miles of a municipality that has a zoning ordinance, the ZONING ADMINISTRATOR shall notify said municipality of the recommendation by the BOARD after the close of the public hearing.
- (g) After the initial review of the BOARD recommendation for the PV SOLAR FARM SPECIAL USE Permit by the Environment and Land Use Committee of the COUNTY BOARD, if the Environment and Land Use Committee makes a preliminary determination to accept the BOARD recommendation, the PV SOLAR FARM SPECIAL USE Permit shall remain at the Environment and Land Use Committee for a maximum 30-day comment period, or until the next regularly scheduled meeting, to allow comments regarding the PV SOLAR FARM SPECIAL USE Permit to be received from any relevant municipal authority prior to the Environment and Land Use Committee recommendation to the COUNTY BOARD, unless the municipal comment period is waived in writing by any relevant municipality. If a PV SOLAR FARM is not located within one and one-half miles of a municipality the Environment and Land Use Committee

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

recommendation can be referred to the COUNTY BOARD without a comment period.

- (h) If no municipal resolution regarding the PV SOLAR FARM is received from any municipality located within one and one-half miles of the PV SOLAR FARM prior to the consideration of the PV SOLAR FARM SPECIAL USE Permit by the Champaign COUNTY BOARD, the ZONING ADMINISTRATOR shall provide documentation to the COUNTY BOARD that any municipality within one and one-half miles of the PV SOLAR FARM was provided notice of the meeting dates for consideration of the proposed PV SOLAR FARM SPECIAL USE Permit for both the Environment and Land Use Committee and the COUNTY BOARD.

(3) Interconnection to the power grid

- a. The PV SOLAR FARM SPECIAL USE Permit application shall include documentation that the applicant or PV SOLAR FARM is in the queue to acquire an interconnection agreement to the power grid.
- b. Documentation of an executed interconnection agreement with the appropriate electric utility shall be provided prior to issuance of a Zoning Compliance Certificate to authorize operation of the PV SOLAR FARM.

(4) Right to farm

- a. The owners of the subject property and the Applicant, its successors in interest, and all parties to the decommissioning plan and site reclamation plan hereby recognize and provide for the right of agricultural activities to continue on adjacent land consistent with the Right to Farm Resolution 3425.

C. Minimum LOT Standards

- (1) There are no minimum LOT AREA, AVERAGE LOT WIDTH, SETBACK, YARD, or maximum LOT COVERAGE requirements for a PV SOLAR FARM or for LOTS for PV SOLAR FARM substations and/or for PV SOLAR FARM maintenance and management facilities.
- (2) There is no maximum LOT AREA requirement on BEST PRIME FARMLAND.

D. Minimum Standard Conditions for Separations for PV SOLAR FARM from adjacent USES and STRUCTURES

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

The location of each PV SOLAR FARM shall provide the following required separations as measured from the exterior of the above ground portion of the PV SOLAR FARM STRUCTURES and equipment including fencing:

- (1) PV SOLAR FARM fencing shall be set back from the street centerline a minimum of 50 feet. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.
- (2) For properties participating in the solar farm: No required separation from any existing DWELLING or existing PRINCIPAL BUILDING except as required to ensure that a minimum zoning LOT is provided for the existing DWELLING or PRINCIPAL BUILDING.
- (3) For properties not participating in the solar farm:
 - a. A separation of 50 feet between the nearest edge of any component of the PV SOLAR FARM and the nearest point on the property line of the non-participating property. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased except as may be required to comply with the applicable noise regulations of the Illinois Pollution Control Board.
 - b. A separation of 150 feet from the nearest edge of any component of the PV SOLAR FARM and the nearest point on the outside wall of an OCCUPIED COMMUNITY BUILDING or NON-PARTICIPATING DWELLING. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased except as may be required to comply with the applicable noise regulations of the Illinois Pollution Control Board.
 - c. Additional separation may be required to ensure that the noise level required by 35 Ill. Admin. Code Parts 900, 901 and 910 is not exceeded.
- (4) A separation of at least 500 feet from any of the following unless the SPECIAL USE Permit application includes results provided from an analysis using the Solar Glare Hazard Analysis Tool (SGHAT) for the Airport Traffic Control Tower cab and final approach paths, consistent with the Interim Policy, Federal Aviation Administration (FAA) Review of Solar Energy Projects on Federally Obligated Airports, or the most recent version adopted by the FAA, and the SGHAT results show no detrimental affect with less than a 500 feet separation from any of the following:
 - a. any AIRPORT premises or any AIRPORT approach zone within five miles of the end of the AIRPORT runway; or

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- b. any RESTRICTED LANDING AREA that is NONCONFORMING or which has been authorized by SPECIAL USE Permit and that existed on or for which there had been a complete SPECIAL USE Permit application received by April 22, 2010, or any approach zone for any such RESTRICTED LANDING AREA; or
 - c. any RESIDENTIAL AIRPORT that existed on or for which there had been a complete SPECIAL USE Permit application received by April 22, 2010, or any approach zone for any such RESIDENTIAL AIRPORT.
- (5) A separation of at least 500 feet between substations and transmission lines of greater than 34.5 kVA to adjacent dwellings and residential DISTRICTS.
- (6) Electrical inverters shall be located as far as possible from property lines and adjacent DWELLINGS consistent with good engineering practice. Inverter locations that are less than 275 feet from the perimeter fence shall require specific approval and may require special sound deadening construction and noise analysis.
- E. Standard Conditions for Design and Installation of any PV SOLAR FARM.
- (1) Any building that is part of a PV SOLAR FARM shall include as a requirement for a Zoning Compliance Certificate, a certification by an Illinois Professional Engineer or Illinois Licensed Structural Engineer or other qualified professional that the constructed building conforms to Public Act 96-704 regarding building code compliance and conforms to the Illinois Accessibility Code.
- (2) Electrical Components
- a. All electrical components of the PV SOLAR FARM shall conform to the National Electrical Code as amended and shall comply with Federal Communications Commission (FCC) requirements.
 - b. Burying power and communication wiring underground shall be minimized consistent with best management practice regarding PV SOLAR FARM construction and minimizing impacts on agricultural drainage tile.
- (3) Maximum Height. The height limitation established in Section 5.3 shall not apply to a PV SOLAR FARM. The maximum height of all above ground STRUCTURES shall be identified in the application and as approved in the SPECIAL USE Permit. No component of a solar panel shall have a height of more than 20 feet above ground when the solar

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

arrays are at full tilt. This height limit is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.

(4) Warnings

a. A reasonably visible warning sign concerning voltage must be placed at the base of all pad-mounted transformers and substations.

(5) No construction may intrude on any easement or right-of-way for a GAS PIPELINE or HAZARDOUS LIQUID PIPELINE, an underground water main or sanitary sewer, a drainage district ditch or tile, or any other public utility facility unless specifically authorized by a crossing agreement that has been entered into with the relevant party.

F. Standard Conditions to Mitigate Damage to Farmland

(1) All underground wiring or cabling for the PV SOLAR FARM shall be at a minimum depth as established by the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.

(2) Protection of agricultural drainage tile

a. Protection of agricultural drainage tile shall comply with the Agriculture Impact Mitigation Agreement with the Illinois Department of Agriculture as required by Section 6.1.7 R.

b. The applicant shall endeavor to locate all existing agricultural drainage tile prior to establishing any construction staging areas, construction of any necessary PV SOLAR FARM access lanes or driveways, construction of any PV SOLAR FARM STRUCTURES, any common switching stations, substations, and installation of underground wiring or cabling. The applicant shall contact affected landowners and tenants and the Champaign County Soil and Water Conservation District and any relevant drainage district for their knowledge of tile line locations prior to the proposed construction. Drainage districts shall be notified at least two weeks prior to any likely disruption of a drainage district tile.

c. The location of drainage district tile lines shall be identified prior to any construction and drainage district tile lines shall be protected from disturbance as follows:

(a) All identified drainage district tile lines and any known existing drainage district tile easement shall be staked or flagged prior to construction to alert construction crews of

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

the presence of drainage district tile and the related easement.

- (b) Any drainage district tile for which there is no existing easement shall be protected from disturbance by a 30 feet wide no-construction buffer on either side of the drainage district tile. The no-construction buffer shall be staked or flagged prior to the start of construction and shall remain valid for the lifetime of the PV SOLAR FARM SPECIAL USE Permit and during any deconstruction activities that may occur pursuant to the PV SOLAR FARM SPECIAL USE Permit.
- (c) Construction shall be prohibited within any existing drainage district easement and also prohibited within any 30 feet wide no-construction buffer on either side of drainage district tile that does not have an existing easement unless specific construction is authorized in writing by all commissioners of the relevant drainage district. A copy of the written authorization shall be provided to the Zoning Administrator prior to the commencement of construction.
- d. Any agricultural drainage tile located underneath construction staging areas, access lanes, driveways, any common switching stations, and substations shall be replaced as required in Section 6.3 of the Champaign County Storm Water Management and Erosion Control Ordinance.
- e. Any agricultural drainage tile that must be relocated shall be relocated as required in the Champaign County Storm Water Management and Erosion Control Ordinance and consistent with the Agriculture Impact Mitigation Agreement with the Illinois Department of Agriculture.
- f. The applicant shall coordinate with the drainage district and provide a drainage district 48 hours to inspect all trenches and/or excavations in the vicinity of suspected drainage district tile locations in order to verify any damage or disturbance to drainage district tile.
- g. Conformance of any relocation and/or repair of drainage district tile with the Champaign County Storm Water Management and Erosion Control Ordinance shall be certified by an Illinois Professional Engineer. Written approval by the drainage district shall be received prior to any backfilling of the relocated and/or repaired drain tile and a copy of the approval shall be submitted to the Zoning Administrator. As-built drawings of any relocated

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

and/or repaired district tile shall be provided to both the relevant drainage district and the Zoning Administrator.

- h. All tile lines that are damaged, cut, or removed shall be staked or flagged in such manner that they will remain visible until the permanent repairs are completed. [In addition, the location of damaged drain tile lines shall be recorded using Global Positioning Systems \(GPS\) technology.](#)
 - i. All exposed tile lines shall be screened or otherwise protected to prevent the entry into the tile of foreign materials, loose soil, small mammals, etc.
 - j. Permanent tile repairs shall be made within 14 days of the tile damage provided that weather and soil conditions are suitable or a temporary tile repair shall be made. Immediate temporary repair shall also be required if water is flowing through any damaged tile line. Temporary repairs are not needed if the tile lines are dry and water is not flowing in the tile provided the permanent repairs can be made within 14 days of the damage. All permanent and temporary tile repairs shall be made as detailed in the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5R. and shall not be waived or modified except as authorized in the SPECIAL USE Permit.
 - k. All damaged tile shall be repaired so as to operate as well after construction as before the construction began.
- (3) All soil conservation practices (such as terraces, grassed waterways, etc.) that are damaged by PV SOLAR FARM construction and/or decommissioning shall be restored by the applicant to the pre-PV SOLAR FARM construction condition in a manner consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.
- (4) Topsoil replacement
- All topsoil shall be placed in a manner consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.
- (5) Mitigation of soil compacting and rutting
- a. The Applicant shall not be responsible for mitigation of soil compaction and rutting if exempted by the PV SOLAR FARM lease.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- b. All mitigation of soil compaction and rutting shall be consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.
- (6) Land leveling
- a. The Applicant shall not be responsible for leveling of disturbed land if exempted by the PV SOLAR FARM lease.
 - b. All land leveling shall be consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.
- (7) Permanent Erosion and Sedimentation Control Plan
- a. Prior to the approval of any Zoning Use Permit, the Applicant shall provide a permanent soil erosion and sedimentation plan for the PV SOLAR FARM including any access road that conforms to the relevant Natural Resources Conservation Service guidelines and that is prepared by an Illinois Licensed Professional Engineer.
 - b. As-built documentation of all permanent soil erosion and sedimentation improvements for the PV SOLAR FARM including any access road prepared by an Illinois Licensed Professional Engineer shall be submitted and accepted by the Zoning Administrator prior to approval of any Zoning Compliance Certificate.
- (8) Retention of all topsoil
- No topsoil may be removed, stripped, or sold from the proposed SPECIAL USE Permit site pursuant to or as part of the construction of the PV SOLAR FARM.
- (9) Minimize disturbance to BEST PRIME FARMLAND
- a. Any PV SOLAR FARM to be located on BEST PRIME FARMLAND shall minimize the disturbance to BEST PRIME FARMLAND as follows:
 - (a) The disturbance to BEST PRIME FARMLAND caused by construction and operation of the PV SOLAR FARM shall be minimized at all times consistent with good engineering practice.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- (b) Disturbance to BEST PRIME FARMLAND shall be offset by establishment of a vegetative ground cover within the PV SOLAR FARM that includes the following:
 - i. The vegetative ground cover shall use native plant species as much as possible and shall be based on a site assessment of the site geography and soil conditions.
 - ii. The species selected shall serve a secondary habitat purpose as much as possible.
 - iii. Maintenance of the vegetative ground cover shall use a combination of management approaches to ensure safe, cost-effective, reliable maintenance while minimizing environmental risks.
 - iv. The plan to establish and maintain a vegetative ground cover that includes native plant species as much as possible shall be detailed in a landscape plan included in the PV SOLAR FARM SPECIAL USE Permit application. The landscape plan shall include the weed control plan required by Section 6.1.7 P.3.

G. Standard Conditions for Use of Public Streets

Any PV SOLAR FARM Applicant proposing to use any County Highway or a township or municipal STREET for the purpose of transporting PV SOLAR FARM or Substation parts and/or equipment for construction, operation, or maintenance of the PV SOLAR FARM or Substation(s), shall identify all such public STREETS and pay the costs of any necessary permits and the costs to repair any damage to the STREETS specifically and uniquely attributable to the PV SOLAR FARM construction, as follows:

- (1) Prior to the close of the public hearing before the BOARD, the Applicant shall enter into a Roadway Upgrade and Maintenance agreement approved by the County Engineer and State’s Attorney; or Township Highway Commissioner; or municipality where relevant, except for any COMMUNITY PV SOLAR FARM for which the relevant highway authority has agreed in writing to waive the requirements of subparagraphs 6.1.7 G.1, 6.1.7 G.2, and 6.1.7 G.3, and the signed and executed Roadway Upgrade and Maintenance agreements must provide for the following minimum conditions:
 - a. The applicant shall agree to conduct a pre-PV SOLAR FARM construction baseline survey to determine existing STREET

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

conditions for assessing potential future damage including the following:

- (a) A videotape of the affected length of each subject STREET supplemented by photographs if necessary.
 - (b) Pay for costs of the County to hire a consultant to make a study of any structure on the proposed route that the County Engineer feels may not carry the loads likely during the PV SOLAR FARM construction.
 - (c) Pay for any strengthening of STREET structures that may be necessary to accommodate the proposed traffic loads caused by the PV SOLAR FARM construction.
- b. The Applicant shall agree to pay for costs of the County Engineer to hire a consultant to make a study of any structure on the proposed route that the County Engineer feels may not carry the loads likely during the PV SOLAR FARM construction and pay for any strengthening of structures that may be necessary to accommodate the proposed traffic loads caused by the PV SOLAR FARM construction.
 - c. The Applicant shall agree upon an estimate of costs for any other necessary roadway improvements prior to construction.
 - d. The Applicant shall obtain any necessary approvals for the STREET improvements from the relevant STREET maintenance authority.
 - e. The Applicant shall obtain any necessary Access Permits including any required plans.
 - f. The Applicant shall erect permanent markers indicating the presence of underground cables.
 - g. The Applicant shall install marker tape in any cable trench.
 - h. The Applicant shall become a member of the Illinois state wide One-Call Notice System (otherwise known as the Joint Utility Locating Information for Excavators or “JULIE”) and provide JULIE with all of the information necessary to update its record with respect to the PV SOLAR FARM.
 - i. The Applicant shall use directional boring equipment to make all crossings of County Highways for the cable collection system.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- j. The Applicant shall notify the STREET maintenance authority in advance of all oversize moves and crane crossings.
- k. The Applicant shall provide the County Engineer with a copy of each overweight and oversize permit issued by the Illinois Department of Transportation for the PV SOLAR FARM construction.
- l. The Applicant shall transport the PV SOLAR FARM loads so as to minimize adverse impact on the local traffic including farm traffic.
- m. The Applicant shall schedule PV SOLAR FARM construction traffic in a way to minimize adverse impacts on emergency response vehicles, rural mail delivery, school bus traffic, and local agricultural traffic.
- n. The Applicant shall provide as much advance notice as in commercially reasonable to obtain approval of the STREET maintenance authority when it is necessary for a STREET to be closed due to a crane crossing or for any other reason. Notwithstanding the generality of the aforementioned, the Applicant will provide 48 hours notice to the extent reasonably practicable.
- o. The Applicant shall provide signs indicating all highway and STREET closures and work zones in accordance with the Illinois Department of Transportation Manual on Uniform Traffic Control Devices.
- p. The Applicant shall establish a single escrow account and a single Irrevocable Letter of Credit for the cost of all STREET upgrades and repairs pursuant to the PV SOLAR FARM construction.
- q. The Applicant shall notify all relevant parties of any temporary STREET closures.
- r. The Applicant shall obtain easements and other land rights needed to fulfill the Applicant's obligations under this Agreement.
- s. The Applicant shall agree that the County shall design all STREET upgrades in accordance with the most recent edition of the IDOT Bureau of Local Roads and Streets Manual.
- t. The Applicant shall provide written Notice to Proceed to the relevant STREET maintenance authority by December 31 of each year that identifies the STREETS to be upgraded during the following year.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- u. The Applicant shall provide dust control and grading work to the reasonable satisfaction of the County Engineer on STREETS that become aggregate surface STREETS.
 - v. The Applicant shall conduct a post-PV SOLAR FARM construction baseline survey similar to the pre-PV SOLAR FARM construction baseline survey to identify the extent of repairs necessary to return the STREETS to the pre-PV SOLAR FARM construction condition.
 - w. The Applicant shall pay for the cost of all repairs to all STREETS that are damaged by the Applicant during the construction of the PV SOLAR FARM and restore such STREETS to the condition they were in at the time of the pre-PV SOLAR FARM construction inventory.
 - x. All PV SOLAR FARM construction traffic shall exclusively use routes designated in the approved Transportation Impact Analysis.
 - y. The Applicant shall provide liability insurance in an acceptable amount to cover the required STREET construction activities.
 - z. The Applicant shall pay for the present worth costs of life consumed by the construction traffic as determined by the pavement management surveys and reports on the roads which do not show significant enough deterioration to warrant immediate restoration.
 - aa. Provisions for expiration date on the agreement.
 - bb. Other conditions that may be required.
- (2) A condition of the County Board SPECIAL USE Permit approval shall be that the Zoning Administrator shall not authorize a Zoning Use Permit for the PV SOLAR FARM until the County Engineer and State’s Attorney, or Township Highway Commissioner, or municipality where relevant, has approved a Transportation Impact Analysis provided by the Applicant and prepared by an independent engineer that is mutually acceptable to the Applicant and the County Engineer and State’s Attorney, or Township Highway Commissioner, or municipality where relevant, that includes the following:
- a. Identify all such public STREETS or portions thereof that are intended to be used by the Applicant during construction of the PV SOLAR FARM as well as the number of loads, per axle weight of each load, and type of equipment that will be used to transport each load.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- b. A schedule of the across road culverts and bridges affected by the project and the recommendations as to actions, if any, required with respect to such culverts and bridges and estimates of the cost to replace such culverts and bridges.
 - c. A schedule of the anticipated STREET repair costs to be made in advance of the PV SOLAR FARM construction and following construction of the PV SOLAR FARM.
 - d. The Applicant shall reimburse the County Engineer, or Township Highway Commissioner, or municipality where relevant, for all reasonable engineering fees including the cost of a third-party consultant, incurred in connection with the review and approval of the Transportation Impact Analysis.
- (3) At such time as decommissioning takes place, the Applicant or its successors in interest shall enter into a Roadway Use and Repair Agreement with the appropriate highway authority.
- H. Standard Conditions for Coordination with Local Fire Protection District
- (1) The Applicant shall submit to the local fire protection district a copy of the site plan.
 - (2) Upon request by the local fire protection district, the Owner or Operator shall cooperate with the local fire protection district to develop the fire protection district's emergency response plan.
 - (3) Nothing in this section shall alleviate the need to comply with all other applicable fire laws and regulations.
- I. Standard Conditions for Allowable Noise Level
- (1) Noise levels from any PV SOLAR FARM shall be in compliance with the applicable Illinois Pollution Control Board (IPCB) regulations (*35 Illinois Administrative Code*, Subtitle H: Noise, Parts 900, 901, 910). This is a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.
 - (2) The Applicant shall submit manufacturer's sound power level characteristics and other relevant data regarding noise characteristics of proposed PV SOLAR FARM equipment necessary for a competent noise analysis.
 - (3) The Applicant, through the use of a qualified professional, as part of the siting approval application process, shall appropriately demonstrate compliance with the above noise requirements as follows:

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- a. The SPECIAL USE Permit application for other than a COMMUNITY PV SOLAR FARM shall include a noise analysis that includes the following:
 - (a) The pre-development 24-hour ambient background sound level shall be identified at representative locations near the site of the proposed PV SOLAR FARM.
 - (b) Computer modeling shall be used to generate the anticipated sound level resulting from the operation of the proposed PV SOLAR FARM within 1,500 feet of the proposed PV SOLAR FARM.
 - (c) Results of the ambient background sound level monitoring and the modeling of anticipated sound levels shall be clearly stated in the application and the application shall include a map of the modeled noise contours within 1,500 feet of the proposed PV SOLAR FARM.
 - (d) The application shall also clearly state the assumptions of the computer model's construction and algorithms so that a competent and objective third party can as simply as possible verify the anticipated sound data and sound levels.
 - b. For a COMMUNITY PV SOLAR FARM the Board may require submission of a noise analysis that meets the standard of paragraph 6.1.7 G.(3)a.
- (4) After construction of the PV SOLAR FARM, the Zoning Administrator shall take appropriate enforcement action as necessary to investigate noise complaints in order to determine the validity of the complaints and take any additional enforcement action as proves warranted to stop any violation that is occurring, including but not limited to the following:
- a. The Zoning Administrator shall make the Environment and Land Use Committee aware of complaints about noise that have been received by the Complaint Hotline.
 - b. If the Environment and Land Use Committee determines that the noise is excessive, the Environment and Land Use Committee shall require the Owner or Operator to take responsible steps to mitigate the excessive noise.
- J. Standard Conditions for Endangered Species Consultation

The Applicant shall apply for consultation with the Endangered Species Program of the Illinois Department of Natural Resources. The application shall include a copy of the Agency Action Report from the Endangered Species Program of the

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

Illinois Department of Natural Resources or, if applicable, a copy of the Detailed Action Plan Report submitted to the Endangered Species Program of the Illinois Department of Natural Resources and a copy of the response from the Illinois Department of Natural Resources.

K. Standard Conditions for Historic and Archaeological Resources Review

The Applicant shall apply for consultation with the State Historic Preservation Officer of the Illinois Department of Natural Resources. The application shall include a copy of the Agency Action Report for the State Historic Preservation Officer of the Illinois Department of Natural Resources.

L. Standard Conditions for Acceptable Fish and Wildlife Impacts

The applicant shall apply for consultation with the United States Fish and Wildlife Service's Information for Planning and Consulting environmental review or a comparable successor tool that is consistent with any applicable United States Fish and Wildlife Service solar wildlife guidelines that have been subject to public review. The application shall include a copy of the consultation review by the U.S. Fish and Wildlife Service.

M. Screening and Fencing

(1) Perimeter fencing

- a. PV SOLAR FARM equipment and structures shall be fully enclosed and secured by a fence with a minimum height of 6 feet and no more than 25 feet. This limit on fence height is a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.
- b. Knox boxes and keys shall be provided at locked entrances for emergency personnel access.
- c. Vegetation between the fencing and the LOT LINE shall be maintained such that NOXIOUS WEEDS are controlled or eradicated consistent with the Illinois Noxious Weed Law (505 ILCS 100/1 *et. seq.*). Management of the vegetation shall be explained in the application.

(2) Screening

- a. A visual screen shall be provided around the perimeter of the PV SOLAR FARM as follows:
 - (a) The visual screen shall be provided for any part of the PV SOLAR FARM that is visible to and located within 1,000 feet of an existing DWELLING or residential DISTRICT except that the visual screen may not be required within the

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

full 1,000 feet of an existing DWELLING or residential DISTRICT provided the Applicant submits a landscape plan prepared by an Illinois Registered Landscape Architect and the BOARD finds that the visual screen in the landscape plan provides adequate screening. However, the visual screen shall not be required if the PV SOLAR FARM is not visible to a DWELLING or residential DISTRICT by virtue of the existing topography.

- (b) The visual screen shall be waived if the owner(s) of a relevant DWELLING(S) have agreed in writing to waive the screening requirement and a copy of the written waiver is submitted to the BOARD or GOVERNING BODY.
- (c) The visual screen shall be a vegetated buffer as follows:
 - i. A vegetated visual screen buffer that shall include a continuous line of native evergreen foliage and/or native shrubs and/or native trees and/or any existing wooded area and/or plantings of tall native grasses and other native flowering plants and/or an area of agricultural crop production that will conceal the PV SOLAR FARM from view from adjacent abutting property may be authorized as an alternative visual screen subject to specific conditions.
 - ii. Any vegetation that is part of the approved visual screen buffer shall be maintained in perpetuity of the PV SOLAR FARM. If the evergreen foliage below a height of 7 feet disappears over time, the screening shall be replaced.
 - iii. The continuous line of native evergreen foliage and/or native shrubs and/or native trees shall be planted at a minimum height of 5 feet tall and shall be planted in multiple rows as required to provide a 50% screen within 2 years of planting. The planting shall otherwise conform to Natural Resources Conservation Service Practice Standard 380 Windbreak/Shelterbreak Establishment except that the planting shall be located as close as possible to the PV SOLAR FARM fence while still providing adequate clearance for maintenance.
 - iv. A planting of tall native grasses and other native flowering plants may be used as a visual screen buffer for any PV module installation that is no more than

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

8 feet tall provided that the width of planting shall be authorized by the BOARD and the planting shall otherwise be planted and maintained per the recommendations of the Natural Resources Conservation Service Practice Standard 327 Conservation Cover and further provided that the PV SOLAR FARM perimeter fence is opaque.

- v. An area of agricultural crop production may also be authorized by the BOARD as an alternative visual screen buffer with a width of planting as authorized by the BOARD provided that the PV SOLAR FARM perimeter fence is opaque. Any area of crop production that is used as a vegetated visual screen shall be planted annually and shall be replanted as necessary to ensure a crop every year regardless of weather or market conditions.
- vi. Any vegetated screen buffer shall be detailed in a landscape plan drawing that shall be included with the PV SOLAR FARM SPECIAL USE Permit application.

N. Standard Conditions to Minimize Glare

- (1) The design and construction of the PV SOLAR FARM shall minimize glare that may affect adjacent properties and the application shall include an explanation of how glare will be minimized.
- (2) After construction of the PV SOLAR FARM, the Zoning Administrator shall take appropriate enforcement action as necessary to investigate complaints of glare in order to determine the validity of the complaints and take any additional enforcement action as proves warranted to stop any significant glare that is occurring, including but not limited to the following:
 - a. The Zoning Administrator shall make the Environment and Land Use Committee aware of complaints about glare that have been received by the Complaint Hotline.
 - b. If the Environment and Land Use Committee determines that the glare is excessive, the Environment and Land Use Committee shall require the Owner or Operator to take reasonable steps to mitigate the excessive glare such as the installation of additional screening.

O. Standard Condition for Liability Insurance

- (1) The Owner or Operator of the PV SOLAR FARM shall maintain a current general liability policy covering bodily injury and property damage with

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

minimum limits of at least \$5 million per occurrence and \$520 million in the aggregate.

- (2) The general liability policy shall identify landowners in the SPECIAL USE Permit as additional insured.

P. Operational Standard Conditions

(1) Maintenance

- a. The Owner or Operator of the PV SOLAR FARM must submit, on an annual basis, a summary of operation and maintenance reports to the Environment and Land Use Committee and any other operation and maintenance reports as the Environment and Land Use Committee reasonably requests.
- b. Any physical modification to the PV SOLAR FARM that increases the number of solar conversion devices or structures and/or the land area occupied by the PV SOLAR FARM shall require a new County BOARD SPECIAL USE Permit. Like-kind replacements shall not require recertification nor will replacement of transformers, cabling, etc. provided replacement is done in fashion similar to the original installation.
- c. The Application shall explain methods and materials used to clean the PV SOLAR FARM equipment including an estimation of the daily and annual gallons of water used and the source of the water and management of wastewater. The BOARD may request copies of well records from the Illinois State Water Survey and may require an estimate by a qualified hydrogeologist of the likely impact on adjacent waterwells.

(2) Materials Handling, Storage and Disposal

- a. All solid wastes related to the construction, operation and maintenance of the PV SOLAR FARM shall be removed from the site promptly and disposed of in accordance with all Federal, State and local laws.
- b. All hazardous materials related to the construction, operation and maintenance of the PV SOLAR FARM shall be handled, stored, transported and disposed of in accordance with all applicable local, State and Federal laws.

(3) Vegetation management

- a. The PV SOLAR FARM SPECIAL USE Permit application shall include a weed control plan for the total area of the SPECIAL USE

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

Permit including areas both inside of and outside of the perimeter fencing.

- b. The weed control plan shall ensure the control and/or eradication of NOXIOUS WEEDS consistent with the Illinois Noxious Weed Law (55 ILCS 100/1 *et. seq.*).
- c. The weed control plan shall be explained in the application.

Q. Standard Conditions for Decommissioning and Site Reclamation Plan

- (1) The Applicant shall submit a signed decommissioning and site reclamation plan conforming to the requirements of paragraph 6.1.1A. **and matching the overall deconstruction and land restoration requirements of the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.** The decommissioning and deconstruction requirements of the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture is a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.
- (2) In addition to the purposes listed in subparagraph 6.1.1A.4., the decommissioning and site reclamation plan shall also include provisions for anticipated repairs to any public STREET used for the purpose of reclamation of the PV SOLAR FARM and all costs related to removal of access driveways.
- (3) The decommissioning and site reclamation plan required in paragraph 6.1.1A. shall also include the following:
 - a. A stipulation that the applicant or successor shall notify the GOVERNING BODY by certified mail of the commencement of voluntary or involuntary bankruptcy proceeding, naming the applicant as debtor, within ten days of commencement of proceeding.
 - b. A stipulation that the applicant shall agree that the sale, assignment in fact or law, or such other transfer of applicant's financial interest in the PV SOLAR FARM shall in no way affect or change the applicant's obligation to continue to comply with the terms of this plan. Any successor in interest, assignee, and all parties to the decommissioning and site reclamation plan shall assume the terms, covenants, and obligations of this plan and agrees to assume all reclamation liability and responsibility for the PV SOLAR FARM.
 - c. Authorization for the GOVERNING BODY and its authorized representatives for right of entry onto the PV SOLAR FARM premises for the purpose of inspecting the methods of reclamation or for performing actual reclamation if necessary.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- d. A stipulation that at such time as decommissioning takes place the Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan are required to enter into a Roadway Use and Repair Agreement with the relevant highway authority.
- e. A stipulation that the Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall provide evidence of any new, additional, or substitute financing or security agreement to the Zoning Administrator throughout the operating lifetime of the project.
- f. A stipulation that the Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall be obliged to perform the work in the decommissioning and site reclamation plan before abandoning the PV SOLAR FARM or prior to ceasing production of electricity from the PV SOLAR FARM, after it has begun, other than in the ordinary course of business. This obligation shall be independent of the obligation to pay financial assurance and shall not be limited by the amount of financial assurance. The obligation to perform the reclamation work shall constitute a covenant running with the land.
- g. The decommissioning and site reclamation plan shall provide for payment of any associated costs that Champaign COUNTY may incur in the event that decommissioning is actually required. Associated costs include all administrative and ancillary costs associated with drawing upon the financial assurance and performing the reclamation work and shall include but not be limited to: attorney's fees; construction management and other professional fees; and, the costs of preparing requests for proposals and bidding documents required to comply with State law or Champaign COUNTY purchasing policies.
- h. The depth of removal of foundation concrete below ground shall be a minimum of 54 inches as required in the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture. The depth of removal of foundation concrete shall be certified in writing by an Illinois Licensed Professional Engineer and the certification shall be submitted to the Zoning Administrator.
- i. Underground electrical cables of a depth of 5 feet or greater may be left in place.
- j. The hole resulting from the removal of foundation concrete during decommissioning shall be backfilled as follows: as required in the

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.

(a) — The excavation resulting from the removal of foundation concrete shall only be backfilled with subsoil and topsoil in similar depths and similar types as existed at the time of the original PV SOLAR FARM construction except that a lesser quality topsoil or a combination of a lesser quality topsoil and a subsoil that is similar to the native subsoil may be used at depths corresponding to the native subsoil but not less than 12 inches below grade.

(b) — The native soils excavated at the time of the original PV SOLAR FARM construction may be used to backfill the concrete foundation excavations at the time of decommissioning provided that the soils are adequately stored throughout the operating lifetime of the PV SOLAR FARM. The methods for storing the excavated native soils during the operating lifetime of the PV SOLAR FARM shall be included in the decommissioning and site reclamation plan.

(c) — If the excavated native soils are not stored for use for backfilling the concrete foundation excavations, a qualified soil scientist of Illinois Licensed Professional Engineer shall certify that the actual soils used to backfill the concrete foundation excavations are of equal or greater quality than the native soils or that, in the case of subsoil, the backfill soil meets the requirements of this paragraph. The certification shall be submitted to the Zoning Administrator.

(d) — An Illinois Licensed Professional Engineer shall certify in writing that the concrete foundation excavations have been backfilled with soil to such a depth and with a minimum of compaction that is consistent with the restoration of productive agricultural use such that the depth of soil is expected to be no less than 54 inches within one year after backfilling.

- k. A stipulation that should the decommissioning and site reclamation plan be deemed invalid by a court of competent jurisdiction the PV SOLAR FARM SPECIAL USE Permit shall be deemed void.
- l. A stipulation that the Applicant's obligation to complete the decommissioning and site reclamation plan and to pay all associated costs shall be independent of the Applicant's obligation to provide financial assurance.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- m. A stipulation that the liability of the Applicant’s failure to complete the decommissioning and site reclamation plan or any breach of the decommissioning and site reclamation plan requirement shall not be capped by the amount of financial assurance.
 - n. If the Applicant desires to remove equipment or property credited to the estimated salvage value without the concurrent replacement of the property with property of equal or greater salvage value, or if the Applicant installs equipment or property increasing the cost of decommissioning after the PV SOLAR FARM begins to produce electricity, at any point, the Applicant shall first obtain the consent of the Zoning Administrator. If the Applicant’s lien holders remove equipment or property credited to the salvage value, the Applicant shall promptly notify the Zoning Administrator. In either of these events, the total financial assurance shall be adjusted to reflect any change in total salvage value and total decommissioning costs resulting from any such removal or installation.
- (4) To comply with paragraph 6.1.1A.5., the Applicant shall provide financial assurance in the form of an irrevocable letter of credit as follows:

a. ~~At the time of SPECIAL USE Permit approval, the amount of financial assurance to be provided for the decommissioning and site reclamation plan shall be 125% of the decommissioning cost as determined in the independent engineer’s cost estimate to complete the decommissioning work described in Section 6.1.1A.4.a. and 6.1.1A.4.b., and 6.1.1A.4c. and shall otherwise be compliant with Section 6.1.1A.5. except that if the PV SOLAR FARM modules have an unlimited warranty of at least 10 years and also have a limited power warranty to provide not less than 80% nominal power output up to 25 years and proof of that warranty is provided at the time of Zoning Use Permit approval, financial assurance may be provided for the decommissioning and site reclamation plan as follows:~~

~~a. (a)~~—No Zoning Use Permit to authorize construction of the PV SOLAR FARM shall be authorized by the Zoning Administrator until the PV SOLAR FARM owner shall provide the COUNTY with financial assurance to cover ~~12.5%-10%~~ of the decommissioning and site reclamation cost as determined in the independent engineer’s cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

~~b.(b)~~ On or before the sixth anniversary of the Commercial Operation Date, the PV SOLAR FARM Owner shall provide the COUNTY with Financial Assurance to cover ~~62.5%~~ 50% of the decommissioning and site reclamation cost as determined in the independent engineer’s cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5.

~~c.(c)~~ On or before the eleventh anniversary of the Commercial Operation Date, the PV SOLAR FARM Owner shall provide the COUNTY with Financial Assurance to cover ~~125%~~ 100% of the decommissioning and site reclamation cost as determined in the independent engineer’s cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5. and as determined in the updated decommissioning and site reclamation plan filed with the County on or before the end of the tenth year of commercial operation.

~~b.d.~~ Net salvage value may be deducted for decommissioning costs as follows:

- (a) One of the following standards shall be met:
 - i. The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall maintain the PV SOLAR FARM free and clear of liens and encumbrances, including financing liens and shall provide proof of the same prior to issuance of the SPECIAL USE Permit; or
 - ii. The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall deduct from the salvage value credit the amount of any lien or encumbrance on the PV SOLAR FARM; or
 - iii. Any and all financing and/or financial security agreements entered into by the Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall expressly provide that the agreements are subject to the covenant required by Section 6.1.1A.2 that the reclamation work be done.
- (b) The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

provide proof of compliance with paragraph 6.1.7 M.4.b.(1). prior to the issuance of any Zoning Use Permit and upon every renewal of the financial assurance and at any other time upon the request of the Zoning Administrator.

- (c) The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall provide in the decommissioning and site reclamation plan for legal transfer of the STRUCTURE to the demolisher to pay the costs of reclamation work, should the reclamation work be performed.
- (d) The net estimated salvage value that is deducted from the estimated decommissioning costs shall be the salvage value that results after all related costs for demolition and any required preparation for transportation for reuse or recycling or for simple disposal and other similar costs including but not limited to the decommissioning of the PV SOLAR FARM STRUCTURES, equipment, and access roads.
- (e) Estimated salvage value shall be based on the average salvage price of the past five years as published in a reputable source for salvage values and shall reflect sound engineering judgement as to anticipated changes in salvage prices prior to the next update of estimated net salvage value.

- ~~(f) — The deduction from the estimated decommissioning costs for net estimated salvage value shall be capped at 70% of the total net estimated salvage value even though the total actual salvage value shall be available in the event that decommissioning is actually required.~~
- ~~(g) — The total financial assurance after deduction of the net estimated salvage value shall not be less than \$1,000 per acre.~~
- ~~(h) — The credit for net estimated salvage value attributable to any PV SOLAR FARM may not exceed the estimated cost of removal of the above-ground portion of that PV SOLAR FARM on the subject site.~~

ee. The GOVERNING BODY has the right to require multiple letters of credit based on the regulations governing federal insurance for deposits.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

ef. The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall adjust the amount of the financial assurance to ensure that it reflects current and accurate information as follows:

(a) ~~At least once every three years for the first 12 years of the financial assurance and at least once every two years thereafter or, if the PV SOLAR FARM modules have an unlimited warranty of a least 10 years and also have a limited power warranty to provide not less than 80% nominal power output up to 25 years and proof of that warranty is provided at the time of Zoning Use Permit approval, then at least once every five years for the first 25 years of the financial assurance and at least once every two years thereafter, the Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall use an independent Illinois Licensed Professional Engineer to provide updated estimates of decommissioning costs and salvage value, by including any changes due to inflation and/or change in salvage price. The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall, upon receipt, provide a copy of the adjusted Professional Engineer's report to the Zoning Administrator. The Applicant or its successors in interest shall file an updated decommissioning and site reclamation plan with the County on or before the end of the tenth year of commercial operation.~~

(b) The County shall reevaluate the estimated costs of decommissioning and site reclamation every five years after the tenth anniversary of the commercial operation date. The solar farm owner shall provide an updated estimated cost of decommissioning and site reclamation that is provided by an independent Illinois licensed professional engineer.

(bc) At all times, the value of the irrevocable letter of credit shall equal or exceed the amount of the independent engineer's cost estimate as increased by known and documented rates of inflation based on the Consumer Price Index since the PV SOLAR FARM was approved.

eg. The long term corporate debt (credit) rating of the letter of credit issuing financial institution by both Standard & Poor's Financial Services LLC (S&P) and Moody's Investors Service (Moody's) shall be equal to or greater than the minimum acceptable long term corporate debt (credit) rating, as follows:

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- (a) The Zoning Administrator shall verify the long term corporate debt (credit) rating of the proposed financial institution by Standard and Poor’s Financial Services LLC (S&P) and/or Moody’s Investors Service (Moody’s) and/or the Kroll Bond Rating Agency.
- (b) The minimum acceptable long term corporate debt (credit) rating of the proposed financial institution shall be a rating of “A-” by S&P or a rating of “A3” by Moody’s, or a rating of “A-” by Kroll Bond Rating Agency.
- (c) Whenever the most current long term corporate debt (credit) rating of the proposed financial institution by either S&P, Moody’s, or Kroll Bond Rating Agency is lower than the minimum acceptable long term corporate debt (credit) rating, the letter of credit shall be replaced with a new irrevocable letter of credit from an issuing financial institution whose most current long term corporate debt (credit) rating by either S&P, Moody’s, or Kroll Bond Rating Agency meets or exceeds the minimum acceptable long term corporate debt (credit) rating.

~~f. At all times the value of the irrevocable letter of credit shall be increased annually as necessary to reflect actual rates of inflation over the life span of the PV SOLAR FARM and the amount shall be equal to or exceed 125% of the amount of the independent engineer’s cost estimate as increased by known and documented rates of inflation since the PV SOLAR FARM was approved.~~

gh. Should the salvage value of components be adjusted downward or the decommissioning costs adjusted upward pursuant to paragraph 6.1.7 Q.4.d., the amount of the irrevocable letter of credit pursuant to this paragraph 6.1.7 Q.4. shall be increased to reflect the adjustment, as if the adjusted estimate were the initial estimate.

hi. Any financial assurance required per the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R. shall count towards the total financial assurance required for compliance with paragraph 6.1.1A.5.

ij. Unless the Governing Body approves otherwise, the Champaign County State’s Attorney’s Office shall review and approve every Letter of Credit prior to acceptance by the Zoning Administrator.

~~(5) In addition to the conditions listed in subparagraph 6.1.1A.9. the Zoning Administrator may also draw on the funds for the following reasons:~~

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- a. In the event that any PV SOLAR FARM or component thereof ceases to be functional for more than six consecutive months after it starts producing electricity and the Owner is not diligently repairing such PV SOLAR FARM or component.
- b. In the event that the Owner declares the PV SOLAR FARM or any PV SOLAR FARM component to be functionally obsolete for tax purposes.
- e. There is a delay in the construction of any PV SOLAR FARM of more than 6 months after construction on that PV SOLAR FARM begins.
- d. Any PV SOLAR FARM or component thereof that appears in a state of disrepair or imminent collapse and/or creates an imminent threat to the health or safety of the public or any person.
- e. Any PV SOLAR FARM or component thereof that is otherwise derelict for a period of 6 months.
- f. The PV SOLAR FARM is in violation of the terms of the PV SOLAR FARM SPECIAL USE Permit for a period exceeding ninety (90) days.
- g. The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan has failed to maintain financial assurance in the form and amount required by the SPECIAL USE Permit or compromised the COUNTY's interest in the decommissioning and site reclamation plan.
- h. The COUNTY discovers any material misstatement of fact of misleading omission of fact made by the Applicant in the course of the SPECIAL USE Permit Zoning Case.
- i. The Applicant has either failed to receive a copy of the certification of design compliance required by paragraph 6.1.5D, or failed to submit it to the COUNTY within 12 consecutive months of receiving a Zoning Use Permit regardless of the efforts of the Applicant to obtain such certification.

(6) The Zoning Administrator may, but is not required to, deem the PV SOLAR FARM abandoned, or the standards set forth in Section 6.1.7 M.5. met, with respect to some, but not all, of the PV SOLAR FARM. In that event, the Zoning Administrator may draw upon the financial assurance to perform the reclamation work as to that portion of the PV SOLAR FARM only. Upon completion of that reclamation work, the salvage value and

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

reclamation costs shall be recalculated as to the remaining PV SOLAR FARM.

- (7) The decommissioning and site reclamation plan shall be included as a condition of approval by the Board and the signed and executed irrevocable letter of credit and evidence of the escrow account must be submitted to the Zoning Administrator prior to any Zoning Use Permit approval.

R. Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.

- (1) The Applicant shall enter into an Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
- (2) The Applicant shall bear full responsibility for coordinating any special conditions required in the SPECIAL USE Permit in order to ensure compliance with the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
- (3) All requirements of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture shall become requirements of the SPECIAL USE Permit.
- (4) Champaign County shall have the right to enforce all requirements of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.

S. Complaint Hotline

- (1) Prior to the commencement of construction on the PV SOLAR FARM and during the entire term of the COUNTY Board SPECIAL USE Permit and any extension, the Applicant and Owner shall establish a telephone number hotline for the general public to call with any complaints or questions.
- (2) The telephone number hotline shall be publicized and posted at the operations and maintenance center and the construction marshalling yard.
- (3) The telephone number hotline shall be manned during usual business hours and shall be an answering recording service during other hours.
- (4) Each complaint call to the telephone number hotline shall be logged and identify the name and address of the caller and the reason for the call.
- (5) All calls shall be recorded and the recordings shall be saved for transcription for a minimum of two years.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

(6) A copy of the telephone number hotline log shall be provided to the Zoning Administrator on a monthly basis.

(7) The Applicant and Owner shall take necessary actions to resolve all legitimate complaints.

T. Standard Conditions for Expiration of PV SOLAR FARM COUNTY Board SPECIAL USE Permit

A PV SOLAR FARM COUNTY Board SPECIAL USE Permit designation shall expire in 10 years if no Zoning Use Permit is granted.

U. Application Requirements

(1) In addition to all other information required on the SPECIAL USE Permit application and required by Section 9.1.11 A.2., the application shall contain or be accompanied by the following information:

- a. A PV SOLAR FARM Project Summary, including, to the extent available:
 - (a) A general description of the project, including its approximate DC and AC generating capacity; the maximum number and type of solar devices, and the potential equipment manufacturer(s).
 - (b) The specific proposed location of the PV SOLAR FARM including all tax parcels on which the PV SOLAR FARM will be constructed.
 - (c) The specific proposed location of all tax parcels required to be included in the PV SOLAR FARM COUNTY Board SPECIAL USE Permit.
 - (d) A description of the Applicant, Owner and Operator, including their respective business structures.
- b. The name(s), address(es), and phone number(s) of the Applicant(s), Owner and Operator, and all property owner(s) for the PV SOLAR FARM SPECIAL USE Permit.
- c. A site plan for the PV SOLAR FARM indicating the following:
 - (a) The approximate planned location of al PV SOLAR FARM STRUCTURES, property lines (including identification of adjoining properties), required separations, public access roads and turnout locations, access driveways, solar devices, electrical inverter(s), electrical transformer(s),

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

cabling, switching station, electrical cabling from the PV SOLAR FARM to the Substation(s), ancillary equipment, screening and fencing, third party transmission lines, meteorological station, maintenance and management facilities, and layout of all structures within the geographical boundaries of any applicable setback.

- (b) The site plan shall clearly indicate the area of the proposed PV SOLAR FARM SPECIAL USE Permit.
 - (c) The location of all below-ground wiring.
 - (d) The location, height, and appearance of all above-ground wiring and wiring structures.
 - (e) The separation of all PV SOLAR FARM structures from adjacent DWELLINGS and/or PRINCIPAL BUILDINGS or uses shall be dimensioned on the approved site plan and that dimension shall establish the effective minimum separation that shall be required for any Zoning Use Permit. Greater separation and somewhat different locations may be provided in the approved site plan for the Zoning Use Permit provided that the greater separation does not increase the noise impacts and/or glare that were approved in the PV SOLAR FARM SPECIAL USE Permit. PV SOLAR FARM structures include substations, third party transmission lines, maintenance and management facilities, or other significant structures.
- d. All other required studies, reports, certifications, and approvals demonstrating compliance with the provisions of this Ordinance.
- e. The PV SOLAR FARM SPECIAL USE Permit application shall include documentation that the applicant has provided a complete copy of the SPECIAL USE Permit application to any municipality within one-and-one-half miles of the proposed PV SOLAR FARM as required by Section 6.1.7 B.(2)a.(b).
- f. A municipal resolution regarding the PV SOLAR FARM by any municipality located within one-and-one-half miles of the PV SOLAR FARM must be submitted to the Zoning Administrator prior to the consideration of the PV SOLAR FARM SPECIAL USE Permit by the Champaign COUNTY Board or, in the absence of such a resolution, the Zoning Administrator shall provide documentation to the COUNTY Board that any municipality within one-and-one-half miles of the PV SOLAR FARM was provided notice of the meeting dates for consideration of the proposed PV SOLAR FARM SPECIAL USE Permit for both the Environment

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

and Land Use Committee and the COUNTY Board as required by Section 6.1.7 B.(2)a.(c).

g. Documentation of an executed interconnection agreement with the appropriate electric utility shall be provided prior to issuance of a Zoning Compliance Certificate to authorize operation of the PV SOLAR FARM as required by Section 6.1.7 B.(3)b.

- (2) The Applicant shall notify the COUNTY of any changes to the information provided above that occurs while the SPECIAL USE Permit application is pending.
- (3) The Applicant shall include a copy of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture with the Special Use Permit Application.

V. The approval of a PV SOLAR FARM shall not be conditioned on a property value guarantee and shall not require a facility owner to pay into a neighboring property devaluation escrow account. This is a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.

W. Deadline for Start of Public Hearing and Governing Body Determination

- (1) A public hearing for a PV SOLAR FARM shall begin within 45 days of filing a complete SPECIAL USE Permit application. This requirement is imposed by Public Act 102-1123 and the number of days shall not be increased or eliminated unless waived by the developer.
- (2) A decision on the SPECIAL USE Permit shall be made within 30 days after the conclusion of the public hearing. This requirement is imposed by Public Act 102-1123 and the number of days shall not be increased or eliminated unless waived by the developer.

X. Should the Illinois Supreme Court find P.A. 102-1123 invalid or should an Illinois Appellate Court find P.A. 102-1123 invalid, and that declaration is not appealed to the Illinois Supreme Court or the Illinois Supreme Court declines to hear an appeal of the Appellate Court’s finding and no public hearing for a proposed PV SOLAR FARM has begun, the text of this amendment shall be stricken and the text adopted by the Champaign County Board on August 18, 2022 shall be reinstated and shall govern PV SOLAR FARMS in Champaign County.

12. Add new Section 9.1.11. C.5. as follows:

5. Statutory requirements in Section 6.1.5 or Section 6.1.7. shall not be construed to be inadequate in any way and shall not be the basis for negative Findings of Fact for any WIND FARM or PV SOLAR FARM.

13. Add new Section 9.1.11 D.9. as follows:

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

9. No WIND FARM or PV SOLAR FARM approval shall include any special condition or waiver that changes any statutory requirement in Section 6.1.5 or Section 6.1.7.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

1. Add definitions in Section 3. Definitions:

FACILITY OWNER: (i) a person with a direct ownership interest in a WIND FARM or a PV SOLAR FARM, or both, regardless of whether the person is involved in acquiring the necessary rights, permits, and approvals or otherwise planning for the construction and operation of the facility, and (ii) at the time the facility is being developed, a person who is acting as a developer of the facility by acquiring the necessary rights, permits, and approvals or by planning for the construction and operation of the facility, regardless of whether the person will own or operate the facility.

NON-PARTICIPATING PROPERTY: real property that is not a PARTICIPATING PROPERTY.

OCCUPIED COMMUNITY BUILDING: any one or more of the following buildings that is existing and occupied on the date that the application for a permit to develop the commercial wind energy facility or the commercial solar energy facility is filed with the county: a school, place of worship, day care facility, public library, or community center.

PARTICIPATING PROPERTY: real property that is the subject of a written agreement between a facility owner and the owner of the real property that provides the facility owner an easement, option, lease, or license to use the real property for the purpose of constructing a commercial wind energy facility, a commercial solar energy facility, or supporting facilities. "Participating property" also includes real property that is owned by a facility owner for the purpose of constructing a commercial wind energy facility, a commercial solar energy facility, or supporting facilities.

2. Revise definitions in Section 3. Definitions:

DWELLING, PARTICIPATING: A DWELLING on land that is leased to a WIND FARM or PV SOLAR FARM.

DWELLING, NON-PARTICIPATING: A DWELLING on land that is not leased to a WIND FARM or PV SOLAR FARM.

PV SOLAR FARM, COMMUNITY: A PV SOLAR FARM of not more than 5,000 kilowatt nameplate capacity that meets the requirements of 20 ILCS 3855/1-10 for a "community renewable generation project" and provided that two COMMUNITY PV SOLAR FARMS may be co-located on the same or contiguous parcels totaling 5 MW.

3. Add new Section 5.3 Footnote 16 for all Zoning Districts:

16. The Zoning Administrator shall notify applicants for Zoning Use Permits proposing development within a distance from a WIND FARM TOWER equal to 1.5 times the height of the WIND FARM TOWER that there is a risk of ice throw and other incompatibilities with the WIND FARM TOWER and that the WIND FARM developer is required to mitigate the risks of ice throw for that structure and the immediately surrounding area within 100 feet of the structure. The Department of Planning & Zoning shall also notify applicants for Zoning Use Permits proposing development within a

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

distance from a WIND FARM TOWER of between 1.5 and 2.1 times the height of the WIND FARM TOWER that there is a risk of incompatibilities with the WIND TURBINE.

4. Revise Section 6.1.1 A.5.a. and b. as follows:

5. No Zoning Use permit for such SPECIAL USE will be issued until the applicant provides the COUNTY with an irrevocable letter of credit to be drawn upon a federally insured financial institution within 200 miles of Urbana, Illinois, or reasonable anticipated travel costs shall be added to the amount of the letter of credit.
 - a. Unless specified elsewhere in this Ordinance, the irrevocable letter of credit shall be in the amount of one hundred fifty percent (150%) of an independent engineer's cost estimate to complete the work described in Section 6.1.1A.4.a., Section 6.1.1A.4.b., and Section 6.1.1A.4.c. This requirement shall not apply to any WIND FARM or SOLAR FARM approved after {effective date}.
 - b. The provisions of this subparagraph notwithstanding, a different amount may be required as a special condition. This requirement shall not apply to any WIND FARM or SOLAR FARM approved after {effective date}.

5. Add new Section 6.1.1 A.7.f. as follows:

- f. For any WIND FARM or SOLAR FARM approved after {effective date}, abandonment shall be limited to only when the decommissioning and site reclamation plan has not been completed with 12 months after a SOLAR FARM reaches the end of its useful life or when the decommissioning and site reclamation plan has not been completed within 18 months after a WIND FARM reaches the end of its useful life. A WIND FARM or SOLAR FARM shall be presumed to have reached the end of its useful life if the owner of the WIND FARM or SOLAR FARM fails for a period of six consecutive months to pay the landowner amounts owed in accordance with the underlying agreement and additionally, a WIND FARM shall be presumed to have reached the end of its useful life if no electricity shall have been generated for a continuous period of 12 months.

6. Add new Section 6.1.1 A.9.h. as follows:

- h. For any WIND FARM or SOLAR FARM approved after {effective date}, the Zoning Administrator may only draw on the funds only when the decommissioning and site reclamation plan has not been completed with 12 months after a SOLAR FARM reaches the end of its useful life or when the decommissioning and site reclamation plan has not been completed with 18 months after a WIND FARM reaches the end of its useful life. A WIND FARM or SOLAR FARM shall be presumed to have reached the end of its useful life if the if the owner of the WIND FARM or SOLAR FARM fails for a period of six consecutive months to pay the landowner amounts owed in accordance with the underlying agreement and additionally, a WIND FARM shall be presumed to have reached the end of its useful life if no electricity shall have been generated for a continuous period of 12 months.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

7. Revise Section 6.1.1 A.11.b. as follows:

11. The proceeds of the letter of credit may only be used by the COUNTY to:
 - a. remove the NON-ADAPTABLE STRUCTURE and return the site to its condition prior to placement of the NON-ADAPTABLE STRUCTURE, in accordance with the most recent decommissioning and site reclamation plan submitted and accepted in relation to the NON-ADAPTABLE STRUCTURE;
 - b. for other than any WIND FARM or SOLAR FARM approved after {effective date}, pay all administrative and ancillary costs associated with drawing upon the financial assurance and performing the reclamation work, which shall include, but not be limited to, attorney’s fees; construction management and other professional service fees; and the costs of preparing request for proposal and bidding documents required to comply with State law or Champaign County purchasing policies; and
 - c. remove any covenants placed on the title in conjunction with Section 6.1.1A.2.

The balance of any proceeds remaining after the site has been reclaimed shall be returned to the issuer of the letter of credit.

8. Revise the statement at the beginning of Section 6.1.4 as follows:

Prior to <effective date>, a WIND FARM County BOARD SPECIAL USE Permit may only be authorized in the AG-1, Agriculture Zoning DISTRICT subject to the following conditions:

9. Add new Section 6.1.5 PROPOSED WIND FARM SPECIAL USE PERMIT as follows:

As of <effective date>, a WIND FARM SPECIAL USE Permit may only be authorized in the AG-1, AG-2, I-1, and I-2 Zoning DISTRICTS subject to the following conditions:

- A. General Standard Conditions
 1. The area of the WIND FARM County Board SPECIAL USE Permit must include the following minimum areas:
 - a. All land that is a distance equal to 1.10 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) from the base of that WIND FARM TOWER.
 - b. All necessary access lanes or driveways and any required new PRIVATE ACCESSWAYS. For purposes of determining the minimum area of the SPECIAL USE Permit, access lanes or driveways shall be provided a minimum 40 feet wide area.
 - c. All necessary WIND FARM ACCESSORY STRUCTURES including electrical distribution lines, transformers, common

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

switching stations, and substations not under the ownership of a PUBLICLY REGULATED UTILITY. For purposes of determining the minimum area of the SPECIAL USE Permit, underground cable installations shall be provided a minimum 40 feet wide area.

- d. All land that is within 1.50 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) from the base of each WIND FARM TOWER except any such land that is more than 1,320 feet from any existing public STREET right of way.
 - e. All land area within 1,320 feet of a public STREET RIGHT OF WAY that is also within 1,000 feet from the base of each WIND FARM TOWER except that in the case of WIND FARM TOWERS in compliance with the minimum STREET separation required by paragraph 6.1.5 C.4. in which case land on the other side of the public STREET right of way does not have to be included in the SPECIAL USE Permit.
2. The WIND FARM County Board SPECIAL USE Permit shall not be located in the following areas:
 - a. Less than one-and-one-half miles from an incorporated municipality that has a zoning ordinance.
 - b. Less than one mile from the CR, Conservation-Recreation Zoning DISTRICT.
 - c. In any area leased for underground gas storage or under easement for same, unless the lease or easement requires that gas injection wells and other above-ground appurtenances be located in conformance with paragraph 6.1.5 C.9.
 3. All aboveground STRUCTURES and facilities shall be of a type and shall be located in a manner that is consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.
 4. The owners of the subject property and the Applicant, its successors in interest, and all parties to the decommissioning plan and site reclamation plan hereby recognize and provide for the right of agricultural activities to continue on adjacent land consistent with the Right to Farm Resolution 3425.
- B. Minimum Lot Standards
1. There are no minimum LOT AREA, AVERAGE LOT WIDTH, SETBACK, YARD, or maximum LOT COVERAGE requirements for a

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

WIND FARM or for LOTS for WIND FARM TOWERS, substations, and WIND FARM maintenance and management facilities.

C. Minimum Standard Conditions for Separations for WIND FARM TOWERS from adjacent USES and STRUCTURES.

The location of each WIND FARM TOWER shall provide the following required separations:

1. At least 1.1 times the maximum blade tip height of the wind tower from the center of the base of a WIND FARM TOWER to the nearest point on the outside wall of any PARTICIPATING DWELLING provided that the noise level caused by the WIND FARM at the particular building complies with the applicable Illinois Pollution Control Board regulations. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased except as may be required to comply with the applicable noise regulations of the Illinois Pollution Control Board.
2. At least 2.1 times the maximum blade tip height of the wind tower from the center of the base of a WIND FARM TOWER to the nearest point on the outside wall of any existing NON-PARTICIPATING DWELLING or OCCUPIED COMMUNITY BUILDING provided that the noise level caused by the WIND FARM at the particular building complies with the applicable Illinois Pollution Control Board regulations. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased except as may be required to comply with the applicable noise regulations of the Illinois Pollution Control Board.
3. The above separations may be reduced to a distance no less than 1.10 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) upon submission of a PRIVATE WAIVER signed by the owner of said NON-PARTICIPATING DWELLING or OCCUPIED COMMUNITY BUILDING or adjacent property. The PRIVATE WAIVER must specify the agreed minimum separation and specifically acknowledge that the grantor accepts the resulting noise level caused by the WIND FARM.
4. A separation distance equal to 1.1 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) from the center of the base of a WIND FARM TOWER to the center point of the public STREET RIGHT OF WAY. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.
5. A separation distance equal to 1.1 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) from the center of the base of a WIND FARM TOWER to the nearest non-participating property line. This separation may be reduced upon submission of a PRIVATE WAIVER signed by the owner of said non-participating

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

property. The PRIVATE WAIVER must specify the agreed minimum separation. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.

6. A separation distance equal to 1.1 times the total WIND FARM TOWER height (measured to the tip of the highest rotor blade) from the center of the base of a WIND FARM TOWER to the nearest easement for a third-party electrical transmission lines. This separation may be reduced upon submission of a PRIVATE WAIVER signed by the owner of said electrical transmission line. The PRIVATE WAIVER must specify the agreed minimum separation. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.
7. Any PRIVATE WAIVER establishing an agreement for a lesser minimum separation as authorized above shall be submitted prior to the final determination by the Board and must be recorded as part of the chain of title in the deed to any relevant tract of land prior to authorization of any relevant ZONING USE PERMIT. No waiver of a standard condition shall be required in the event of a duly agreed and signed PRIVATE WAIVER.
8. At least 2.1 times the maximum blade tip height of the WIND TOWER to the nearest point on the property line of fish and wildlife areas and Illinois Nature Preserve Commission protected lands. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.
9. At least 1,200 feet separation from the center of the base of a WIND FARM TOWER to any wellhead or other above ground fixture that is accessory to a GAS PIPELINE or to any valve or other above ground fixture for any HAZARDOUS LIQUID PIPELINE, provided however, that if the relevant PIPELINE IMPACT RADIUS required by paragraph 4.3.4H. is greater than 1,200 feet then that PIPELINE IMPACT RADIUS shall be the minimum separation of any of the above. This separation may be reduced upon submission of a PRIVATE WAIVER signed by the owner of said pipeline. The PRIVATE WAIVER must specify the agreed minimum separation.
10. At least 1,600 feet separation from the center of the base of a WIND FARM TOWER to any Liquefied Natural Gas Storage; or Liquefied Petroleum Gas Storage; or Gasoline and Volatile Oils Storage exceeding 10,000 gallons capacity in the aggregate.
11. For any legal RESTRICTED LANDING AREA that existed on or for which there had been a complete SPECIAL USE Permit application received by April 22, 2010, there shall be a separation from the runway to the nearest tip of a blade of the nearest WIND FARM TOWER as follows:
 - a. The separation from the sides and ends of the runway shall be seven horizontal feet for each one foot of overall WIND FARM TOWER HEIGHT.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

2. Controls and Brakes
 - a. All WIND FARM TOWER turbines shall be equipped with a redundant braking system. This includes both aerodynamic over speed controls (including variable pitch, tip, and other similar systems) and mechanical brakes.
 - b. Mechanical brakes shall be operated in fail-safe mode.
 - c. Stall regulation shall not be considered a sufficient braking system for over speed protection.
3. Electrical Components. All electrical components of the WIND FARM shall conform to applicable state and national codes including, any relevant national and international standards (e.g. ANSI and International Electrical Commission).
4. The WIND FARM TOWER must be a monopole construction.
5. The total WIND FARM TOWER height (measured to the tip of the highest rotor blade) must receive a Determination of No Hazard to Air Navigation by the Federal Aviation Administration under 14 CFR Part 77.
6. WIND FARM TOWERS, turbine nacelles, and blades shall be painted white or gray or another non-reflective, unobtrusive color as specified in the application and authorized by the Board.
7. WIND FARMS shall utilize minimal lighting that is compliant with the applicable FAA regulations, as amended by the FAA. To the extent that such tower lighting is available, and is approved by the FAA for a WIND FARM project, the facility owner shall install Aircraft Detection Lighting Systems (ADLS) or other similar technology to reduce light pollution and visual impacts caused by the WIND FARMS.
8. Warnings
 - a. A reasonably visible warning sign concerning voltage must be placed at the base of all pad-mounted transformers and Substations.
 - b. Visible, reflective, colored objects, such as flags, reflectors, or tape shall be placed on the anchor points of guy wires and along the guy wires up to a height of 15 feet from the ground.
9. All WIND FARM TOWERS must be protected from unauthorized climbing by devices such as fences at least six feet high with locking portals or anti-climbing devices 12 feet vertically from the base of the WIND FARM TOWER.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- E. Standard Conditions to Mitigate Damage to Farmland
1. All underground wiring or cabling for the WIND FARM shall be at a minimum depth as established by the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.
 2. Protection of agricultural drainage tile
 - a. Protection of agricultural drainage tile shall comply with the Agriculture Impact Mitigation Agreement with the Illinois Department of Agriculture as required by Section 6.1.5 S.
 - b. The applicant shall endeavor to locate all existing agricultural drainage tile prior to establishing any construction staging areas, construction of any necessary WIND FARM TOWER access lanes or driveways, construction of any WIND FARM TOWERS, any common switching stations, substations, and installation of underground wiring or cabling. The applicant shall contact affected landowners and tenants for their knowledge of the tile line locations prior to the proposed construction. A drainage district shall be notified at least two weeks prior to any likely disruption of a drainage district tile.
 - c. All identified drainage district tile lines shall be staked or flagged prior to construction to alert construction crews of the possible need for tile line repairs unless this requirement is waived in writing by the drainage district.
 - d. Overland crane crossings shall avoid crossing over drainage district tile as much as possible.
 - e. Any agricultural drainage tile located underneath construction stage areas, access lanes, overland crane crossings, driveways, any common switching stations, and substations shall be replaced as required in paragraph 6.3 of the Champaign County Stormwater Management and Erosion Control Ordinance.
 - f. Any agricultural drainage tile that must be relocated shall be relocated as required in the Champaign County Stormwater Management and Erosion Control Ordinance and consistent with the Agriculture Impact Mitigation Agreement with the Illinois Department of Agriculture.
 - g. Any underground WIND FARM wiring to be installed in the vicinity of likely drainage district tiles shall be installed in an open trench rather than installed via plowing or knifed into the ground.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- h. The applicant shall coordinate with the drainage district and provide a drainage district 48 hours to inspect all trenches and/or excavations in the vicinity of suspected drainage district tile locations in order to verify any damage or disturbance to drainage district tile.
 - i. All tile lines that are damaged, cut, or removed shall be staked or flagged in such manner that they will remain visible until the permanent repairs are completed. In addition, the location of damaged drain tile lines shall be recorded using Global Positioning Systems (GPS) technology.
 - j. Conformance of any relocation and/ or repair of drainage district tile with the Champaign County Stormwater Management and Erosion Control Ordinance shall be certified by an Illinois Professional Engineer. Written approval by the drainage district shall be received prior to any backfilling of the relocated and/or repaired drain tile and a copy of the approval shall be submitted to the Zoning Administrator. As-built drawings of any relocated and/ or repaired district tile shall be provided to both the relevant drainage district and the Zoning Administrator.
 - k. All exposed tile lines shall be screened or otherwise protected to prevent the entry into the tile of foreign materials, loose soil, small mammals, etc.
 - l. Permanent tile repairs shall be made within 14 days of the tile damage provided that weather and soil conditions are suitable or a temporary tile repair shall be made. Immediate temporary repair shall also be required if water is flowing through any damaged tile line. Temporary repairs are not needed if the tile lines are dry and water is not flowing in the tile provided the permanent repairs can be made within 14 days of the damage. All permanent and temporary tile repairs shall be made as detailed in the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S. and shall not be waived or modified except as authorized in the SPECIAL USE Permit.
 - m. All damaged tile shall be repaired so as to operate as well after construction as before the construction began.
 - n. Following completion of the WIND FARM construction the applicant shall be responsible for correcting all tile line repairs that fail, provided that the failed repair was made by the applicant.
3. All soil conservation practices (such as terraces, grassed waterways, etc.) that are damaged by WIND FARM construction and/or decommissioning

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

shall be restored by the applicant to the pre-WIND FARM construction condition in a manner consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.

4. Topsoil replacement
 - a. All topsoil shall be placed in a manner consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.

5. Mitigation of soil compaction and rutting
 - a. All mitigation of soil compaction and rutting shall be consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.

6. Land leveling
 - a. The applicant shall not be responsible for leveling of disturbed land if exempted by the WIND FARM lease.
 - b. All land leveling shall be consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S.

7. Permanent Erosion and Sedimentation Control Plan
 - a. Prior to the approval of any Zoning Use Permit, the Applicant shall provide a permanent soil erosion and sedimentation plan for all WIND FARM TOWER sites and access roads that conforms to the relevant Natural Resources Conservation Service guidelines and that is prepared by an Illinois Licensed Professional Engineer.
 - b. As-built documentation of all permanent soil erosion and sedimentation improvements for all WIND FARM TOWER sites and access roads prepared by an Illinois Licensed Professional Engineer shall be submitted and accepted by the Zoning Administrator prior to approval of any Zoning Compliance Certificate.

F. Standard Conditions for Use of Public STREETS

Any WIND FARM applicant proposing to use any County Highway or township or municipal STREET for the purpose of transporting WIND FARM TOWERS or Substation parts and/or equipment for construction, operation, or maintenance of the WIND FARM TOWERS or Substation(s), shall identify all such public

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

STREETS and pay the costs of any necessary permits and costs to repair any damage to the STREETS specifically and uniquely attributable to the WIND FARM construction, as follows:

1. The Applicant shall enter into a Roadway Upgrade and Maintenance agreement approved by the County Engineer; or Township Highway Commissioner; or municipality where relevant. Agreements with the County Engineer shall not be forwarded to the County Board before the WIND FARM SPECIAL USE permit is forwarded. All other agreements shall be executed prior to the close of the public hearing before the BOARD. The signed and executed Roadway Upgrade and Maintenance agreements must provide for the following minimum conditions:
 - a. The applicant shall agree to conduct a pre-WIND FARM construction baseline survey to determine existing STREET conditions for assessing potential future damage including the following:
 - (1) A videotape of the affected length of each subject STREET supplemented by photographs if necessary.
 - (2) Pay for costs of the County to hire a consultant to make a study of any structure on the proposed route that the County Engineer feels may not carry the loads likely during the WIND FARM construction.
 - (3) Pay for any strengthening of STREET structures that may be necessary to accommodate the proposed traffic loads caused by the WIND FARM construction.
 - b. The applicant shall agree to pay for costs of the County Engineer to hire a consultant to make a study of any structure on the proposed route that the County Engineer feels may not carry the loads likely during the WIND FARM construction and pay for any strengthening of structures that may be necessary to accommodate the proposed traffic loads caused by the WIND FARM construction.
 - c. The applicant shall agree upon an estimate of costs for any other necessary roadway improvements prior to construction.
 - d. The applicant shall obtain any necessary approvals for the STREET improvements from the relevant STREET maintenance authority.
 - e. The applicant shall obtain any necessary Access Permits including any required plans.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- f. The applicant shall erect permanent markers indicating the presence of underground cables.
- g. The applicant shall install marker tape in any cable trench.
- h. The applicant shall become a member of the Illinois statewide One-Call Notice System (otherwise known as the Joint Utility Locating Information for Excavators or “JULIE”) and provide JULIE with all of the information necessary to update its record with respect to the WIND FARM.
- i. The applicant shall use directional boring equipment to make all crossings of County Highways for the cable collection systems.
- j. The applicant shall provide plans for the widening of any corner radius that is necessary to facilitate the turning movements of the transport trucks used by the applicant.
- k. The applicant shall pay for the necessary temporary STREET improvements for the widened corner radii and pay for the cost to return the widened radii to their original lines and grades when no longer needed for the WIND FARM construction unless the STREET maintenance authority requests that the widened radii remain as improved.
- l. The applicant shall notify the STREET maintenance authority in advance of all oversize moves and crane crossings.
- m. The applicant shall provide the County Engineer with a copy of each overweight and oversize permit issued by the Illinois Department of Transportation for WIND FARM construction.
- n. The applicant shall transport the WIND FARM TOWER segments and other oversize loads so as to minimize adverse impact on the local traffic including farm traffic.
- o. The applicant shall schedule WIND FARM construction traffic in a way to minimize adverse impacts on emergency response vehicles, rural mail delivery, school bus traffic, and local agricultural traffic.
- p. The applicant shall provide as much advance notice as is commercially reasonable to obtain approval of the STREET maintenance authority when it is necessary for a STREET to be closed due to a crane crossing or for any other reason. Notwithstanding the generality of the aforementioned, the applicant will provide 48 hours notice to the extent reasonably practicable.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- q. The applicant shall provide signs indicating all highway and STREET closures and work zones in accordance with the Illinois Department of Transportation Manual on Uniform Traffic Control Devices.
- r. The applicant shall establish a single escrow account and a single Irrevocable Letter of Credit for the cost of all STREET upgrades and repairs pursuant to the WIND FARM construction.
- s. The applicant shall notify all relevant parties of any temporary STREET closures.
- t. The applicant shall obtain easements and other land rights needed to fulfill the applicant's obligations under this agreement.
- u. The applicant shall provide written Notice to Proceed to the relevant STREET maintenance authority by December 31 of each year that identifies the STREETS to be upgraded during the following year.
- v. The applicant shall provide dust control and grading work to the reasonable satisfaction of the County Engineer on STREETS that become aggregate surface STREETS.
- w. The applicant shall conduct a post-WIND FARM construction baseline survey similar to the pre-WIND FARM construction baseline survey to identify the extent of repairs necessary to return the STREET to the pre-WIND FARM construction condition.
- x. The applicant shall pay for the cost of all repairs to all STREETS that are damaged by the applicant during the construction of the WIND FARM and restore such STREETS to the condition they were in at the time of the pre-WIND FARM construction inventory.
- y. All WIND FARM construction traffic shall exclusively use routes designated in the approved Transportation Impact Analysis.
- z. The applicant shall provide liability insurance in an acceptable amount to cover the required STREET construction activities.
- aa. The applicant shall pay for the present worth costs of life consumed by the construction traffic as determined by the pavement management surveys and reports on the roads which do not show significant enough deterioration to warrant immediate restoration.
- bb. Provisions for expiration date on the agreement.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- cc. Other conditions that may be required.
2. A condition of the County Board SPECIAL USE Permit approval shall be that the Zoning Administrator shall not authorize a Zoning Use Permit for the WIND FARM until the County Engineer and State’s Attorney; or Township Highway Commissioner; or municipality where relevant, has approved a Transportation Impact Analysis provided by the applicant and prepared by an independent engineer that is mutually acceptable to the applicant and the County Engineer and State’s Attorney; or Township Highway Commissioner; or municipality where relevant, that includes the following:
 - a. Identify all such public STREETS or portions thereof that are intended to be used by the applicant during construction of the WIND FARM as well as the number of loads, per axle weight of each load; and type of equipment that will be used to transport each load.
 - b. A schedule of the access road culverts and bridges affected by the project and the recommendations as to actions, if any, required with respect to such culverts and bridges and estimates of the cost to replace such culverts and bridges.
 - c. A schedule of the anticipated STREET repair costs to be made in advance of the WIND FARM construction and following construction of the WIND FARM.
 - d. The applicant shall reimburse the County Engineer; or Township Highway Commissioner; or municipality where relevant, for all reasonable engineering fees including the costs of a third party consultant, incurred in connection with the review and approval of the Transportation Impact Analysis.
 3. At such time as decommissioning takes place the Applicant or its successors in interest shall enter into a Roadway Use and Repair Agreement with the appropriate highway authority.
- G. Standard Conditions for Coordination with Local Fire Protection District
1. The applicant shall submit to the local fire protection district a copy of the site plan.
 2. Upon request by the local fire protection district, the Owner or Operator shall cooperate with the local fire protection district to develop the fire protection district’s emergency response plan.
 3. Nothing in this section shall alleviate the need to comply with all other applicable fire laws and regulations.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

H. Standard Conditions to Mitigate Electromagnetic Interference

1. The applicant shall provide the applicable microwave transmission providers and local emergency service provider(s) (911 operators) copies of the project summary and site plan.
2. To the extent that any relevant microwave transmission provider and local emergency service provider demonstrates a likelihood of interference with its communications resulting from the WIND FARM, the applicant shall take reasonable measures to mitigate such anticipated interference.
3. If, after construction of the WIND FARM, the Owner or Operator receives a written complaint related to the above-mentioned interference, the Owner or Operator shall take reasonable steps to respond to the complaint.
4. If, after construction of the WIND FARM, the Owner or Operator receives a written complaint related to interference with local broadcast residential television, the Owner or Operator shall take reasonable steps to respond to the complaint.

I. Standard Conditions for Allowable Noise Level

1. Noise levels from each WIND FARM TOWER or WIND FARM shall be in compliance with the applicable Illinois Pollution Control Board (IPCB) regulations (35 *Illinois Administrative Code* Subtitle H: Noise Parts 900, 901, 910). This is a statutory requirement by 55 ILCS 5/5-12020 shall not be changed.
2. The applicant shall submit manufacturer's wind turbine sound power level characteristics and other relevant data regarding wind turbine noise characteristics necessary for a competent noise analysis.
3. The applicant, through the use of a qualified professional, as part of the siting approval application process, shall appropriately demonstrate compliance with the above noise requirements.
4. The applicant shall submit a map of the relevant noise contours for the proposed WIND FARM and indicate the proposed WIND FARM TOWERS and all existing PRINCIPAL BUILDINGS within at least 1,500 feet of any WIND FARM TOWER or within the coverage of the relevant noise contours.
5. If a computer model is used to generate the required noise contours the applicant shall clearly state the assumptions of the model's construction and algorithms so that a competent and objective third party can as simply as possible verify the noise contours and noise data.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

6. After construction of the WIND FARM the Zoning Administrator shall take appropriate enforcement action as necessary to investigate noise complaints in order to determine the validity of the complaints and take any additional enforcement action as proves warranted to stop any violation that is occurring, including but not limited to the following:
- a. The Zoning Administrator may seek authorization from the County Board to hire a noise consultant to determine the noise produced by the WIND FARM in a manner consistent with the Illinois Pollution Control Board (IPCB) regulations (*35 Illinois Administrative Code* Subtitle H: Noise Parts 900, 901, 910).
 - b. The Zoning Administrator may require the WIND FARM owner to cooperate fully with the noise consultant in the enforcement action including shutting down all wind turbines to allow documentation of ambient noise levels.
 - c. In the event that a violation of the IPCB noise regulations is identified the Zoning Administrator may require the WIND FARM owner to take whatever actions are necessary to stop the violation and comply with the noise regulations. The Zoning Administrator may seek direction from the Environment and Land Use Committee regarding the actions necessary to stop the violation.
 - d. Further, in the event that a violation of IPCB noise regulations is identified the WIND FARM owner shall reimburse to the County the cost of the noise consultant.

J. Standard Conditions for Endangered Species Consultation

The applicant shall apply for consultation with the Endangered Species Program of the Illinois Department of Natural Resources. The Application shall include a copy of the Agency Action Report or, if applicable, a copy of the Detailed Action Report submitted to the Endangered Species Program of the Illinois Department of Natural Resources and a copy of the response from the Illinois Department of Natural Resources.

K. Standard Conditions for Historic and Archaeological Resources Review

The applicant shall apply for consultation with the State Historic Preservation Officer of the Illinois Department of Natural Resources. The application shall include a copy of the Agency Action Report from the State Historic Preservation Officer of the Illinois Department of Natural Resources.

L. Standard Conditions for Fish and Wildlife Impacts

The applicant shall apply for consultation with the United States Fish and Wildlife Service's Information for Planning and Consulting environmental review or a

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

comparable successor tool that is consistent with the “U.S. Fish and Wildlife Service’s Land-Based Wind Energy Guidelines.” The application shall include a copy of the consultation review from the U.S. Fish and Wildlife Service.

M. Standard Conditions for Shadow Flicker

1. The applicant shall submit the results of a study on potential shadow flicker. The shadow flicker study shall identify the locations of both summer and winter shadow flicker that may be caused by the project.
2. No OCCUPIED COMMUNITY BUILDING or NON-PARTICIPATING DWELLING shall experience more than 30 hours per year of shadow flicker under planned operating conditions. This duration is a statutory requirement by 55 ILCS 5/5-12020 and shall not be decreased.

N. Ice Throw

1. As part of the Special Use Permit Application, the Applicant shall provide a current risk level assessment of ice fall and ice throw for the current turbine model to be used and includes public roads and parts of non-participating properties used for residential purposes and for other structures. The methodology shall be equivalent to that in the International Energy Agency (IEA) Wind Technology Collaboration Programme (TCP) Task 19 Technical Report *International Recommendations for Ice Fall and Ice Throw Risk Assessments* dated April 2022.
2. If the risk of ice fall and ice throw is above 10^{-5} (1/100,000) it shall be considered unacceptable and extensive risk reduction measures (e.g., relocation or change of turbine specifications or temporarily shutting down the turbine) shall be taken by the WIND FARM developer. The property owner can waive this requirement. Signed written waivers must be presented with the application for a Zoning Use Permit.
3. If a non-participating structure is built within a distance from a WIND FARM TOWER of 1.5 times the height of the WIND FARM TOWER after the Special Use PERMIT approval, the WIND FARM developer shall mitigate ice fall and/or ice throw that could potentially impact the structure and the immediate surrounding area within 100 feet of the structure.

O. Standard Condition for Liability Insurance

1. The Owner or Operator of the WIND FARM shall maintain a current general liability policy covering bodily injury and property damage with minimum limits of at least \$5 million per occurrence and \$520 million in the aggregate. The amount of the limit shall be increased annually to account for the effects of inflation.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

2. The general liability policy shall identify landowners in the SPECIAL USE Permit as additional insured.

P. Operational Standard Conditions

1. Maintenance
 - a. The Owner or Operator of the WIND FARM must submit, on an annual basis, a summary of the operation and maintenance reports to the Environment and Land Use Committee and any other operation and maintenance reports as the Environment and Land Use Committee reasonably requests.
 - b. Any physical modification to the WIND FARM that alters the mechanical load, mechanical load path, or major electrical components shall require a new County Board SPECIAL USE Permit. Like-kind replacements shall not require re-certification nor will replacement of transformers, cabling, etc. provided replacement is done in a fashion similar to the original installation. Prior to making any physical modification (other than a like-kind replacement), the Owner or Operator shall confer with a relevant third-party certifying entity identified in subparagraph 6.1.5 D.1.(a) to determine whether the physical modification requires re-certification.
2. Materials Handling, Storage and Disposal
 - a. All solid wastes related to the construction, operation and maintenance of the WIND FARM shall be removed from the site promptly and disposed of in accordance with all federal, state and local laws.
 - b. All hazardous materials related to the construction, operation and maintenance of the WIND FARM shall be handled, stored, transported and disposed of in accordance with all applicable local, state and federal laws.

Q. Standard Condition for Decommissioning Plan and Site Reclamation Plan

1. The applicant shall submit a signed site reclamation plan conforming to the requirements of paragraph 6.1.1 A. and matching the overall deconstruction and land restoration requirements of the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture. The decommissioning and deconstruction requirements of the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture are a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.
2. In addition to the purposes listed in subparagraph 6.1.1 A.4. the reclamation agreement shall also include provisions for anticipated repairs

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

for any public STREET used for the purpose of reclamation of the WIND FARM and all costs related to removal of access driveways.

3. The Site Reclamation Plan required in paragraph 6.1.1 A. shall also include the following:
 - a. A stipulation that the applicant shall notify the GOVERNING BODY by certified mail of the commencement of a voluntary or involuntary bankruptcy proceeding, naming the applicant as debtor, within ten days of commencement of the proceeding.
 - b. A stipulation that the applicant shall agree that the sale, assignment in fact or at law, or such other transfer of applicant's financial interest in the WIND FARM shall in no way affect or change applicant's obligation to continue to comply with the terms of this agreement. Any successor or assignee shall assume the terms, covenants and obligations of this Agreement and agrees to assume all reclamation liability and responsibility for the WIND FARM.
 - c. Authorization for the GOVERNING BODY and its authorized representatives for right of entry onto the WIND FARM premises for the purpose of inspecting the methods of reclamation or for performing actual reclamation if necessary.
 - d. A stipulation that at such time as decommissioning takes place, the Applicant or its successors in interest are required to enter into a Roadway Use and Repair Agreement with the relevant highway authority.
 - e. A stipulation that the Applicant shall provide evidence of any new, additional, or substitute financing or security agreement to the Zoning Administrator throughout the operating lifetime of the project.
 - f. A stipulation that the Applicant shall be obliged to perform the work in the site reclamation plan before abandoning the WIND FARM or prior to ceasing production of electricity from the WIND FARM, after it has begun, other than in the ordinary course of business. This obligation shall be independent of the obligation to pay financial assurance, and shall not be limited by the amount of financial assurance. The obligation to perform the reclamation work shall constitute a covenant running with the land.
 - g. The site reclamation plan shall provide for payment of any associated costs that Champaign County may incur in the event that decommissioning is actually required. Associated costs include all administrative and ancillary costs associated with drawing upon the financial assurance and performing the

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- reclamation work and shall include but not be limited to attorney’s fees; construction management and other professional service fees; and the costs of preparing request for proposals and bidding documents required to comply with State law or Champaign County purchasing policies.
- h. The depth of removal of foundation concrete below ground shall be as required in the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture. The depth of removal of foundation concrete shall be certified in writing by an Illinois Licensed Professional Engineer and the certification shall be submitted to the Zoning Administrator.
 - i. The hole resulting from the removal of foundation concrete during decommissioning shall be backfilled as required in the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
 - j. A stipulation that should the site reclamation plan be deemed invalid by a court of competent jurisdiction the WIND FARM SPECIAL USE Permit shall be deemed void.
 - k. A stipulation that the Applicant’s obligation to complete the site reclamation plan and to pay all associated costs shall be independent of the Applicant’s obligation to provide financial assurance.
 - l. A stipulation that the liability of the Applicant’s failure to complete the site reclamation plan or any breach of the site reclamation plan requirement shall not be capped by the amount of the financial assurance.
 - m. If the Applicant desires to remove equipment or property credited to the estimated salvage value without the concurrent replacement of the property with property of equal or greater salvage value or if the Applicant installs equipment or property increasing the cost of decommissioning after the WIND FARM begins to produce electricity, at any point, the Applicant shall first obtain the consent of the Zoning Administrator. If the Applicant’s lien holders remove equipment or property credited to the salvage value the Applicant shall promptly notify the Zoning Administrator. In either of these events the total financial assurance shall be adjusted to reflect any change in total salvage value and total decommissioning costs resulting from any such removal or installation.
4. To comply with paragraph 6.1.1A.5., the Applicant shall provide financial assurance in the form of an escrow account as follows:

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- a. No Zoning Use Permit to authorize construction of the WIND FARM shall be authorized by the Zoning Administrator until the WIND FARM owner shall provide the COUNTY with financial assurance to cover 10% of the decommissioning and site reclamation cost as determined in the independent engineer's cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5.
- b. On or before the sixth anniversary of the Commercial Operation Date, the WIND FARM Owner shall provide the COUNTY with Financial Assurance to cover 50% of the decommissioning cost and site reclamation cost as determined in the independent engineer's cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5.
- c. On or before the eleventh anniversary of the Commercial Operation Date, the WIND FARM Owner shall provide the COUNTY with Financial Assurance to cover 100% of the decommissioning and site reclamation cost as determined in the independent engineer's cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5. and as determined in the updated decommissioning and site reclamation plan filed with the County on or before the end of the tenth year of commercial operation.
- d. Net salvage value may be deducted from decommissioning costs as follows:
 - (1) One of the following standards shall be met:
 - i. The Applicant shall maintain the WIND FARM TOWERS free and clear of liens and encumbrances, including financing liens and shall provide proof of the same prior to issuance of the SPECIAL USE Permit; or
 - ii. The Applicant shall deduct from the salvage value credit the amount of any lien or encumbrance on each WIND FARM TOWER; or
 - iii. Any and all financing and/or financial security agreements entered into by the Applicant shall expressly provide that the agreements are subject to

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

the covenant required by Section 6.1.1 A.2 that the reclamation work be done.

- (2) The applicant shall provide proof of compliance with paragraph 6.1.5 P.4.d.(1) prior to issuance of any Zoning Use Permit and upon every renewal of the financial assurance and at any other time upon the request of the Zoning Administrator.
 - (3) The Applicant shall provide in the site reclamation plan for legal transfer of the STRUCTURE to the demolisher to pay the costs of reclamation work, should the reclamation work be performed.
 - (4) The net estimated salvage value that is deducted from the estimated decommissioning costs shall be the salvage value that results after all related costs for demolition and any required preparation for transportation for reuse or recycling or for simple disposal and other similar costs including but not limited to the decommissioning of the tower, the hub assembly, the bed plate, the nacelle, the turbine, the blades, the tower cabling and internal wiring, the transformers, the foundation, the access roads.
 - (5) Estimated salvage value shall be based on the average salvage price of the past five years as published in a reputable source for salvage values and shall reflect sound engineering judgment as to anticipated changes in salvage prices prior to the next update of estimated net salvage value.
- e. The GOVERNING BODY has the right to require multiple escrow accounts based on the regulations governing federal insurance for deposits.
- f. The Applicant and its successors in interest shall adjust the amount of the financial assurance to ensure that it reflects current and accurate information as follows:
- (1) The Applicant or its successors in interest shall file an updated decommissioning and site reclamation plan with the County on or before the end of the tenth year of commercial operation.
 - (2) The County shall reevaluate the estimated costs of decommissioning and site reclamation every five years after the tenth anniversary of the commercial operation date. The solar farm owner shall provide an updated

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

estimated cost of decommissioning and site reclamation that is provided by an independent Illinois licensed professional engineer.

- (3) At all times after the tenth anniversary of the commercial operation date, the escrow account shall equal or exceed the amount of the independent engineer's cost estimate as increased by known and documented rates of inflation since the WIND FARM was approved.
- g. The applicant or WIND FARM owner shall provide an escrow account as follows:
- (1) The applicant or WIND FARM owner and the GOVERNING BODY shall agree on a mutually acceptable financial institution at which an escrow account shall be established.
- (2) The GOVERNING BODY shall be the beneficiary of the escrow account for the purpose of the reclamation of the WIND FARM in the event that the WIND FARM owner is incapable of decommissioning the WIND FARM.
- (3) The applicant or WIND FARM owner shall grant perfected security in the escrow account by use of a control agreement establishing the County as an owner of record, pursuant to the Secured Transit Article of the Uniform Commercial Code, 810 *ILCS* 9/101 *et seq.*
- (4) Any interest accrued on the escrow account that is over and above the total value required by subparagraph 6.1.5 P.4 shall go to the WIND FARM owner.
- (5) In order to provide funding for decommissioning at the time of decommissioning, the WIND FARM applicant or WIND FARM owner may exchange a new irrevocable letter of credit in an amount equal to the amount in the escrow account in exchange for the GOVERNING BODY agreeing to a release of the full amount of the escrow account.
- h. Should the salvage value of components be adjusted downward or the decommissioning costs adjusted upward pursuant to paragraph 6.1.5 P.4.(f), the amount to be placed in the escrow account pursuant to this paragraph 6.1.5 P.4. shall be increased to reflect the adjustment, as if the adjusted estimate were the initial estimate.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- i. Any financial assurance required per the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5 S. shall count towards the total financial assurance required for compliance with paragraph 6.1.1A.5.
 5. The Zoning Administrator may, but is not required to, deem the WIND FARM abandoned with respect to some, but not all, of the WIND FARM TURBINES in the WIND FARM. In that event the Zoning Administrator may draw upon the financial assurance to perform the reclamation work as to those WIND FARM TURBINES only. Upon completion of that reclamation work, the salvage value and reclamation costs shall be recalculated as to the remaining WIND FARM TURBINES in the WIND FARM.
 6. The Site Reclamation Plan shall be included as a condition of approval by the BOARD and the signed and executed irrevocable letter of credit and evidence of the escrow account must be submitted to the Zoning Administrator prior to any Zoning Use Permit approval.
- R. Complaint Hotline
1. Prior to the commencement of construction on the WIND FARM and during the entire term of the County Board SPECIAL USE permit and any extension, the applicant and Owner shall establish a telephone number hotline for the general public to call with any complaints or questions.
 2. The telephone number hotline shall be publicized and posted at the operations and maintenance center and the construction marshalling yard.
 3. The telephone number hotline shall be manned during usual business hours and shall be an answering recording service during other hours.
 4. Each complaint call to the telephone number hotline shall be logged and identify the name and address of the caller and the reason for the call.
 5. All calls shall be recorded and the recording shall be saved for transcription for a minimum of two years.
- S. Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture
1. The Applicant shall enter into an Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
 2. The Applicant shall bear full responsibility for coordinating any special conditions required in the SPECIAL USE Permit in order to ensure

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

compliance with the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.

3. All requirements of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture shall become requirements of the COUNTY Board SPECIAL USE Permit.
4. Champaign County shall have the right to enforce all requirements of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.

T. Standard Condition for Expiration of WIND FARM County Board SPECIAL USE Permit

A WIND FARM County Board SPECIAL USE Permit designation shall expire pursuant to any time limit included in the Roadway Upgrade and Maintenance agreement required by paragraph 6.1.5 F. or in 10 years if no Zoning Use Permit is granted.

U. Application Requirements

1. In addition to all other information required on the SPECIAL USE Permit application and required by Section 9.1.1 A.2. the application shall contain or be accompanied by the following information:
 - a. A WIND FARM Project Summary, including, to the extent available:
 - (1) A general description of the project, including its approximate name plate generating capacity; the potential equipment manufacturer(s), type(s) of wind turbines, number of wind turbines, and name plate generating capacity of each wind turbine; the maximum height of the WIND FARM TOWER(S); and the maximum diameter of the WIND FARM TOWER rotor(s).
 - (2) The specific proposed location of the WIND FARM including all tax parcels on which the WIND FARM will be constructed.
 - (3) The specific proposed location of all tax parcels required to be included in the WIND FARM County Board SPECIAL USE Permit.
 - (4) A description of the applicant; Owner and Operator, including their respective business structures.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- b. The name(s), address(es), and phone number(s) of the applicant(s), Owner and Operator, and all property owner(s) for the WIND FARM County Board SPECIAL USE Permit.
 - c. A site plan for the installation of all WIND FARM TOWERS indicating the following:
 - (1) The approximate planned location of each WIND FARM TOWER, other PRINCIPAL STRUCTURES, property lines (including identification of adjoining properties), required separations, public access roads and turnout locations, substation(s), electrical cabling from the WIND FARM TOWER to the Substation(s), ancillary equipment, third party transmission lines, maintenance and management facilities, and layout of all structures within the geographical boundaries of any applicable setback.
 - (2) The site plan shall clearly indicate the area of the proposed WIND FARM County Board SPECIAL USE Permit as required by subparagraph 6.1.5 A.1.
 - (3) The separation of all WIND FARM structures from adjacent NON-PARTICIPATING DWELLINGS OR COMMUNITY BUILDINGS or uses shall be shown or dimensioned on the approved site plan for the SPECIAL USE Permit unless the Board authorizes a lesser separation in a special condition of approval or any required and duly authorized waivers of paragraph 6.1.5 C. Authorization of a separation of less than 90% of that indicated on the approved site plan for the SPECIAL USE Permit shall require an updated noise study meeting the requirements of paragraph 6.1.5 G. to be submitted with the Zoning Use Permit application. WIND FARM structures include WIND FARM TOWERS, substations, third party transmission lines, maintenance and management facilities, or other significant structures.
 - d. The Applicant shall include a copy of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture with the Special Use Permit Application to authorize construction.
 - e. All other required studies, reports, certifications, and approvals demonstrating compliance with the provisions of this Ordinance.
2. The applicant shall notify the COUNTY of any changes to the information provided above that occurs while the SPECIAL USE Permit application is pending.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- V. The approval of a WIND FARM shall not be conditioned on a property value guarantee and shall not require a facility owner to pay into a neighboring property devaluation escrow account. This is a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.
- W. Deadlines for Start of Public Hearing and Governing Body Determination
1. A public hearing for a WIND FARM shall begin within 45 days of filing a complete SPECIAL USE Permit application. This requirement is imposed by Public Act 102-1123 and the number of days shall not be increased or eliminated unless waived by the developer.
 2. A decision on the SPECIAL USE Permit shall be made within 30 days after the conclusion of the public hearing. This requirement is imposed by Public Act 102-1123 and the number of days shall not be increased or eliminated unless waived by the developer.
- X. Should the Illinois Supreme Court find P.A. 102-1123 invalid or should an Illinois Appellate Court find P.A. 102-1123 invalid, and that declaration is not appealed to the Illinois Supreme Court or the Illinois Supreme Court declines to hear an appeal of the Appellate Court's finding and no public hearing for a proposed WIND FARM has begun, the text of this amendment shall be stricken and the text adopted by the Champaign County Board on August 18, 2022 shall be reinstated and shall govern WIND FARMS in Champaign County.
10. Renumber all references to Section **6.1.5 PHOTOVOLTAIC (PV) SOLAR FARM County BOARD SPECIAL USE Permit** to new **Section 6.1.6** and add the following statement to the beginning of new Section 6.1.6:
- Prior to <effective date>, a PHOTOVOLTAIC (PV) SOLAR FARM County BOARD SPECIAL USE Permit may only be authorized in the AG-1, Agriculture, Zoning DISTRICT or the AG-2, Agriculture, Zoning DISTRICT subject to the following standard conditions:
11. Add new **Section 6.1.7 PROPOSED PHOTOVOLTAIC (PV) SOLAR FARM SPECIAL USE Permit as follows:**
- As of <effective date>, a PHOTOVOLTAIC (PV) SOLAR FARM SPECIAL USE Permit may only be authorized in the AG-1, AG-2, I-1, and I-2 Zoning DISTRICTS subject to the following conditions:
- A. In what follows, PV SOLAR FARM should be understood to include COMMUNITY PV SOLAR FARM unless specified otherwise in the relevant section or paragraph.
 - B. General Standard Conditions

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- (1) The area of the PV SOLAR FARM County BOARD SPECIAL USE Permit must include the following minimum areas:
- a. All land that will be exposed to a noise level greater than that authorized to Class A land as established by *35 Ill. Admin. Code Parts 900, 901 and 910* under paragraph 6.1.5I.
 - b. All necessary access lanes or driveways and any required new PRIVATE ACCESSWAYS. For purposes of determining the minimum area of the SPECIAL USE Permit, access lanes or driveways shall be provided a minimum 40 feet wide area.
 - c. All necessary PV SOLAR FARM STRUCTURES and ACCESSORY STRUCTURES including electrical distribution lines, inverters, transformers, common switching stations, and substations not under the ownership of a PUBLICLY REGULATED UTILITY and all waterwells that will provide water for the PV SOLAR FARM. For purposes of determining the minimum area of the SPECIAL USE Permit, underground cable installations shall be provided a minimum 40 feet wide area.
 - d. All aboveground STRUCTURES and facilities shall be of a type and shall be located in a manner that is consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.
- (2) The PV SOLAR FARM County BOARD SPECIAL USE Permit shall not be located in the following areas:
- a. Less than one and one-half miles from an incorporated municipality that has a zoning ordinance except for any power lines of 34.5 kVA or less and any related proposed connection to an existing substation. Any request for a waiver of this minimum separation shall include the following:
 - (a) No part of a PV SOLAR FARM shall be located within a contiguous growth area (CUGA) as indicated in the most recent update of the CUGA in the Champaign County Land Resource Management Plan, and there shall be a separation of one-half mile from a proposed PV SOLAR FARM to a municipal boundary at the time of application for the SPECIAL USE Permit.
 - (b) The ZONING ADMINISTRATOR shall notify in writing any municipality that is located within one and one-half miles from any proposed PV SOLAR FARM upon the receipt of any substantial PV SOLAR FARM SPECIAL

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

USE permit application in addition to any notice otherwise required.

- (c) The PV SOLAR FARM SPECIAL USE Permit application shall include documentation that the applicant has provided a complete copy of the SPECIAL USE Permit application to any municipality within one and one-half miles of the proposed PV SOLAR FARM.
- (d) Municipal subdivision approval for any PV SOLAR FARM land lease exceeding five years may be required by any relevant municipal authority that has an adopted comprehensive plan and when required said subdivision approval shall be necessary for compliance with Section 13.2.1.
- (e) The public hearing for any proposed PV SOLAR FARM that is located within one and one-half miles of a municipality that has a zoning ordinance shall occur at a minimum of two Board meetings that are not less than 28 days apart to provide time for municipal comments during the public hearing, unless the 28 day comment period is waived in writing by any relevant municipality.
- (f) For any proposed PV SOLAR FARM that is located within one and one-half miles of a municipality that has a zoning ordinance, the ZONING ADMINISTRATOR shall notify said municipality of the recommendation by the BOARD after the close of the public hearing.
- (g) After the initial review of the BOARD recommendation for the PV SOLAR FARM SPECIAL USE Permit by the Environment and Land Use Committee of the COUNTY BOARD, if the Environment and Land Use Committee makes a preliminary determination to accept the BOARD recommendation, the PV SOLAR FARM SPECIAL USE Permit shall remain at the Environment and Land Use Committee for a maximum 30-day comment period, or until the next regularly scheduled meeting, to allow comments regarding the PV SOLAR FARM SPECIAL USE Permit to be received from any relevant municipal authority prior to the Environment and Land Use Committee recommendation to the COUNTY BOARD, unless the municipal comment period is waived in writing by any relevant municipality. If a PV SOLAR FARM is not located within one and one-half miles of a municipality the Environment and Land Use Committee

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

recommendation can be referred to the COUNTY BOARD without a comment period.

- (h) If no municipal resolution regarding the PV SOLAR FARM is received from any municipality located within one and one-half miles of the PV SOLAR FARM prior to the consideration of the PV SOLAR FARM SPECIAL USE Permit by the Champaign COUNTY BOARD, the ZONING ADMINISTRATOR shall provide documentation to the COUNTY BOARD that any municipality within one and one-half miles of the PV SOLAR FARM was provided notice of the meeting dates for consideration of the proposed PV SOLAR FARM SPECIAL USE Permit for both the Environment and Land Use Committee and the COUNTY BOARD.

(3) Interconnection to the power grid

- a. The PV SOLAR FARM SPECIAL USE Permit application shall include documentation that the applicant or PV SOLAR FARM is in the queue to acquire an interconnection agreement to the power grid.
- b. Documentation of an executed interconnection agreement with the appropriate electric utility shall be provided prior to issuance of a Zoning Compliance Certificate to authorize operation of the PV SOLAR FARM.

(4) Right to farm

- a. The owners of the subject property and the Applicant, its successors in interest, and all parties to the decommissioning plan and site reclamation plan hereby recognize and provide for the right of agricultural activities to continue on adjacent land consistent with the Right to Farm Resolution 3425.

C. Minimum LOT Standards

- (1) There are no minimum LOT AREA, AVERAGE LOT WIDTH, SETBACK, YARD, or maximum LOT COVERAGE requirements for a PV SOLAR FARM or for LOTS for PV SOLAR FARM substations and/or for PV SOLAR FARM maintenance and management facilities.
- (2) There is no maximum LOT AREA requirement on BEST PRIME FARMLAND.

D. Minimum Standard Conditions for Separations for PV SOLAR FARM from adjacent USES and STRUCTURES

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

The location of each PV SOLAR FARM shall provide the following required separations as measured from the exterior of the above ground portion of the PV SOLAR FARM STRUCTURES and equipment including fencing:

- (1) PV SOLAR FARM fencing shall be set back from the street centerline a minimum of 50 feet. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.
- (2) For properties participating in the solar farm: No required separation from any existing DWELLING or existing PRINCIPAL BUILDING except as required to ensure that a minimum zoning LOT is provided for the existing DWELLING or PRINCIPAL BUILDING.
- (3) For properties not participating in the solar farm:
 - a. A separation of 50 feet between the nearest edge of any component of the PV SOLAR FARM and the nearest point on the property line of the non-participating property. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased except as may be required to comply with the applicable noise regulations of the Illinois Pollution Control Board.
 - b. A separation of 150 feet from the nearest edge of any component of the PV SOLAR FARM and the nearest point on the outside wall of an OCCUPIED COMMUNITY BUILDING or NON-PARTICIPATING DWELLING. This separation is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased except as may be required to comply with the applicable noise regulations of the Illinois Pollution Control Board.
 - c. Additional separation may be required to ensure that the noise level required by *35 Ill. Admin. Code Parts 900, 901 and 910* is not exceeded.
- (4) A separation of at least 500 feet from any of the following unless the SPECIAL USE Permit application includes results provided from an analysis using the Solar Glare Hazard Analysis Tool (SGHAT) for the Airport Traffic Control Tower cab and final approach paths, consistent with the Interim Policy, Federal Aviation Administration (FAA) Review of Solar Energy Projects on Federally Obligated Airports, or the most recent version adopted by the FAA, and the SGHAT results show no detrimental affect with less than a 500 feet separation from any of the following:
 - a. any AIRPORT premises or any AIRPORT approach zone within five miles of the end of the AIRPORT runway; or

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- b. any RESTRICTED LANDING AREA that is NONCONFORMING or which has been authorized by SPECIAL USE Permit and that existed on or for which there had been a complete SPECIAL USE Permit application received by April 22, 2010, or any approach zone for any such RESTRICTED LANDING AREA; or
 - c. any RESIDENTIAL AIRPORT that existed on or for which there had been a complete SPECIAL USE Permit application received by April 22, 2010, or any approach zone for any such RESIDENTIAL AIRPORT.
 - (5) A separation of at least 500 feet between substations and transmission lines of greater than 34.5 kVA to adjacent dwellings and residential DISTRICTS.
 - (6) Electrical inverters shall be located as far as possible from property lines and adjacent DWELLINGS consistent with good engineering practice. Inverter locations that are less than 275 feet from the perimeter fence shall require specific approval and may require special sound deadening construction and noise analysis.
- E. Standard Conditions for Design and Installation of any PV SOLAR FARM.
- (1) Any building that is part of a PV SOLAR FARM shall include as a requirement for a Zoning Compliance Certificate, a certification by an Illinois Professional Engineer or Illinois Licensed Structural Engineer or other qualified professional that the constructed building conforms to Public Act 96-704 regarding building code compliance and conforms to the Illinois Accessibility Code.
 - (2) Electrical Components
 - a. All electrical components of the PV SOLAR FARM shall conform to the National Electrical Code as amended and shall comply with Federal Communications Commission (FCC) requirements.
 - b. Burying power and communication wiring underground shall be minimized consistent with best management practice regarding PV SOLAR FARM construction and minimizing impacts on agricultural drainage tile.
 - (3) Maximum Height. The height limitation established in Section 5.3 shall not apply to a PV SOLAR FARM. The maximum height of all above ground STRUCTURES shall be identified in the application and as approved in the SPECIAL USE Permit. No component of a solar panel shall have a height of more than 20 feet above ground when the solar

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

arrays are at full tilt. This height limit is a statutory requirement by 55 ILCS 5/5-12020 and shall not be increased.

- (4) Warnings
 - a. A reasonably visible warning sign concerning voltage must be placed at the base of all pad-mounted transformers and substations.
- (5) No construction may intrude on any easement or right-of-way for a GAS PIPELINE or HAZARDOUS LIQUID PIPELINE, an underground water main or sanitary sewer, a drainage district ditch or tile, or any other public utility facility unless specifically authorized by a crossing agreement that has been entered into with the relevant party.

F. Standard Conditions to Mitigate Damage to Farmland

- (1) All underground wiring or cabling for the PV SOLAR FARM shall be at a minimum depth as established by the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.
- (2) Protection of agricultural drainage tile
 - a. Protection of agricultural drainage tile shall comply with the Agriculture Impact Mitigation Agreement with the Illinois Department of Agriculture as required by Section 6.1.7 R.
 - b. The applicant shall endeavor to locate all existing agricultural drainage tile prior to establishing any construction staging areas, construction of any necessary PV SOLAR FARM access lanes or driveways, construction of any PV SOLAR FARM STRUCTURES, any common switching stations, substations, and installation of underground wiring or cabling. The applicant shall contact affected landowners and tenants and the Champaign County Soil and Water Conservation District and any relevant drainage district for their knowledge of tile line locations prior to the proposed construction. Drainage districts shall be notified at least two weeks prior to any likely disruption of a drainage district tile.
 - c. The location of drainage district tile lines shall be identified prior to any construction and drainage district tile lines shall be protected from disturbance as follows:
 - (a) All identified drainage district tile lines and any known existing drainage district tile easement shall be staked or flagged prior to construction to alert construction crews of

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

the presence of drainage district tile and the related easement.

- (b) Any drainage district tile for which there is no existing easement shall be protected from disturbance by a 30 feet wide no-construction buffer on either side of the drainage district tile. The no-construction buffer shall be staked or flagged prior to the start of construction and shall remain valid for the lifetime of the PV SOLAR FARM SPECIAL USE Permit and during any deconstruction activities that may occur pursuant to the PV SOLAR FARM SPECIAL USE Permit.
- (c) Construction shall be prohibited within any existing drainage district easement and also prohibited within any 30 feet wide no-construction buffer on either side of drainage district tile that does not have an existing easement unless specific construction is authorized in writing by all commissioners of the relevant drainage district. A copy of the written authorization shall be provided to the Zoning Administrator prior to the commencement of construction.
- d. Any agricultural drainage tile located underneath construction staging areas, access lanes, driveways, any common switching stations, and substations shall be replaced as required in Section 6.3 of the Champaign County Storm Water Management and Erosion Control Ordinance.
- e. Any agricultural drainage tile that must be relocated shall be relocated as required in the Champaign County Storm Water Management and Erosion Control Ordinance and consistent with the Agriculture Impact Mitigation Agreement with the Illinois Department of Agriculture.
- f. The applicant shall coordinate with the drainage district and provide a drainage district 48 hours to inspect all trenches and/or excavations in the vicinity of suspected drainage district tile locations in order to verify any damage or disturbance to drainage district tile.
- g. Conformance of any relocation and/or repair of drainage district tile with the Champaign County Storm Water Management and Erosion Control Ordinance shall be certified by an Illinois Professional Engineer. Written approval by the drainage district shall be received prior to any backfilling of the relocated and/or repaired drain tile and a copy of the approval shall be submitted to the Zoning Administrator. As-built drawings of any relocated

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

and/or repaired district tile shall be provided to both the relevant drainage district and the Zoning Administrator.

- h. All tile lines that are damaged, cut, or removed shall be staked or flagged in such manner that they will remain visible until the permanent repairs are completed. In addition, the location of damaged drain tile lines shall be recorded using Global Positioning Systems (GPS) technology.
 - i. All exposed tile lines shall be screened or otherwise protected to prevent the entry into the tile of foreign materials, loose soil, small mammals, etc.
 - j. Permanent tile repairs shall be made within 14 days of the tile damage provided that weather and soil conditions are suitable or a temporary tile repair shall be made. Immediate temporary repair shall also be required if water is flowing through any damaged tile line. Temporary repairs are not needed if the tile lines are dry and water is not flowing in the tile provided the permanent repairs can be made within 14 days of the damage. All permanent and temporary tile repairs shall be made as detailed in the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.5R. and shall not be waived or modified except as authorized in the SPECIAL USE Permit.
 - k. All damaged tile shall be repaired so as to operate as well after construction as before the construction began.
- (3) All soil conservation practices (such as terraces, grassed waterways, etc.) that are damaged by PV SOLAR FARM construction and/or decommissioning shall be restored by the applicant to the pre-PV SOLAR FARM construction condition in a manner consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.
- (4) Topsoil replacement
- All topsoil shall be placed in a manner consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.
- (5) Mitigation of soil compacting and rutting
- a. The Applicant shall not be responsible for mitigation of soil compaction and rutting if exempted by the PV SOLAR FARM lease.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- b. All mitigation of soil compaction and rutting shall be consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.

- (6) Land leveling
 - a. The Applicant shall not be responsible for leveling of disturbed land if exempted by the PV SOLAR FARM lease.

 - b. All land leveling shall be consistent with the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R.

- (7) Permanent Erosion and Sedimentation Control Plan
 - a. Prior to the approval of any Zoning Use Permit, the Applicant shall provide a permanent soil erosion and sedimentation plan for the PV SOLAR FARM including any access road that conforms to the relevant Natural Resources Conservation Service guidelines and that is prepared by an Illinois Licensed Professional Engineer.

 - b. As-built documentation of all permanent soil erosion and sedimentation improvements for the PV SOLAR FARM including any access road prepared by an Illinois Licensed Professional Engineer shall be submitted and accepted by the Zoning Administrator prior to approval of any Zoning Compliance Certificate.

- (8) Retention of all topsoil

No topsoil may be removed, stripped, or sold from the proposed SPECIAL USE Permit site pursuant to or as part of the construction of the PV SOLAR FARM.

- (9) Minimize disturbance to BEST PRIME FARMLAND
 - a. Any PV SOLAR FARM to be located on BEST PRIME FARMLAND shall minimize the disturbance to BEST PRIME FARMLAND as follows:
 - (a) The disturbance to BEST PRIME FARMLAND caused by construction and operation of the PV SOLAR FARM shall be minimized at all times consistent with good engineering practice.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- (b) Disturbance to BEST PRIME FARMLAND shall be offset by establishment of a vegetative ground cover within the PV SOLAR FARM that includes the following:
- i. The vegetative ground cover shall use native plant species as much as possible and shall be based on a site assessment of the site geography and soil conditions.
 - ii. The species selected shall serve a secondary habitat purpose as much as possible.
 - iii. Maintenance of the vegetative ground cover shall use a combination of management approaches to ensure safe, cost-effective, reliable maintenance while minimizing environmental risks.
 - iv. The plan to establish and maintain a vegetative ground cover that includes native plant species as much as possible shall be detailed in a landscape plan included in the PV SOLAR FARM SPECIAL USE Permit application. The landscape plan shall include the weed control plan required by Section 6.1.7 P.3.

G. Standard Conditions for Use of Public Streets

Any PV SOLAR FARM Applicant proposing to use any County Highway or a township or municipal STREET for the purpose of transporting PV SOLAR FARM or Substation parts and/or equipment for construction, operation, or maintenance of the PV SOLAR FARM or Substation(s), shall identify all such public STREETS and pay the costs of any necessary permits and the costs to repair any damage to the STREETS specifically and uniquely attributable to the PV SOLAR FARM construction, as follows:

- (1) Prior to the close of the public hearing before the BOARD, the Applicant shall enter into a Roadway Upgrade and Maintenance agreement approved by the County Engineer and State's Attorney; or Township Highway Commissioner; or municipality where relevant, except for any COMMUNITY PV SOLAR FARM for which the relevant highway authority has agreed in writing to waive the requirements of subparagraphs 6.1.7 G.1, 6.1.7 G.2, and 6.1.7 G.3, and the signed and executed Roadway Upgrade and Maintenance agreements must provide for the following minimum conditions:
 - a. The applicant shall agree to conduct a pre-PV SOLAR FARM construction baseline survey to determine existing STREET

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

conditions for assessing potential future damage including the following:

- (a) A videotape of the affected length of each subject STREET supplemented by photographs if necessary.
 - (b) Pay for costs of the County to hire a consultant to make a study of any structure on the proposed route that the County Engineer feels may not carry the loads likely during the PV SOLAR FARM construction.
 - (c) Pay for any strengthening of STREET structures that may be necessary to accommodate the proposed traffic loads caused by the PV SOLAR FARM construction.
- b. The Applicant shall agree to pay for costs of the County Engineer to hire a consultant to make a study of any structure on the proposed route that the County Engineer feels may not carry the loads likely during the PV SOLAR FARM construction and pay for any strengthening of structures that may be necessary to accommodate the proposed traffic loads caused by the PV SOLAR FARM construction.
 - c. The Applicant shall agree upon an estimate of costs for any other necessary roadway improvements prior to construction.
 - d. The Applicant shall obtain any necessary approvals for the STREET improvements from the relevant STREET maintenance authority.
 - e. The Applicant shall obtain any necessary Access Permits including any required plans.
 - f. The Applicant shall erect permanent markers indicating the presence of underground cables.
 - g. The Applicant shall install marker tape in any cable trench.
 - h. The Applicant shall become a member of the Illinois state wide One-Call Notice System (otherwise known as the Joint Utility Locating Information for Excavators or “JULIE”) and provide JULIE with all of the information necessary to update its record with respect to the PV SOLAR FARM.
 - i. The Applicant shall use directional boring equipment to make all crossings of County Highways for the cable collection system.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- j. The Applicant shall notify the STREET maintenance authority in advance of all oversize moves and crane crossings.
- k. The Applicant shall provide the County Engineer with a copy of each overweight and oversize permit issued by the Illinois Department of Transportation for the PV SOLAR FARM construction.
- l. The Applicant shall transport the PV SOLAR FARM loads so as to minimize adverse impact on the local traffic including farm traffic.
- m. The Applicant shall schedule PV SOLAR FARM construction traffic in a way to minimize adverse impacts on emergency response vehicles, rural mail delivery, school bus traffic, and local agricultural traffic.
- n. The Applicant shall provide as much advance notice as in commercially reasonable to obtain approval of the STREET maintenance authority when it is necessary for a STREET to be closed due to a crane crossing or for any other reason. Notwithstanding the generality of the aforementioned, the Applicant will provide 48 hours notice to the extent reasonably practicable.
- o. The Applicant shall provide signs indicating all highway and STREET closures and work zones in accordance with the Illinois Department of Transportation Manual on Uniform Traffic Control Devices.
- p. The Applicant shall establish a single escrow account and a single Irrevocable Letter of Credit for the cost of all STREET upgrades and repairs pursuant to the PV SOLAR FARM construction.
- q. The Applicant shall notify all relevant parties of any temporary STREET closures.
- r. The Applicant shall obtain easements and other land rights needed to fulfill the Applicant's obligations under this Agreement.
- s. The Applicant shall agree that the County shall design all STREET upgrades in accordance with the most recent edition of the IDOT Bureau of Local Roads and Streets Manual.
- t. The Applicant shall provide written Notice to Proceed to the relevant STREET maintenance authority by December 31 of each year that identifies the STREETS to be upgraded during the following year.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- u. The Applicant shall provide dust control and grading work to the reasonable satisfaction of the County Engineer on STREETS that become aggregate surface STREETS.
 - v. The Applicant shall conduct a post-PV SOLAR FARM construction baseline survey similar to the pre-PV SOLAR FARM construction baseline survey to identify the extent of repairs necessary to return the STREETS to the pre-PV SOLAR FARM construction condition.
 - w. The Applicant shall pay for the cost of all repairs to all STREETS that are damaged by the Applicant during the construction of the PV SOLAR FARM and restore such STREETS to the condition they were in at the time of the pre-PV SOLAR FARM construction inventory.
 - x. All PV SOLAR FARM construction traffic shall exclusively use routes designated in the approved Transportation Impact Analysis.
 - y. The Applicant shall provide liability insurance in an acceptable amount to cover the required STREET construction activities.
 - z. The Applicant shall pay for the present worth costs of life consumed by the construction traffic as determined by the pavement management surveys and reports on the roads which do not show significant enough deterioration to warrant immediate restoration.
 - aa. Provisions for expiration date on the agreement.
 - bb. Other conditions that may be required.
- (2) A condition of the County Board SPECIAL USE Permit approval shall be that the Zoning Administrator shall not authorize a Zoning Use Permit for the PV SOLAR FARM until the County Engineer and State’s Attorney, or Township Highway Commissioner, or municipality where relevant, has approved a Transportation Impact Analysis provided by the Applicant and prepared by an independent engineer that is mutually acceptable to the Applicant and the County Engineer and State’s Attorney, or Township Highway Commissioner, or municipality where relevant, that includes the following:
- a. Identify all such public STREETS or portions thereof that are intended to be used by the Applicant during construction of the PV SOLAR FARM as well as the number of loads, per axle weight of each load, and type of equipment that will be used to transport each load.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- b. A schedule of the across road culverts and bridges affected by the project and the recommendations as to actions, if any, required with respect to such culverts and bridges and estimates of the cost to replace such culverts and bridges.
 - c. A schedule of the anticipated STREET repair costs to be made in advance of the PV SOLAR FARM construction and following construction of the PV SOLAR FARM.
 - d. The Applicant shall reimburse the County Engineer, or Township Highway Commissioner, or municipality where relevant, for all reasonable engineering fees including the cost of a third-party consultant, incurred in connection with the review and approval of the Transportation Impact Analysis.
- (3) At such time as decommissioning takes place, the Applicant or its successors in interest shall enter into a Roadway Use and Repair Agreement with the appropriate highway authority.
- H. Standard Conditions for Coordination with Local Fire Protection District
- (1) The Applicant shall submit to the local fire protection district a copy of the site plan.
 - (2) Upon request by the local fire protection district, the Owner or Operator shall cooperate with the local fire protection district to develop the fire protection district's emergency response plan.
 - (3) Nothing in this section shall alleviate the need to comply with all other applicable fire laws and regulations.
- I. Standard Conditions for Allowable Noise Level
- (1) Noise levels from any PV SOLAR FARM shall be in compliance with the applicable Illinois Pollution Control Board (IPCB) regulations (*35 Illinois Administrative Code*, Subtitle H: Noise, Parts 900, 901, 910). This is a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.
 - (2) The Applicant shall submit manufacturer's sound power level characteristics and other relevant data regarding noise characteristics of proposed PV SOLAR FARM equipment necessary for a competent noise analysis.
 - (3) The Applicant, through the use of a qualified professional, as part of the siting approval application process, shall appropriately demonstrate compliance with the above noise requirements as follows:

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- a. The SPECIAL USE Permit application for other than a COMMUNITY PV SOLAR FARM shall include a noise analysis that includes the following:
 - (a) The pre-development 24-hour ambient background sound level shall be identified at representative locations near the site of the proposed PV SOLAR FARM.
 - (b) Computer modeling shall be used to generate the anticipated sound level resulting from the operation of the proposed PV SOLAR FARM within 1,500 feet of the proposed PV SOLAR FARM.
 - (c) Results of the ambient background sound level monitoring and the modeling of anticipated sound levels shall be clearly stated in the application and the application shall include a map of the modeled noise contours within 1,500 feet of the proposed PV SOLAR FARM.
 - (d) The application shall also clearly state the assumptions of the computer model's construction and algorithms so that a competent and objective third party can as simply as possible verify the anticipated sound data and sound levels.
- b. For a COMMUNITY PV SOLAR FARM the Board may require submission of a noise analysis that meets the standard of paragraph 6.1.7 G.(3)a.
- (4) After construction of the PV SOLAR FARM, the Zoning Administrator shall take appropriate enforcement action as necessary to investigate noise complaints in order to determine the validity of the complaints and take any additional enforcement action as proves warranted to stop any violation that is occurring, including but not limited to the following:
 - a. The Zoning Administrator shall make the Environment and Land Use Committee aware of complaints about noise that have been received by the Complaint Hotline.
 - b. If the Environment and Land Use Committee determines that the noise is excessive, the Environment and Land Use Committee shall require the Owner or Operator to take responsible steps to mitigate the excessive noise.
- J. Standard Conditions for Endangered Species Consultation

The Applicant shall apply for consultation with the Endangered Species Program of the Illinois Department of Natural Resources. The application shall include a copy of the Agency Action Report from the Endangered Species Program of the

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

Illinois Department of Natural Resources or, if applicable, a copy of the Detailed Action Plan Report submitted to the Endangered Species Program of the Illinois Department of Natural Resources and a copy of the response from the Illinois Department of Natural Resources.

K. Standard Conditions for Historic and Archaeological Resources Review

The Applicant shall apply for consultation with the State Historic Preservation Officer of the Illinois Department of Natural Resources. The application shall include a copy of the Agency Action Report for the State Historic Preservation Officer of the Illinois Department of Natural Resources.

L. Standard Conditions for Acceptable Fish and Wildlife Impacts

The applicant shall apply for consultation with the United States Fish and Wildlife Service's Information for Planning and Consulting environmental review or a comparable successor tool that is consistent with any applicable United States Fish and Wildlife Service solar wildlife guidelines that have been subject to public review. The application shall include a copy of the consultation review by the U.S. Fish and Wildlife Service.

M. Screening and Fencing

(1) Perimeter fencing

- a. PV SOLAR FARM equipment and structures shall be fully enclosed and secured by a fence with a minimum height of 6 feet and no more than 25 feet. This limit on fence height is a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.
- b. Knox boxes and keys shall be provided at locked entrances for emergency personnel access.
- c. Vegetation between the fencing and the LOT LINE shall be maintained such that NOXIOUS WEEDS are controlled or eradicated consistent with the Illinois Noxious Weed Law (505 ILCS 100/1 *et. seq.*). Management of the vegetation shall be explained in the application.

(2) Screening

- a. A visual screen shall be provided around the perimeter of the PV SOLAR FARM as follows:
 - (a) The visual screen shall be provided for any part of the PV SOLAR FARM that is visible to and located within 1,000 feet of an existing DWELLING or residential DISTRICT except that the visual screen may not be required within the

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

full 1,000 feet of an existing DWELLING or residential DISTRICT provided the Applicant submits a landscape plan prepared by an Illinois Registered Landscape Architect and the BOARD finds that the visual screen in the landscape plan provides adequate screening. However, the visual screen shall not be required if the PV SOLAR FARM is not visible to a DWELLING or residential DISTRICT by virtue of the existing topography.

- (b) The visual screen shall be waived if the owner(s) of a relevant DWELLING(S) have agreed in writing to waive the screening requirement and a copy of the written waiver is submitted to the BOARD or GOVERNING BODY.
- (c) The visual screen shall be a vegetated buffer as follows:
 - i. A vegetated visual screen buffer that shall include a continuous line of native evergreen foliage and/or native shrubs and/or native trees and/or any existing wooded area and/or plantings of tall native grasses and other native flowering plants and/or an area of agricultural crop production that will conceal the PV SOLAR FARM from view from adjacent abutting property may be authorized as an alternative visual screen subject to specific conditions.
 - ii. Any vegetation that is part of the approved visual screen buffer shall be maintained in perpetuity of the PV SOLAR FARM. If the evergreen foliage below a height of 7 feet disappears over time, the screening shall be replaced.
 - iii. The continuous line of native evergreen foliage and/or native shrubs and/or native trees shall be planted at a minimum height of 5 feet tall and shall be planted in multiple rows as required to provide a 50% screen within 2 years of planting. The planting shall otherwise conform to Natural Resources Conservation Service Practice Standard 380 Windbreak/Shelterbreak Establishment except that the planting shall be located as close as possible to the PV SOLAR FARM fence while still providing adequate clearance for maintenance.
 - iv. A planting of tall native grasses and other native flowering plants may be used as a visual screen buffer for any PV module installation that is no more than

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

8 feet tall provided that the width of planting shall be authorized by the BOARD and the planting shall otherwise be planted and maintained per the recommendations of the Natural Resources Conservation Service Practice Standard 327 Conservation Cover and further provided that the PV SOLAR FARM perimeter fence is opaque.

- v. An area of agricultural crop production may also be authorized by the BOARD as an alternative visual screen buffer with a width of planting as authorized by the BOARD provided that the PV SOLAR FARM perimeter fence is opaque. Any area of crop production that is used as a vegetated visual screen shall be planted annually and shall be replanted as necessary to ensure a crop every year regardless of weather or market conditions.
- vi. Any vegetated screen buffer shall be detailed in a landscape plan drawing that shall be included with the PV SOLAR FARM SPECIAL USE Permit application.

N. Standard Conditions to Minimize Glare

- (1) The design and construction of the PV SOLAR FARM shall minimize glare that may affect adjacent properties and the application shall include an explanation of how glare will be minimized.
- (2) After construction of the PV SOLAR FARM, the Zoning Administrator shall take appropriate enforcement action as necessary to investigate complaints of glare in order to determine the validity of the complaints and take any additional enforcement action as proves warranted to stop any significant glare that is occurring, including but not limited to the following:
 - a. The Zoning Administrator shall make the Environment and Land Use Committee aware of complaints about glare that have been received by the Complaint Hotline.
 - b. If the Environment and Land Use Committee determines that the glare is excessive, the Environment and Land Use Committee shall require the Owner or Operator to take reasonable steps to mitigate the excessive glare such as the installation of additional screening.

O. Standard Condition for Liability Insurance

- (1) The Owner or Operator of the PV SOLAR FARM shall maintain a current general liability policy covering bodily injury and property damage with

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

minimum limits of at least \$5 million per occurrence and \$~~520~~ million in the aggregate.

- (2) The general liability policy shall identify landowners in the SPECIAL USE Permit as additional insured.

P. Operational Standard Conditions

(1) Maintenance

- a. The Owner or Operator of the PV SOLAR FARM must submit, on an annual basis, a summary of operation and maintenance reports to the Environment and Land Use Committee and any other operation and maintenance reports as the Environment and Land Use Committee reasonably requests.
- b. Any physical modification to the PV SOLAR FARM that increases the number of solar conversion devices or structures and/or the land area occupied by the PV SOLAR FARM shall require a new County BOARD SPECIAL USE Permit. Like-kind replacements shall not require recertification nor will replacement of transformers, cabling, etc. provided replacement is done in fashion similar to the original installation.
- c. The Application shall explain methods and materials used to clean the PV SOLAR FARM equipment including an estimation of the daily and annual gallons of water used and the source of the water and management of wastewater. The BOARD may request copies of well records from the Illinois State Water Survey and may require an estimate by a qualified hydrogeologist of the likely impact on adjacent waterwells.

(2) Materials Handling, Storage and Disposal

- a. All solid wastes related to the construction, operation and maintenance of the PV SOLAR FARM shall be removed from the site promptly and disposed of in accordance with all Federal, State and local laws.
- b. All hazardous materials related to the construction, operation and maintenance of the PV SOLAR FARM shall be handled, stored, transported and disposed of in accordance with all applicable local, State and Federal laws.

(3) Vegetation management

- a. The PV SOLAR FARM SPECIAL USE Permit application shall include a weed control plan for the total area of the SPECIAL USE

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

Permit including areas both inside of and outside of the perimeter fencing.

- b. The weed control plan shall ensure the control and/or eradication of NOXIOUS WEEDS consistent with the Illinois Noxious Weed Law (55 ILCS 100/1 *et. seq.*).
- c. The weed control plan shall be explained in the application.

Q. Standard Conditions for Decommissioning and Site Reclamation Plan

- (1) The Applicant shall submit a signed decommissioning and site reclamation plan conforming to the requirements of paragraph 6.1.1A. and matching the overall deconstruction and land restoration requirements of the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture. The decommissioning and deconstruction requirements of the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture is a statutory requirement by 55 ILCS 5/5-12020 and shall not be changed.
- (2) In addition to the purposes listed in subparagraph 6.1.1A.4., the decommissioning and site reclamation plan shall also include provisions for anticipated repairs to any public STREET used for the purpose of reclamation of the PV SOLAR FARM and all costs related to removal of access driveways.
- (3) The decommissioning and site reclamation plan required in paragraph 6.1.1A. shall also include the following:
 - a. A stipulation that the applicant or successor shall notify the GOVERNING BODY by certified mail of the commencement of voluntary or involuntary bankruptcy proceeding, naming the applicant as debtor, within ten days of commencement of proceeding.
 - b. A stipulation that the applicant shall agree that the sale, assignment in fact or law, or such other transfer of applicant's financial interest in the PV SOLAR FARM shall in no way affect or change the applicant's obligation to continue to comply with the terms of this plan. Any successor in interest, assignee, and all parties to the decommissioning and site reclamation plan shall assume the terms, covenants, and obligations of this plan and agrees to assume all reclamation liability and responsibility for the PV SOLAR FARM.
 - c. Authorization for the GOVERNING BODY and its authorized representatives for right of entry onto the PV SOLAR FARM premises for the purpose of inspecting the methods of reclamation or for performing actual reclamation if necessary.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- d. A stipulation that at such time as decommissioning takes place the Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan are required to enter into a Roadway Use and Repair Agreement with the relevant highway authority.
- e. A stipulation that the Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall provide evidence of any new, additional, or substitute financing or security agreement to the Zoning Administrator throughout the operating lifetime of the project.
- f. A stipulation that the Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall be obliged to perform the work in the decommissioning and site reclamation plan before abandoning the PV SOLAR FARM or prior to ceasing production of electricity from the PV SOLAR FARM, after it has begun, other than in the ordinary course of business. This obligation shall be independent of the obligation to pay financial assurance and shall not be limited by the amount of financial assurance. The obligation to perform the reclamation work shall constitute a covenant running with the land.
- g. The decommissioning and site reclamation plan shall provide for payment of any associated costs that Champaign COUNTY may incur in the event that decommissioning is actually required. Associated costs include all administrative and ancillary costs associated with drawing upon the financial assurance and performing the reclamation work and shall include but not be limited to: attorney's fees; construction management and other professional fees; and, the costs of preparing requests for proposals and bidding documents required to comply with State law or Champaign COUNTY purchasing policies.
- h. The depth of removal of foundation concrete below ground shall be as required in the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture. The depth of removal of foundation concrete shall be certified in writing by an Illinois Licensed Professional Engineer and the certification shall be submitted to the Zoning Administrator.
- i. Underground electrical cables of a depth of 5 feet or greater may be left in place.
- j. The hole resulting from the removal of foundation concrete during decommissioning shall be backfilled as required in the Agricultural

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

Impact Mitigation Agreement with the Illinois Department of Agriculture.

- k. A stipulation that should the decommissioning and site reclamation plan be deemed invalid by a court of competent jurisdiction the PV SOLAR FARM SPECIAL USE Permit shall be deemed void.
 - l. A stipulation that the Applicant's obligation to complete the decommissioning and site reclamation plan and to pay all associated costs shall be independent of the Applicant's obligation to provide financial assurance.
 - m. A stipulation that the liability of the Applicant's failure to complete the decommissioning and site reclamation plan or any breach of the decommissioning and site reclamation plan requirement shall not be capped by the amount of financial assurance.
 - n. If the Applicant desires to remove equipment or property credited to the estimated salvage value without the concurrent replacement of the property with property of equal or greater salvage value, or if the Applicant installs equipment or property increasing the cost of decommissioning after the PV SOLAR FARM begins to produce electricity, at any point, the Applicant shall first obtain the consent of the Zoning Administrator. If the Applicant's lien holders remove equipment or property credited to the salvage value, the Applicant shall promptly notify the Zoning Administrator. In either of these events, the total financial assurance shall be adjusted to reflect any change in total salvage value and total decommissioning costs resulting from any such removal or installation.
- (4) To comply with paragraph 6.1.1A.5., the Applicant shall provide financial assurance in the form of an irrevocable letter of credit as follows:
- a. No Zoning Use Permit to authorize construction of the PV SOLAR FARM shall be authorized by the Zoning Administrator until the PV SOLAR FARM owner shall provide the COUNTY with financial assurance to cover 10% of the decommissioning and site reclamation cost as determined in the independent engineer's cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5.
 - b. On or before the sixth anniversary of the Commercial Operation Date, the PV SOLAR FARM Owner shall provide the COUNTY with Financial Assurance to cover 50% of the decommissioning and site reclamation cost as determined in the independent

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

engineer's cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5.

- c. On or before the eleventh anniversary of the Commercial Operation Date, the PV SOLAR FARM Owner shall provide the COUNTY with Financial Assurance to cover 100% of the decommissioning and site reclamation cost as determined in the independent engineer's cost estimate to complete the decommissioning work described in Sections 6.1.1A.4.a. and 6.1.1A.4.b. and 6.1.1A.4.c. and otherwise compliant with Section 6.1.1A.5. and as determined in the updated decommissioning and site reclamation plan filed with the County on or before the end of the tenth year of commercial operation.
- d. Net salvage value may be deducted for decommissioning costs as follows:
 - (a) One of the following standards shall be met:
 - i. The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall maintain the PV SOLAR FARM free and clear of liens and encumbrances, including financing liens and shall provide proof of the same prior to issuance of the SPECIAL USE Permit; or
 - ii. The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall deduct from the salvage value credit the amount of any lien or encumbrance on the PV SOLAR FARM; or
 - iii. Any and all financing and/or financial security agreements entered into by the Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall expressly provide that the agreements are subject to the covenant required by Section 6.1.1A.2 that the reclamation work be done.
 - (b) The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall provide proof of compliance with paragraph 6.1.7 M.4.b.(1). prior to the issuance of any Zoning Use Permit and upon every renewal of the financial assurance and at any other time upon the request of the Zoning Administrator.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- (c) The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall provide in the decommissioning and site reclamation plan for legal transfer of the STRUCTURE to the demolisher to pay the costs of reclamation work, should the reclamation work be performed.
- (d) The net estimated salvage value that is deducted from the estimated decommissioning costs shall be the salvage value that results after all related costs for demolition and any required preparation for transportation for reuse or recycling or for simple disposal and other similar costs including but not limited to the decommissioning of the PV SOLAR FARM STRUCTURES, equipment, and access roads.
- (e) Estimated salvage value shall be based on the average salvage price of the past five years as published in a reputable source for salvage values and shall reflect sound engineering judgement as to anticipated changes in salvage prices prior to the next update of estimated net salvage value.
- e. The GOVERNING BODY has the right to require multiple letters of credit based on the regulations governing federal insurance for deposits.
- f. The Applicant, its successors in interest, and all parties to the decommissioning and site reclamation plan shall adjust the amount of the financial assurance to ensure that it reflects current and accurate information as follows:
 - (a) The Applicant or its successors in interest shall file an updated decommissioning and site reclamation plan with the County on or before the end of the tenth year of commercial operation.
 - (b) The County shall reevaluate the estimated costs of decommissioning and site reclamation every five years after the tenth anniversary of the commercial operation date. The solar farm owner shall provide an updated estimated cost of decommissioning and site reclamation that is provided by an independent Illinois licensed professional engineer.
 - (c) At all times, the value of the irrevocable letter of credit shall equal or exceed the amount of the independent

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

engineer’s cost estimate as increased by known and documented rates of inflation based on the Consumer Price Index since the PV SOLAR FARM was approved.

- g. The long term corporate debt (credit) rating of the letter of credit issuing financial institution by both Standard & Poor’s Financial Services LLC (S&P) and Moody’s Investors Service (Moody’s) shall be equal to or greater than the minimum acceptable long term corporate debt (credit) rating, as follows:
 - (a) The Zoning Administrator shall verify the long term corporate debt (credit) rating of the proposed financial institution by Standard and Poor’s Financial Services LLC (S&P) and/or Moody’s Investors Service (Moody’s) and/or the Kroll Bond Rating Agency.
 - (b) The minimum acceptable long term corporate debt (credit) rating of the proposed financial institution shall be a rating of “A-” by S&P or a rating of “A3” by Moody’s, or a rating of “A-” by Kroll Bond Rating Agency.
 - (c) Whenever the most current long term corporate debt (credit) rating of the proposed financial institution by either S&P, Moody’s, or Kroll Bond Rating Agency is lower than the minimum acceptable long term corporate debt (credit) rating, the letter of credit shall be replaced with a new irrevocable letter of credit from an issuing financial institution whose most current long term corporate debt (credit) rating by either S&P, Moody’s, or Kroll Bond Rating Agency meets or exceeds the minimum acceptable long term corporate debt (credit) rating.
- h. Should the salvage value of components be adjusted downward or the decommissioning costs adjusted upward pursuant to paragraph 6.1.7 Q.4.d., the amount of the irrevocable letter of credit pursuant to this paragraph 6.1.7 Q.4. shall be increased to reflect the adjustment, as if the adjusted estimate were the initial estimate.
- i. Any financial assurance required per the Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture as required by paragraph 6.1.7 R. shall count towards the total financial assurance required for compliance with paragraph 6.1.1A.5.
- j. Unless the Governing Body approves otherwise, the Champaign County State’s Attorney’s Office shall review and approve every Letter of Credit prior to acceptance by the Zoning Administrator.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- (6) The Zoning Administrator may, but is not required to, deem the PV SOLAR FARM abandoned with respect to some, but not all, of the PV SOLAR FARM. In that event, the Zoning Administrator may draw upon the financial assurance to perform the reclamation work as to that portion of the PV SOLAR FARM only. Upon completion of that reclamation work, the salvage value and reclamation costs shall be recalculated as to the remaining PV SOLAR FARM.
 - (7) The decommissioning and site reclamation plan shall be included as a condition of approval by the Board and the signed and executed irrevocable letter of credit and evidence of the escrow account must be submitted to the Zoning Administrator prior to any Zoning Use Permit approval.
- R. Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
- (1) The Applicant shall enter into an Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
 - (2) The Applicant shall bear full responsibility for coordinating any special conditions required in the SPECIAL USE Permit in order to ensure compliance with the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
 - (3) All requirements of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture shall become requirements of the SPECIAL USE Permit.
 - (4) Champaign County shall have the right to enforce all requirements of the signed Agricultural Impact Mitigation Agreement with the Illinois Department of Agriculture.
- S. Complaint Hotline
- (1) Prior to the commencement of construction on the PV SOLAR FARM and during the entire term of the COUNTY Board SPECIAL USE Permit and any extension, the Applicant and Owner shall establish a telephone number hotline for the general public to call with any complaints or questions.
 - (2) The telephone number hotline shall be publicized and posted at the operations and maintenance center and the construction marshalling yard.
 - (3) The telephone number hotline shall be manned during usual business hours and shall be an answering recording service during other hours.

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- (4) Each complaint call to the telephone number hotline shall be logged and identify the name and address of the caller and the reason for the call.
- (5) All calls shall be recorded and the recordings shall be saved for transcription for a minimum of two years.
- (6) A copy of the telephone number hotline log shall be provided to the Zoning Administrator on a monthly basis.
- (7) The Applicant and Owner shall take necessary actions to resolve all legitimate complaints.

T. Standard Conditions for Expiration of PV SOLAR FARM COUNTY Board SPECIAL USE Permit

A PV SOLAR FARM COUNTY Board SPECIAL USE Permit designation shall expire in 10 years if no Zoning Use Permit is granted.

U. Application Requirements

- (1) In addition to all other information required on the SPECIAL USE Permit application and required by Section 9.1.11 A.2., the application shall contain or be accompanied by the following information:
 - a. A PV SOLAR FARM Project Summary, including, to the extent available:
 - (a) A general description of the project, including its approximate DC and AC generating capacity; the maximum number and type of solar devices, and the potential equipment manufacturer(s).
 - (b) The specific proposed location of the PV SOLAR FARM including all tax parcels on which the PV SOLAR FARM will be constructed.
 - (c) The specific proposed location of all tax parcels required to be included in the PV SOLAR FARM COUNTY Board SPECIAL USE Permit.
 - (d) A description of the Applicant, Owner and Operator, including their respective business structures.
 - b. The name(s), address(es), and phone number(s) of the Applicant(s), Owner and Operator, and all property owner(s) for the PV SOLAR FARM SPECIAL USE Permit.
 - c. A site plan for the PV SOLAR FARM indicating the following:

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

- (a) The approximate planned location of all PV SOLAR FARM STRUCTURES, property lines (including identification of adjoining properties), required separations, public access roads and turnout locations, access driveways, solar devices, electrical inverter(s), electrical transformer(s), cabling, switching station, electrical cabling from the PV SOLAR FARM to the Substation(s), ancillary equipment, screening and fencing, third party transmission lines, meteorological station, maintenance and management facilities, and layout of all structures within the geographical boundaries of any applicable setback.
 - (b) The site plan shall clearly indicate the area of the proposed PV SOLAR FARM SPECIAL USE Permit.
 - (c) The location of all below-ground wiring.
 - (d) The location, height, and appearance of all above-ground wiring and wiring structures.
 - (e) The separation of all PV SOLAR FARM structures from adjacent DWELLINGS and/or PRINCIPAL BUILDINGS or uses shall be dimensioned on the approved site plan and that dimension shall establish the effective minimum separation that shall be required for any Zoning Use Permit. Greater separation and somewhat different locations may be provided in the approved site plan for the Zoning Use Permit provided that the greater separation does not increase the noise impacts and/or glare that were approved in the PV SOLAR FARM SPECIAL USE Permit. PV SOLAR FARM structures include substations, third party transmission lines, maintenance and management facilities, or other significant structures.
- d. All other required studies, reports, certifications, and approvals demonstrating compliance with the provisions of this Ordinance.
 - e. The PV SOLAR FARM SPECIAL USE Permit application shall include documentation that the applicant has provided a complete copy of the SPECIAL USE Permit application to any municipality within one-and-one-half miles of the proposed PV SOLAR FARM as required by Section 6.1.7 B.(2)a.(b).
 - f. A municipal resolution regarding the PV SOLAR FARM by any municipality located within one-and-one-half miles of the PV SOLAR FARM must be submitted to the Zoning Administrator prior to the consideration of the PV SOLAR FARM SPECIAL USE Permit by the Champaign COUNTY Board or, in the absence

EXHIBIT A: PROPOSED AMENDMENT DATED 08/17/23 – LESS STRICT INTERPRETATION

12. Add new Section 9.1.11. C.5. as follows:

5. Statutory requirements in Section 6.1.5 or Section 6.1.7. shall not be construed to be inadequate in any way and shall not be the basis for negative Findings of Fact for any WIND FARM or PV SOLAR FARM.

13. Add new Section 9.1.11 D.9. as follows:

9. No WIND FARM or PV SOLAR FARM approval shall include any special condition or waiver that changes any statutory requirement in Section 6.1.5 or Section 6.1.7.

RE: Champaign County Zoning Ordinance Text Amendment Case 086-AT-23

Dear County Office,

This letter is in response to a county memo from your office dated March 10, 2023 regarding the above case which grants affected jurisdictions, including Philo, with a right to protest the proposed text amendment. This letter constitutes the Village of Philo's formal protest of the above referenced proposed text amendment under 086-AT-23. In support of its protest the Village asserts as follows:

1. The Village of Philo previously established the Village of Philo Zoning Ordinance, the Village of Philo Subdivision Ordinance and a Village Comprehensive Plan encompassing the one-and-a-half-mile area outside of the Village.
2. Pursuant to ILCS 5/11-12-4, the Illinois Constitution, applicable case law and all other laws, the Village has extra-territorial jurisdiction over the territory extending 1.5 miles from the Village corporate limits.
3. 55 ILCS 5/5-12014 (b) provides that text amendments to a County Zoning Ordinance must be approved by a "...favorable vote of $\frac{3}{4}$ of all the members of the county board...in the case of a proposed text amendment to the Zoning Ordinance, by resolution of the corporate authorities of the zoned municipality with limits nearest adjacent, filed with the county clerk..."
4. The proposed text amendment affects all corporate authorities in the County of Champaign including, but not limited to, the Village of Philo, Illinois.
5. The proposed text amendment would affect Village of Philo's control of its extraterritorial jurisdiction.
6. Pursuant to 55 ILCS 5/5-12014 and other applicable law, the Village of Philo is entitled to provide this written protest of such text amendment thereby triggering said $\frac{3}{4}$ vote of all of the members of the County Board to approve said text amendment; and
7. In support of the within Village of Philo objection to the above referenced text amendment, the Village hereby asserts that the text amendment, as proposed, would do the following:
 - a. Redefine the separation of each wind farm tower to 1.1 times the maximum blade tip height to the nearest participating dwelling and 2.1 times the maximum blade tip height to the nearest non-participating dwelling or occupied community building thereby creating increased noise levels, noise intrusion, visual blight, diminished television, radio, and internet

reception, negative effects on birds and other wildlife, compromised public safety (particularly during storm events) and nuisances.

- b. Adds provisions relating to solar farms which establish separation of only 50 feet between solar farm fencing and the street centerline, establishes separation of only 50 feet from any solar farm component and the property line of any non-participating properties, establishes a separation of 150 feet from a solar farm to the nearest point on the outside wall of an occupied community building or non-participating dwelling all being insufficient to shield neighboring properties from noise, visual blight, and general nuisances.
- c. Create insufficient spacing of wind turbines and solar farms from residences and/or principal buildings regardless of whether they are participating or non-participating thereby exposing residences and buildings to noise, visual blight, visual intrusion, safety, compromised television, radio and internet reception, and nuisances.

In summary, the Village of Philo hereby enters its objection to the above proposed text amendment and files its formal protest of its approval thereby triggering a $\frac{3}{4}$ vote of all of the members of the Champaign County Board.

RE: Champaign County Zoning Ordinance Text Amendment Case 086-AT-23

Dear County Office,

Your office issued a county memo dated March 10, 2023 regarding Case 086-AT-23 which affects St. Joseph. This letter constitutes the Village of St. Joseph's formal protest of the proposed text amendment under Case 086-AT-23.

The Village of St. Joseph previously established the Village of St. Joseph Zoning Ordinance, the Village of St. Joseph Subdivision Ordinance and a Village Comprehensive Plan encompassing the one-and-a-half-mile area outside of the Village giving extra-territorial jurisdiction over the territory extending 1.5 miles from the Village corporate limits.

55 ILCS 5/5-12014 (b) provides that text amendments to a County Zoning Ordinance must be approved by a "...favorable vote of 3/4 of all the members of the county board...in the case of a proposed text amendment to the Zoning Ordinance, by resolution of the corporate authorities of the zoned municipality with limits nearest adjacent, filed with the county clerk..."

The proposed text amendment affects Village of St. Joseph's control of its extraterritorial jurisdiction. Pursuant to 55 ILCS 5/5-12014 and other applicable law, the Village of St. Joseph is entitled to provide this written protest of such text amendment thereby triggering said 3/4 vote of all of the members of the County Board to approve said text amendment.

The Village of St. Joseph hereby enters its objection to the above-proposed text amendment and files its formal protest of its approval thereby triggering a 3/4 vote of all of the members of the Champaign County Board.

TO: Champaign County Zoning Board of Appeals
Champaign County Environment and Land Use Committee
Champaign County Board

RE: Zoning Ordinance Text Amendment Case 086-AT-23

To Whom It May Concern:

To comply with Public Act 102-1123, I understand Champaign County is presenting and considering a zoning ordinance text amendment related to wind turbines and solar farms. The changes proposed eliminate Village rights to protest zoning decisions. Subdivision assures the opportunity for efficient and effective management of our extra-territorial jurisdiction. Primary concerns are related to the complete eradication of our zoning and subdivision authorities not only in our ETJ, but directly adjacent to our developed lands.

The proposed and current language continues to address the use of solar and wind farms as a special use versus a by-right use. This approach significantly reduces planning authorities relied on for efficient and effective utility servicing and growth. If the uses were permitted in a particular zone then municipalities would have rights to protest the zoning.

Problem one: removal of the language requiring subdivision for leasing situations.

The Village has densely developed lands directly adjacent to zones where solar and wind farms would be permissible by special use and no rights to protest or method to secure our community's utility and servicing interests.

In the County, special uses can be applied to a portion of a legal parcel of record, meaning an entity establishing a solar or wind farm does not have to subdivide to apply a special use to a part of a parcel. Village ordinances require subdivision for land leases over five (5) years. Currently, we rely on the subdivision process to fulfil our responsibilities to residents and businesses using our water and sewer system.

The Village plans for efficient delivery of critical water and sanitary sewer utilities in our planning area to the limits of our ETJ. The Village pays to oversize infrastructure and/or increase the depth of developer-built facilities to assure capacity for future planned land uses. A solar or wind farm needs no water or sanitary service, but can locate on land where provisions are appropriate to reach adjacent lands. A 20-30

year land use exceeds the duration of any comprehensive plan and yet the Village will not have a method in the process to secure these important ETJ interests. If subdivision is not required, the following challenges are foreseen;

- Unable to secure proper easements or the construction of infrastructure for our utility systems;
- Wasted funds to oversize our systems; and,
- Long lengths of dead-end water mains will remain that need to be flushed regularly.

Problem two: Zoning districts where solar and wind farms are permitted by special use.

We strongly oppose solar and wind farms as a special use in AG-2 due to the proximity of the zone to our municipal boundaries. While AG-2 generally is acknowledged as a transition zoning between developed and undeveloped lands, AG-1 also exists directly adjacent to our limits in very key growth areas where water and sanitary sewers may be already stubbed at the property line. (See attachment for County zoning and municipal lands)

Lands that may appear less of a concern due to the distance from current development may be more problematic for the Village due to planned infrastructure. The County's current zoning districts and schema does not recognize the potential for urban expansion. Municipalities could end up with decades long growth boundaries by the installation of solar and wind farms.

Request if adopted:

If compliance with Public Act 102-1123 requires the text amendment language as presented and the County cannot reduce the zoning districts where solar and wind farms are permitted by a special use permit, then it should enact changes to its agricultural zoning districts to diversify and establish new zoning districts which would differentiate between those lands where water and sanitary sewer are possible and planned, and where they are not feasible. Rezoning lands within ETJs could assure freedom for urban, contiguous, and incremental expansion for municipalities.

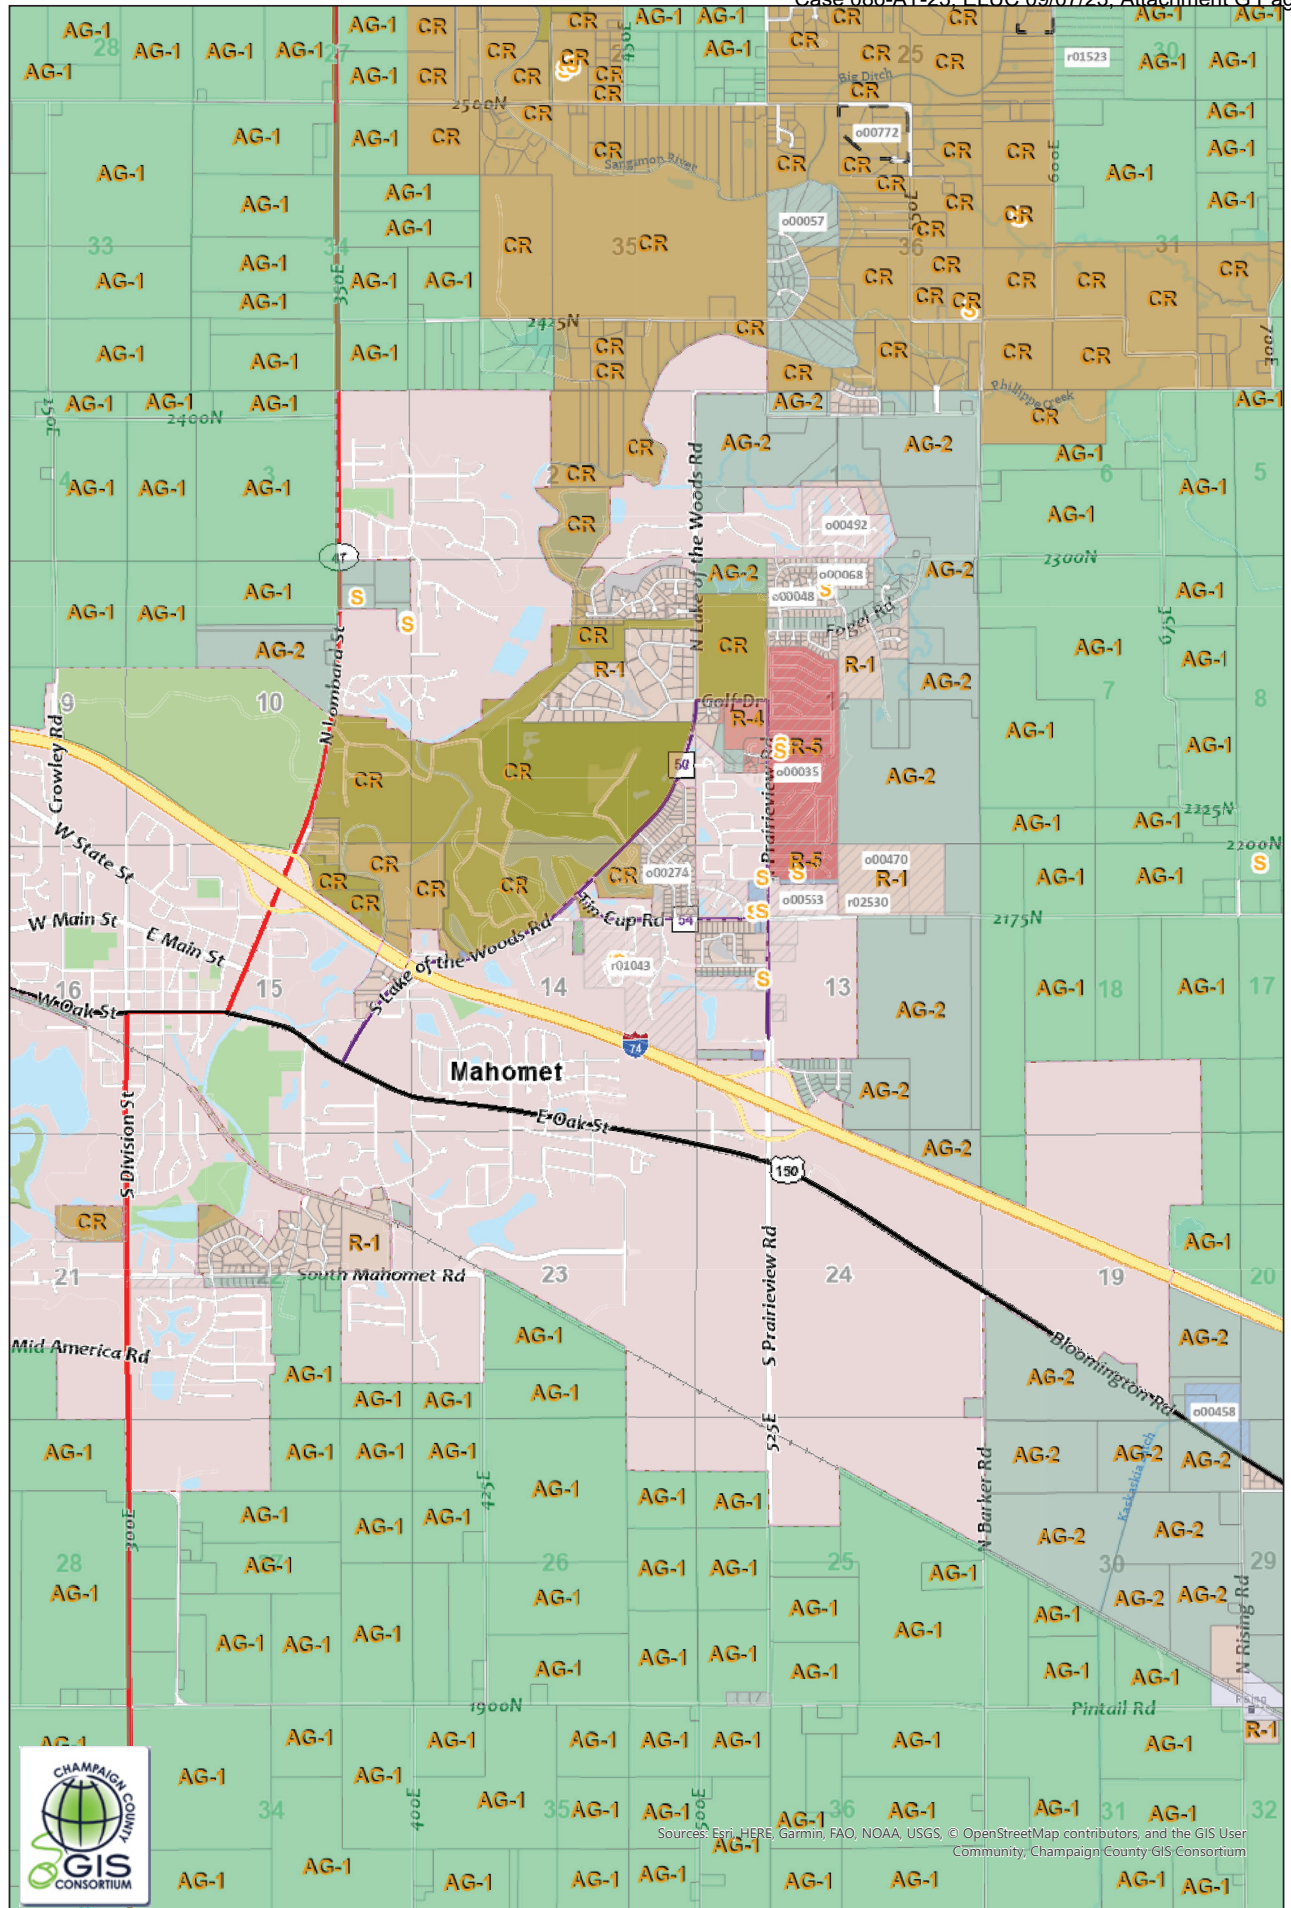

Without an opportunity to provide a say in the zoning of the lands, the assurance of our subdivision process, or the ability to impose specific criteria in the text amendment to address village ETJ concerns, I oppose this zoning ordinance text amendment.

Sincerely,

Sean Widener, Village President
Village of Mahomet

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

Section 5-12020 as follows:

(55 ILCS 5/5-12020)

Sec. 5-12020. Commercial Wind farms, electric-generating wind devices, and commercial wind energy facilities and commercial solar energy facilities.

(a) As used in this Section:

"Commercial solar energy facility" means a "commercial solar energy system" as defined in Section 10-720 of the Property Tax Code. "Commercial solar energy facility" does not mean a utility-scale solar energy facility being constructed at a site that was eligible to participate in a procurement event conducted by the Illinois Power Agency pursuant to subsection (c-5) of Section 1-75 of the Illinois Power Agency Act.

"Commercial wind energy facility" means a wind energy conversion facility of equal or greater than 500 kilowatts in total nameplate generating capacity. "Commercial wind energy facility" includes a wind energy conversion facility seeking an extension of a permit to construct granted by a county or municipality before the effective date of this amendatory Act of the 102nd General Assembly.

"Facility owner" means (i) a person with a direct ownership interest in a commercial wind energy facility or a commercial solar energy facility, or both, regardless of whether the person is involved in acquiring the necessary

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

rights, permits, and approvals or otherwise planning for the construction and operation of the facility, and (ii) at the time the facility is being developed, a person who is acting as a developer of the facility by acquiring the necessary rights, permits, and approvals or by planning for the construction and operation of the facility, regardless of whether the person will own or operate the facility.

"Nonparticipating property" means real property that is not a participating property.

"Nonparticipating residence" means a residence that is located on nonparticipating property and that is existing and occupied on the date that an application for a permit to develop the commercial wind energy facility or the commercial solar energy facility is filed with the county.

"Occupied community building" means any one or more of the following buildings that is existing and occupied on the date that the application for a permit to develop the commercial wind energy facility or the commercial solar energy facility is filed with the county: a school, place of worship, day care facility, public library, or community center.

"Participating property" means real property that is the subject of a written agreement between a facility owner and the owner of the real property that provides the facility owner an easement, option, lease, or license to use the real property for the purpose of constructing a commercial wind energy facility, a commercial solar energy facility, or

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

supporting facilities. "Participating property" also includes real property that is owned by a facility owner for the purpose of constructing a commercial wind energy facility, a commercial solar energy facility, or supporting facilities.

"Participating residence" means a residence that is located on participating property and that is existing and occupied on the date that an application for a permit to develop the commercial wind energy facility or the commercial solar energy facility is filed with the county.

"Protected lands" means real property that is:

(1) subject to a permanent conservation right consistent with the Real Property Conservation Rights Act; or

(2) registered or designated as a nature preserve, buffer, or land and water reserve under the Illinois Natural Areas Preservation Act.

"Supporting facilities" means the transmission lines, substations, access roads, meteorological towers, storage containers, and equipment associated with the generation and storage of electricity by the commercial wind energy facility or commercial solar energy facility.

"Wind tower" includes the wind turbine tower, nacelle, and blades.

(b) Notwithstanding any other provision of law or whether the county has formed a zoning commission and adopted formal zoning under Section 5-12007, a county may establish standards

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

for commercial wind energy facilities, commercial solar energy facilities, or both ~~wind farms and electric generating wind devices~~. The standards may include all of the requirements specified in this Section but may not include requirements for commercial wind energy facilities or commercial solar energy facilities that are more restrictive than specified in this Section, ~~without limitation, the height of the devices and the number of devices that may be located within a geographic area~~. A county may also regulate the siting of commercial wind energy facilities with standards that are not more restrictive than the requirements specified in this Section ~~wind farms and electric generating wind devices~~ in unincorporated areas of the county that are outside ~~of~~ the zoning jurisdiction of a municipality and that are outside the 1.5-mile radius surrounding the zoning jurisdiction of a municipality.

(c) If a county has elected to establish standards under subsection (b), before the county grants siting approval or a special use permit for a commercial wind energy facility or a commercial solar energy facility, or modification of an approved siting or special use permit, the county board of the county in which the facility is to be sited or the zoning board of appeals for the county shall hold ~~There shall be~~ at least one public hearing. The public hearing shall be conducted in accordance with the Open Meetings Act and shall be held not more than 45 days after the filing of the application for the facility. The county shall allow interested parties to a

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

special use permit an opportunity to present evidence and to cross-examine witnesses at the hearing, but the county may impose reasonable restrictions on the public hearing, including reasonable time limitations on the presentation of evidence and the cross-examination of witnesses. The county shall also allow public comment at the public hearing in accordance with the Open Meetings Act. The county shall make its siting and permitting decisions not more than 30 days after the conclusion of the public hearing ~~prior to a siting decision by the county board.~~ Notice of the hearing shall be published in a newspaper of general circulation in the county. A ~~commercial wind energy facility owner, as defined in the Renewable Energy Facilities Agricultural Impact Mitigation Act,~~ must enter into an agricultural impact mitigation agreement with the Department of Agriculture prior to the date of the required public hearing. A commercial wind energy facility owner seeking an extension of a permit granted by a county prior to July 24, 2015 (the effective date of Public Act 99-132) must enter into an agricultural impact mitigation agreement with the Department of Agriculture prior to a decision by the county to grant the permit extension. Counties may allow test wind towers or test solar energy systems to be sited without formal approval by the county board. ~~Any provision of a county zoning ordinance pertaining to wind farms that is in effect before August 16, 2007 (the effective date of Public Act 95-203) may continue in effect~~

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

~~notwithstanding any requirements of this Section.~~

(d) A county with an existing zoning ordinance in conflict with this Section shall amend that zoning ordinance to be in compliance with this Section within 120 days after the effective date of this amendatory Act of the 102nd General Assembly.

(e) A county may ~~not~~ require:

(1) a wind tower of a commercial wind energy facility to be sited as follows, with setback distances measured from the center of the base of the wind tower: ~~or other renewable energy system that is used exclusively by an end user to be setback more than 1.1 times the height of the renewable energy system from the end user's property line.~~

Setback Description

Setback Distance

Occupied Community Buildings

2.1 times the maximum blade tip height of the wind tower to the nearest point on the outside wall of the structure

Participating Residences

1.1 times the maximum blade tip height of the wind tower to the nearest point on the outside wall of the structure

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

Nonparticipating Residences 2.1 times the maximum blade tip height of the wind tower to the nearest point on the outside wall of the structure

Boundary Lines of Participating Property None

Boundary Lines of Nonparticipating Property 1.1 times the maximum blade tip height of the wind tower to the nearest point on the property line of the nonparticipating property

Public Road Rights-of-Way 1.1 times the maximum blade tip height of the wind tower to the center point of the public road right-of-way

Overhead Communication and Electric Transmission and Distribution Facilities (Not Including Overhead way Utility Service Lines to Individual Houses or 1.1 times the maximum blade tip height of the wind tower to the nearest edge of the property line, easement, or right of containing the overhead line

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

Outbuildings)

Overhead Utility Service None

Lines to Individual

Houses or Outbuildings

<u>Fish and Wildlife Areas</u>	<u>2.1 times the maximum blade</u>
<u>and Illinois Nature</u>	<u>tip height of the wind tower</u>
<u>Preserve Commission</u>	<u>to the nearest point on the</u>

	<u>land</u>

This Section does not exempt or excuse compliance with electric facility clearances approved or required by the National Electrical Code, The National Electrical Safety Code, Illinois Commerce Commission, Federal Energy Regulatory Commission, and their designees or successors.

(2) a wind tower of a commercial wind energy facility to be sited so that industry standard computer modeling indicates that any occupied community building or nonparticipating residence will not experience more than 30 hours per year of shadow flicker under planned operating conditions;

(3) a commercial solar energy facility to be sited as follows, with setback distances measured from the nearest

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

edge of any component of the facility:

<u>Setback Description</u>	<u>Setback Distance</u>
<u>Occupied Community Buildings and Dwellings on Nonparticipating Properties</u>	<u>150 feet from the nearest point on the outside wall of the structure</u>
<u>Boundary Lines of Participating Property</u>	<u>None</u>
<u>Public Road Rights-of-Way</u>	<u>50 feet from the nearest edge</u>
<u>Boundary Lines of Nonparticipating Property</u>	<u>50 feet to the nearest point on the property line of the nonparticipating property</u>

(4) a commercial solar energy facility to be sited so that the facility's perimeter is enclosed by fencing having a height of at least 6 feet and no more than 25 feet; and

(5) a commercial solar energy facility to be sited so that no component of a solar panel has a height of more than 20 feet above ground when the solar energy facility's

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

arrays are at full tilt.

The requirements set forth in this subsection (e) may be waived subject to the written consent of the owner of each affected nonparticipating property.

(f) A county may not set a sound limitation for wind towers in commercial wind energy facilities or any components in commercial solar energy facility that is more restrictive than the sound limitations established by the Illinois Pollution Control Board under 35 Ill. Adm. Code Parts 900, 901, and 910.

(g) A county may not place any restriction on the installation or use of a commercial wind energy facility or a commercial solar energy facility unless it adopts an ordinance that complies with this Section. A county may not establish siting standards for supporting facilities that preclude development of commercial wind energy facilities or commercial solar energy facilities.

A request for siting approval or a special use permit for a commercial wind energy facility or a commercial solar energy facility, or modification of an approved siting or special use permit, shall be approved if the request is in compliance with the standards and conditions imposed in this Act, the zoning ordinance adopted consistent with this Code, and the conditions imposed under State and federal statutes and regulations.

(h) A county may not adopt zoning regulations that disallow, permanently or temporarily, commercial wind energy

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

facilities or commercial solar energy facilities from being developed or operated in any district zoned to allow agricultural or industrial uses.

(i) A county may not require permit application fees for a commercial wind energy facility or commercial solar energy facility that are unreasonable. All application fees imposed by the county shall be consistent with fees for projects in the county with similar capital value and cost.

(j) Except as otherwise provided in this Section, a county shall not require standards for construction, decommissioning, or deconstruction of a commercial wind energy facility or commercial solar energy facility or related financial assurances that are more restrictive than those included in the Department of Agriculture's standard wind farm agricultural impact mitigation agreement, template 81818, or standard solar agricultural impact mitigation agreement, version 8.19.19, as applicable and in effect on December 31, 2022. The amount of any decommissioning payment shall be limited to the cost identified in the decommissioning or deconstruction plan, as required by those agricultural impact mitigation agreements, minus the salvage value of the project.

(k) A county may not condition approval of a commercial wind energy facility or commercial solar energy facility on a property value guarantee and may not require a facility owner to pay into a neighboring property devaluation escrow account.

(l) A county may require certain vegetative screening

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

surrounding a commercial wind energy facility or commercial solar energy facility but may not require earthen berms or similar structures.

(m) A county may set blade tip height limitations for wind towers in commercial wind energy facilities but may not set a blade tip height limitation that is more restrictive than the height allowed under a Determination of No Hazard to Air Navigation by the Federal Aviation Administration under 14 CFR Part 77.

(n) A county may require that a commercial wind energy facility owner or commercial solar energy facility owner provide:

(1) the results and recommendations from consultation with the Illinois Department of Natural Resources that are obtained through the Ecological Compliance Assessment Tool (EcoCAT) or a comparable successor tool; and

(2) the results of the United States Fish and Wildlife Service's Information for Planning and Consulting environmental review or a comparable successor tool that is consistent with (i) the "U.S. Fish and Wildlife Service's Land-Based Wind Energy Guidelines" and (ii) any applicable United States Fish and Wildlife Service solar wildlife guidelines that have been subject to public review.

~~Only a county may establish standards for wind farms, electric generating wind devices, and commercial wind energy~~

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

~~facilities, as that term is defined in Section 10 of the Renewable Energy Facilities Agricultural Impact Mitigation Act, in unincorporated areas of the county outside of the zoning jurisdiction of a municipality and outside the 1.5 mile radius surrounding the zoning jurisdiction of a municipality.~~

(o) A county may require a commercial wind energy facility or commercial solar energy facility to adhere to the recommendations provided by the Illinois Department of Natural Resources in an EcoCAT natural resource review report under 17 Ill. Admin. Code Part 1075.

(p) A county may require a facility owner to:

(1) demonstrate avoidance of protected lands as identified by the Illinois Department of Natural Resources and the Illinois Nature Preserve Commission; or

(2) consider the recommendations of the Illinois Department of Natural Resources for setbacks from protected lands, including areas identified by the Illinois Nature Preserve Commission.

(q) A county may require that a facility owner provide evidence of consultation with the Illinois State Historic Preservation Office to assess potential impacts on State-registered historic sites under the Illinois State Agency Historic Resources Preservation Act.

(r) To maximize community benefits, including, but not limited to, reduced stormwater runoff, flooding, and erosion at the ground mounted solar energy system, improved soil

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

health, and increased foraging habitat for game birds, songbirds, and pollinators, a county may (1) require a commercial solar energy facility owner to plant, establish, and maintain for the life of the facility vegetative ground cover, consistent with the goals of the Pollinator-Friendly Solar Site Act and (2) require the submittal of a vegetation management plan in the application to construct and operate a commercial solar energy facility in the county.

No later than 90 days after the effective date of this amendatory Act of the 102nd General Assembly, the Illinois Department of Natural Resources shall develop guidelines for vegetation management plans that may be required under this subsection for commercial solar energy facilities. The guidelines must include guidance for short-term and long-term property management practices that provide and maintain native and non-invasive naturalized perennial vegetation to protect the health and well-being of pollinators.

(s) If a facility owner enters into a road use agreement with the Illinois Department of Transportation, a road district, or other unit of local government relating to a commercial wind energy facility or a commercial solar energy facility, the road use agreement shall require the facility owner to be responsible for (i) the reasonable cost of improving roads used by the facility owner to construct the commercial wind energy facility or the commercial solar energy facility and (ii) the reasonable cost of repairing roads used

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

by the facility owner during construction of the commercial wind energy facility or the commercial solar energy facility so that those roads are in a condition that is safe for the driving public after the completion of the facility's construction. Roadways improved in preparation for and during the construction of the commercial wind energy facility or commercial solar energy facility shall be repaired and restored to the improved condition at the reasonable cost of the developer if the roadways have degraded or were damaged as a result of construction-related activities.

The road use agreement shall not require the facility owner to pay costs, fees, or charges for road work that is not specifically and uniquely attributable to the construction of the commercial wind energy facility or the commercial solar energy facility. Road-related fees, permit fees, or other charges imposed by the Illinois Department of Transportation, a road district, or other unit of local government under a road use agreement with the facility owner shall be reasonably related to the cost of administration of the road use agreement.

(t) Notwithstanding any other provision of law, a facility owner with siting approval from a county to construct a commercial wind energy facility or a commercial solar energy facility is authorized to cross or impact a drainage system, including, but not limited to, drainage tiles, open drainage districts, culverts, and water gathering vaults, owned or

Public Act 102-1123

HB4412 Enrolled

LRB102 22343 SPS 31480 b

under the control of a drainage district under the Illinois Drainage Code without obtaining prior agreement or approval from the drainage district, except that the facility owner shall repair or pay for the repair of all damage to the drainage system caused by the construction of the commercial wind energy facility or the commercial solar energy facility within a reasonable time after construction of the commercial wind energy facility or the commercial solar energy facility is complete.

(u) The amendments to this Section adopted in this amendatory Act of the 102nd General Assembly do not apply to (1) an application for siting approval or for a special use permit for a commercial wind energy facility or commercial solar energy facility if the application was submitted to a unit of local government before the effective date of this amendatory Act of the 102nd General Assembly or (2) a commercial wind energy facility or a commercial solar energy facility if the facility owner has submitted an agricultural impact mitigation agreement to the Department of Agriculture before the effective date of this amendatory Act of the 102nd General Assembly.

* 9 permits were issued for 11 structures in July 2023; 9 permits require inspect. and Compl. Certif.

◇ 85 permits have been issued for 95 structures since 1/1/23.

NOTE: Home occupations and Other permits (change of use, temporary use) total 9 since 1/1/23, (this number is not included in the total number of structures).

6 Zoning Use Permit App. were *received* and *approved* in July 2023.

3 Zoning Use Permit App. *approved* in July 2023 had been *received* in prior months.

Planning & Zoning Monthly Report
JULY 2023

- There were 5 lot split inquiries and 251 other zoning inquiries in July.
- Three sets of ZBA minutes were transcribed in July.

Conversion of Best Prime Farmland

Table 3 summarizes conversion of Best Prime Farmland as a result of any County zoning approval so far in 2020.

Table 3. Best Prime Farmland Conversion in 2023

	July 2023	2023 to date
Zoning Cases. Approved by the ZBA, a Zoning Case can authorize a new principal use on Best Prime Farmland that was previously used for agriculture.	0.0 acres	0.00 acres
Subdivision Plat Approvals. Approved by the County Board outside of ETJ areas, a subdivision approval can authorize the creation of new Best Prime Farmland lots smaller than 35 acres: Outside of Municipal ETJ areas ¹	0.00 acres	0.0 acres
Within Municipal ETJ areas ²	0.00 acre	0.00 acre
Zoning Use Permits. Approved by the Zoning Administrator, a Permit can authorize a new non-agriculture use on a lot that did not previously exist or was not previously authorized in either a zoning case or a subdivision plat approval.	0.00 acres	0.00 acres
Agricultural Courtesy Permits	0.00 acres	0.00 acres
TOTAL	0.00 acres	0.00 acres
NOTES 1. Plat approvals by the County Board. 2. Municipal plat approvals.		

Zoning Compliance Inspections

- 26 Zoning Compliance Inspections were made in July for a total of 212 Zoning Compliance Inspections so far in 2023.
- 4 Zoning Compliance Certificates were issued in July for a total 58 Certificates so far in 2023. Some were based on aerial photography. The 2023 budget anticipated a total of 166 compliance certificates for an average of 2.7 certificates per week.

Zoning and Nuisance Enforcement

Table 4 contains the detailed breakdown of enforcement activity for July and can be summarized as follows:

Planning & Zoning Monthly Report
JULY 2023

- 12 new complaints were received in July compared to 5 new complaints received in July 2022. No complaint was referred to another agency in July and no complaint was referred to another agency in July 2022.
- 39 enforcement inspections were conducted in July compared to 27 inspections in July 2022.
- Two contacts were made prior to written notification in July and no contacts were made in July 2022.
- 41 investigation inquiries were made in July. The 2023 budget anticipates an average of 7.0 initial investigation inquiries per week.
- Four complaints were resolved in July and four complaints were resolved in July 2022.
- 112 complaints were left open (unresolved) at the end of July.
- No new violations were added in July and no First Notices and one Final Notice were issued. In July 2022, one new violation was added and one First Notice and one Final Notice were issued. The budget anticipated a total of 10 First Notices for 2023.
- No case was referred to the State’s Attorney’s Office in July and none were referred in July 2022. The budget anticipated a total of five cases to be forwarded to the State’s Attorney’s Office in 2023.
- Three violation and four complaints were resolved in July compared to one violation and four complaints that were resolved in July 2022. The budget anticipated a total of 110 resolved complaints and/or violations in 2023.
- 363 complaints and violations remain open at the end of July compared to 403 open complaints and violations at the end of July 2022.
- In addition to the activities summarized in Table 4, other activities of Enforcement staff in July included the following:
 1. Answering phones and helping customers when needed due to unavailability or absence of Zoning Technicians.
 2. Coordinated with landowners, complainants, and the State’s Attorney’s Office regarding enforcement cases that have been referred to the State’s Attorney’s Office.
